CPDD 78th Annual Scientific Meeting Program

June 11-16, 2016
La Quinta Resort and Club
Palm Springs, California
# BOARD OF DIRECTORS

Sandra D. Comer, PhD, President
Eric C. Strain, MD, Past-President
Leonard L. Howell, PhD, President-Elect
Linda B. Cottler, PhD, MPH, Treasurer
Patrick M. Beardsley, PhD
Kathleen M. Carroll, PhD
Marilyn E. Carroll, PhD
Howard D. Chilcoat, ScD
Timothy P. Condon, PhD
Linda P. Dwoskin, PhD

Toby K. Eisenstein, PhD
Margaret Haney, PhD
Carl L. Hart, PhD
Sarah H. Heil, PhD
Stephen T. Higgins, PhD
Marc J. Kaufman, PhD
Gregory M. Miller, PhD
Charles O’Keeffe, MBA
Thomas E. Prisinzano, PhD
Jennifer Tidey, PhD

# EXECUTIVE OFFICER

Loretta P. Finnegan, MD

# DIRECTOR, EXECUTIVE OFFICE

Ellen B. Geller, MA

# SCIENTIFIC PROGRAM COMMITTEE

Elise Weerts, PhD, Chair
William W. Stoops, Chair-Elect
Michael Bardo, PhD
Howard Chilcoat, ScD
Ziva Cooper, PhD
Linda Cottler, PhD, MPH
Kelly Dunn, PhD
Linda P. Dwoskin, PhD
Michael Kuhar, PhD
Matthew Johnson, PhD
Kathryn McHugh, PhD
F. Gerald Moeller, MD
Danielle Ramo, PhD
Loretta P. Finnegan, MD, ex officio
Ellen B. Geller, MA, ex officio
PRE-MEETING SATELLITES

*Ninth Annual International Women’s and Children’s Health and Gender Group Conference*
Chaired by Wendee Wechsberg
Flores 1-4
June 10

*The 2016 NIDA International Forum: Global Developments in Drug Trends*
Chaired by Steven Gust
Fiesta 14
June 10
Fiesta 6/8
June 11

*The International Study Group Investigating Drugs as Reinforcers (ISGIDAR)*
Chaired by Mark Smith
Fiesta 12
June 11

CPDD REGISTRATION
La Cita

Saturday, June 11  
1:30 PM - 5:30 PM

Sunday, June 12 - Wednesday, June 15  
7:30 AM - 5:00 PM

Thursday, June 16  
7:30 AM - 3:00 PM

OPENING RECEPTION
(Cash Bar)
CAPRA/LAWN

Saturday, June 11  
7:00 PM - 9:00 PM
(Pre-registrants can pick up badges only)
**Plenary Program**

**Fiesta Ballroom**

8:30  *Welcome*
     CPDD President Sandra Comer

8:40  *Report from the National Institute on Drug Abuse,*
     Nora Volkow, Director

9:10  *Report from the National Institute on Alcohol Abuse and Alcoholism, Title of Talk:*
     *The role of stress in addiction: An NIAAA perspective*
     George Koob, Director

9:40  *Presentation of the Stephen G. Holtzman Travel Award for Preclinical Investigators to Jae Kim*
     Introduction by Martin W. Adler

9:45  *Presentation of the CPDD/Media Award to Bess O’Brien*
     Introduction by Bertha Madras

10:00 *Presentation of the J. Michael Morrison Award to Minda Lynch*
     Introduction by Marilyn Carroll

10:10 *Presentation of the Joseph Cochin Young Investigator Award to Jun-Xu Li*
     Introduction by Charles France

10:20 *Presentation of the Mentorship Award to Kenner Rice*
     Introduction by Thomas Prisinzano

10:30 *Presentation of the Nathan B. Eddy Award to Warren K. Bickel*
     Introduction by Stephen Higgins

10:45  *Nathan B. Eddy Lecture: The Addictionomics of Self Control*
     Warren Kurt Bickel, Virginia Tech Carilion Research Institute, Roanoke, VA

**CPDD Early Career Travel Awards Luncheon**

*(By Invitation Only)*

**Morgan’s**

11:45 - 1:00 PM

**President’s Symposium**

**Fiesta 6/8**

1:30 - 2:30 PM

**WHERE THERE’S SMOKE: U.S., AUSTRALASIAN, AND EUROPEAN CANNABIS POLICIES AND USE**

President: Sandra Comer, Columbia University and NYSPI
Deborah Hasin, Columbia University; New York State Psychiatric Institute
Alison Ritter, University of New South Wales
Marc Auriacombe, University of Bordeaux (France)
Symposium I

DEVELOPING INNOVATIVE BRAIN STIMULATION TREATMENT OPTIONS FOR SUBSTANCE-DEPENDENT INDIVIDUALS: TRANSLATING BASIC SCIENCE KNOWLEDGE OF NEURAL CIRCUITS TO OUR CLINICS

Chairs: Colleen A. Hanlon and Nora Volkow

3:00  Developing innovative brain stimulation treatment options for substance dependent individuals: Translating basic science knowledge of neural circuits to our clinics
       Colleen A Hanlon, Medical University of South Carolina, Charleston, SC
3:25  Theta burst TMS as a tool to change smoking behavior
       Warren Kurt Bickel, Virginia Tech Carilion Research Institute, Roanoke, VA
3:50  10 Hz TMS as a tool to decrease pain and opioid use among prescription opiate-dependent individuals: A single-blind sham controlled MRI & TMS study
       Gregory Sahlem, Medical University of South Carolina, Charleston, SC
4:15  From optogenetics to a potential rTMS treatment against cocaine use disorders
       Nora Volkow, National Institute of Drug Abuse, Baltimore, MD
4:40  DISCUSSANT: Dr. Hanlon and Dr. Volkow will lead an interactive discussion with the panel members and soliciting questions from the audience
       Colleen A Hanlon, Medical University of South Carolina, Charleston, SC

Symposium II

INFLUENCE OF METABOLIC HORMONES ON REWARD PROCESSING AND ADDICTION

Chairs: Arbi Nazarian and Minda Lynch

3:00  Insulin signaling and diabetes: What do we know about the rewarding effects of nicotine in the diabetic brain?
       Arbi Nazarian, Western University of Health Sciences, Pomona, CA
3:24  Leptin signaling in the ventral tegmental area regulates food intake and brain reward function
       Adriaan Bruijnzeel, University of Florida, Gainesville, FL
3:48  Ghrelin and GLP-1: Seeking the yin and yang in alcoholism
       Lorenzo Leggio, NIAAA and NIDA, Bethesda, MD
4:12  The role of central glucagon-like peptide-1 receptors in cocaine addiction
       Heath Schmidt, University of Pennsylvania, Philadelphia, PA
4:36  DISCUSSANT: What do metabolic hormones in the brain teach us about reward and addiction?
       Minda Lynch, NIDA, Bethesda, MD
Effect of a dopamine D3 receptor partial agonist on cocaine-induced locomotion and self-administration
J. Bonadonna, G. Powell, A. K. Carlson, R. Mendoza, R. H. Mach, R. R. Luedtke, J. L. Neisewander, School of Life Sciences, Arizona State University, Tempe, AZ, Perelman School of Medicine, University of Pennsylvania, Philadelphia, PA, Health Science Center, University of North Texas, Fort Worth, TX

CXCR4 antagonist Plerixafor attenuates cue- and cue/drug-induced relapse to cocaine seeking and expression and development of cocaine-induced conditioned place preference
J. K. Kim, S. Rawls, Pharmacology, Lewis Katz School of Medicine at Temple University, Philadelphia, PA, Center for Substance Abuse Research, Lewis Katz School of Medicine at Temple University, Philadelphia, PA

Kappa opioid receptor agonist 16-ethynyl salvinorin A attenuates the rewarding effects of cocaine in the progressive ratio model in rats with fewer side-effects
B. M. Kivell, D. Young, A. Culverhouse, T. Prisinzano, School of Biological Sciences, Victoria University of Wellington, Wellington, New Zealand, Department of Medicinal Chemistry, University of Kansas, Lawrence, KS

Effects of chronic amphetamine on abuse-related behavioral and neurochemical effects of cocaine in rats
A. Johnson, S. S. Negus, Virginia Commonwealth University, Richmond, VA

Long-term blockade of cocaine use and locomotor activation in rats by an adenoviral vector-delivered cocaine hydrolase
J. R. Smethells, N. Swalve, S. Brimijoin, R. Parks, M. E. Carroll, Molecular Pharmacology, Mayo Clinic, Rochester, MN, University of Minnesota, St. Paul, MN, Ottawa Hospital Research Institute, Ottawa, ON, Canada

Exercise during early, but not late, abstinence attenuates subsequent relapse vulnerability in a rat model
W. J. Lynch, R. M. Beiter, A. B. Peterson, J. Abel, Psychiatry and Neurobehavioral Sciences, University of Virginia, Charlottesville, VA

New generation tamoxifen analogs as potential treatments for amphetamine abuse
C. A. Carpenter, R. Altshuler, A. Zestos, R. Sorenson, E. M. Jutkiewicz, R. Kennedy, H. Showalter, M. Gnegy, Pharmacology, University of Michigan, Ann Arbor, MI, Chemistry, University of Michigan, Ann Arbor, MI, Vahlteich Medicinal Chemistry Core, University of Michigan, Ann Arbor, MI

Enantiomers of (±)GZ-888 potently and selectively inhibit vesicular monoamine transporter-2 function and methamphetamine-stimulated locomotor activity
N. Lee, G. Zheng, S. M. Mayfield, E. D. Denehy, J. R. Nickell, Z. Cao, P. A. Crooks, M. T. Bardo, L. P. Dwoskin, Pharmaceutical Sciences, University of Kentucky, Lexington, KY, Psychology, University of Kentucky, Lexington, KY, Pharmaceutical Sciences, University of Arkansas for Medical Sciences, Fayetteville, AR
Oral Communications 2

DAZED AND CONFUSED: POLYDRUG ABUSE
Chairs: Kimberly C. Kirby and J. Aaron A. Johnson

3:00 Gender and age bias in drug and alcohol screening
J. A. Johnson², R. Howell², P. Seale¹, ¹Navicent Health, Macon, GA, ²Augusta University, Augusta, GA

3:15 Addressing unmet addiction need in an urban hospital
K. Ahamad², S. Nolan³, E. Wood¹, ¹Urban Health Research Initiative, BC Centre for Excellence in HIV/AIDS, Vancouver, BC, Canada, ²University of British Columbia, Vancouver, BC, Canada, ³Department of Medicine, University of British Columbia, Vancouver, BC, Canada

3:30 Longitudinal health service patterns of patients with alcohol, cannabis, and opioid use disorders
A. L. Bahorik², D. Satre²,¹, A. H. Kline-Simon¹, K. C. Young-Wolf³,², C. Weisner²,¹, C. Campbell¹,², ¹Division of Research, Kaiser Permanente Northern California, Oakland, CA, ²Psychiatry, University of California, San Francisco, San Francisco, CA

3:45 Expanded brief intervention for substance use in primary care
A. C. Brooks¹, C. M. Carpenedo¹, J. Lauby², D. Metzger¹,⁵, E. Byrne¹, K. Favor³, K. C. Kirby¹,⁴, ¹Treatment Research Institute, Philadelphia, PA, ²Public Health Management Corporation, Philadelphia, PA, ³Lincoln University, Lincoln University, PA, ⁴Rowan University, Glassboro, NJ, ⁵University of Pennsylvania, Philadelphia, PA

4:00 The computer-based drug and alcohol training assessment in Kenya
V. Clair¹,², V. Mutiso³, A. Musau³, E. Frank¹, D. Ndetei³, ¹University of British Columbia, Vancouver, BC, Canada, ²Urban Health Research Initiative, British Columbia Centre for Excellence in HIV/AIDS, Vancouver, BC, Canada, ³Africa Mental Health Foundation, Nairobi, Kenya

4:15 Who says yes?: Sample representativeness in a clinical trial of SBIRT
S. S. Kelpin², S. J. Ondersma³, D. Svikis¹, ¹Virginia Commonwealth Univ., Richmond, VA, ²Psychology, Virginia Commonwealth University, Richmond, VA, ³Wayne State University, Detroit, MI

4:30 Mortality rates among substance use disorder participants in clinical trials: Pooled analysis of 22 NIDA CTN studies
P. VanVeldhuisen¹, L. Hu¹, R. Lindblad¹, N. Oden¹, P. Wakim², C. Rosa³, ¹Emmes, Rockville, MD, ²NIH, Bethesda, MD, ³NIDA, Rockville, MD

4:45 A brief substance use screening and assessment for general medical settings: Validation of the tobacco, alcohol, prescription medication, and other substance use tool
J. McNeely¹, L. T. Wu², G. Subramaniam³, G. Sharma⁴, R. P. Schwartz⁵, ¹NYU School of Med, NYC, NY, ²Duke U School of Med, Durham, NC, ³NIDA, Bethesda, MD, ⁴Emmes Corp, Rockville, MD, ⁵Friends Research Inst, Baltimore, MD
Primm-Singleton Awardees Reception

The Studios
5:00 - 6:00 PM

Workshop I

NAVIGATING KEY STAGES OF A CAREER IN ADDICTION SCIENCE: GRADUATE SCHOOL, POST-DOC AND EARLY-CAREER

Chairs: Teresa Franklin and Denise C. Vidot

Navigating the Pre-doctoral stage: Achieving the impossible!
Qiana Brown, Columbia University Mailman School of Public Health, New York, NY

Navigating the Post-doctoral stage: I made it! Now what?
Teresa Franklin, Perelman School of Medicine at the University of Pennsylvania, Philadelphia, PA

Navigating the early career stage: How do I obtain NIH funding?
Cristina B Bares, The University of Michigan School of Social Work, Ann Arbor, MI

Workshop II

THE LANDMARK ADOLESCENT BRAIN COGNITIVE DEVELOPMENT STUDY (ABCD): A DETAILED DISCUSSION OF THE STUDY GOALS, METHODOLOGIES, AND PROJECT START-UP

Chairs: Susan Weiss and Margaret Murray

The NIH Vision for ABCD
Gaya Dowling, National Institute on Drug Abuse, Rockville, MD

Design, sampling strategy, and organization of ABCD
Sandra A Brown, University of California, San Diego, La Jolla, CA

Assessment domains and technologies applied in ABCD
Susan Tapert, University of California, San Diego, La Jolla, CA

ABCD neuroimaging and data sharing
Anders Dale, University of California, San Diego, La Jolla, CA

Current status of the study
Terry Jernigan, University of California, San Diego, La Jolla, CA

Workshop III

EMERGING TECHNOLOGY FOR HUMAN SUBJECTS RESEARCH

Chairs: Jonathan J. Stoltman and Edward V. Nunes

Using Amazon’s Mechanical Turk (mTurk) to sample substance using populations
Justin C Strickland, Department of Psychology, University of Kentucky, Lexington, KY
Workshop IV

INTERNATIONAL EMERGENCE AND ABUSE OF NEW PSYCHOTROPIC SUBSTANCES (NPS), THEIR TOXICITY AND THE CURRENT REGULATORY RESPONSE

Chairs: Patrick Beardsley and Jane C. Maxwell

Introduction to the NPS issues and the status of the International Regulatory Response
Patrick Beardsley, Virginia Commonwealth University, Richmond, VA

Detection, identification, exposure assessment and pharmacological evaluation of new psychotropic substances of abuse
B. F. Thomas, Research Triangle Institute, Research Triangle Park, NC

NPS situation in Europe
Paul Griffiths, European Monitoring Centre for Drugs and Drug Addiction, Lisbon, Portugal

NPS situation in Australasia
Raimondo Bruno, University of Tasmania, Hobart Tasmania, TAS, Australia

NPS situation in North America
Jane C. Maxwell, University of Texas Addiction Research Institute, Austin, TX

General Discussion:
Co-Chairs

Workshop V

EPIDEMIOLOGY AND PUBLIC HEALTH RESEARCH METHODS

Chairs: James C. Anthony and Jan Copeland

Introduction to the Workshop
Jan Copeland, National Cannabis Prevention Medicine, University of NSW, New South Wales, NSW, Australia
Introduction to the Workshop
James C. Anthony, Michigan State University, East Lansing, MI

Overview of NIDA Epidemiology and DESPR Program Announcements and NIDA-supported resources for research
Marsha Lopez, National Institute on Drug Abuse, Bethesda, MD

Estimating causal effects with observational data when there is more than one treatment
Rajeev Ramchand, Rand Corporation, Arlington, VA

Please be advised that no photographing of presentations or data is permitted. Badges must be worn at all times and are required for admission into all events and sessions.
Town Hall

FROM DISCOVERY TO TRANSLATION: NAVIGATING THE ENTREPRENEURSHIP JUNGLE

Chairs: Beatriz Rocha and Marco Pravetoni

Start-ups from an academic view
Andrew Coop, University of Maryland School of Pharmacy, Baltimore, MD

How to spin off small pharmaceutical business
Elena Koustova, National Institute on Drug Abuse, Bethesda, MD

Starting your own spin-off focusing on med development for drug addiction
Paul Kenny, Department of Pharmacology & Systems Therapeutics, Icahn School of Medicine at Mount Sinai, New York, NY

Media Forum

WHAT’S HOT: PIVOTAL RESEARCH REPORTED AT CPDD 2016

Chairs: Bertha Madras and Anna R. Childress

Introduction to media: How to shape an effective and short presentation
Bertha Madras, Harvard Medical School, Belmont, MD

Introduction to each speaker
Anna Rose Childress, University of Pennsylvania, Philadelphia, PA

Symposium III

IDENTIFYING SYSTEM-LEVEL BIOMARKERS OF SUBSTANCE ABUSE USING FUNCTIONAL CONNECTIVITY OF THE BRAIN

Chairs: Yihong Yang and Elliot Stein

10:15 Imbalanced striatal-frontal functional connectivity predicts compulsive and impulsive behaviors in cocaine addiction
Yihong Yang, National Institute on Drug Abuse, Intramural Research Program, Baltimore, MD

10:40 Graph-theoretical modeling of brain connectivity in long-term, heavy cannabis users
Francesca Filbey, University of Texas at Dallas, Dallas, TX

11:05 Alcohol and brain connectivity: Neuroimaging of humans and animal models
Adolf Pfefferbaum, Center for Health Sciences, SRI International, Menlo Park, CA

11:30 Towards a biomarker of nicotine dependence
Elliot Stein, National Institute on Drug Abuse, Intramural Research Program, Baltimore, MD

11:55 DISCUSSANT: Addiction: Unbalanced neurocircuitry
Susan Weiss, National Institute on Drug Abuse, Rockville, MD
Symposium IV  
Fiesta 6/8  
10:15 - 12:15 PM

COGNITIVE FUNCTION AS A NOVEL TREATMENT TARGET FOR DRUG ADDICTION

Chairs: Mehmet Sofuoglu and Kathleen Carroll

10:15  
*Psychostimulants as cognitive enhancers in cocaine addiction*  
Muhammad A. Parvaz, Icahn School of Medicine at Mount Sinai, New York, NY

10:40  
*Use of compensatory strategies in technological enhancement treatment for substance abusers*  
Efrat Aharonovich, Columbia University, New York, NY

11:05  
*Smart phones for smoking cessation: Cognitive bias modification for addiction*  
Andrew Waters, Uniformed Services University of the Health Sciences, Bethesda, MD

11:30  
*A placebo controlled trial of galantamine and CBT4CBT as a cognitive enhancement strategy*  
Kathleen Carroll, Yale University, West Haven, CT

11:55  
**DISCUSSANT:** The promise of cognitive enhancement as a treatment for addictions  
Mehmet Sofuoglu, Yale University School of Medicine, West Haven, CT

Oral Communications 3  
Fiesta 12  
10:15 - 12:15 PM

THE MAN WITH THE GOLDEN ARM: OPIOID TREATMENT

Chairs: Charles Gorodetzky and Kelly E. Dunn

10:15  
*Pain severity and subsequent opioid use during buprenorphine-naloxone treatment of prescription opioid-dependent patients with chronic pain*  
R. Weiss¹, M. L. Griffin³, K. McDermott², K. McHugh⁴, S. L. Karakula², G. Fitzmaurice⁴,  
¹Harvard Medical School, Belmont, MA, ²Alcohol and Drug Abuse Clinical Research Program, McLean Hospital, Brookline, MA, ³McLean Hospital/HMS, Belmont, MA, ⁴McLean Hospital/Harvard Medical School, Belmont, MA

10:30  
*The role of genetic polymorphisms on patient response to opioid use disorder therapy with naltrexone and guanfacine*  
E. Blokhina¹, E. Krupitsky¹, A. Kibitov³, E. Verbitskaya¹, T. Kosten², D. A. Nielsen²,  
¹First Pavlov State Medical University, St. Petersburg, Russian Federation, ²Baylor College of Medicine, Houston, TX, ³Serbsky Federal Medical Research Centre of Psychiatry and Narcology, Moscow, Russian Federation

10:45  
*Optimal minimum length of treatment in opioid-dependence with buprenorphine*  
V. Zah¹, N. Matveev¹, C. Chen², J. Ruby³, ¹Health Economics, ZRx Outcomes Research Inc., Mississauga, ON, Canada, ²College of Pharmacy, University of New Mexico, Albuquerque, NM, ³Medical Affairs / HEOR, Indivior, Inc., Richmond, VA

11:00  
*Optimal prevention of relapse among opioid users: A 12-week randomized controlled trial of extended-release naltrexone injections versus daily buprenorphine-naloxone*  
L. H. Tanum¹,³, A. Opheim², K. Solli³, K. Sharma-Haase³, Z. Latif¹, N. Kunoe³, ¹R&D mental health, Akershus University Hospital, Lorenskog (Oslo), Norway, ²Department of addiction medicine, Haukeland University Hospital, Bergen, Norway, ³University of Oslo, Norwegian Centre for Addiction Research, Oslo, Norway
11:15  Randomized controlled evaluation of tramadol for opioid detoxification  
   K. E. Dunn, D. A. Tompkins, G. Bigelow, E. C. Strain, Johns Hopkins University, 
   Baltimore, MD

11:30  A phase III, randomized, double-blind, placebo-controlled study of the safety and efficacy of 
   lofexidine for relief of symptoms in adults undergoing inpatient opioid detoxification  
   C. Gorodetzky¹, S. L. Walsh², K. Gullo³, ¹USWM (Cons.), Kansas City, MO, ²Univ. KY, 
   Lexington, KY, ³USWM, Louisville, KY

11:45  Interim buprenorphine treatment for reducing illicit opioid use during treatment delays  
   S. C. Sigmon¹, T. A. Ochalek², B. Hruska¹, S. H. Heil¹, S. Higgins¹, G. Rose¹, B. A. Moore³, 
   ¹Psychiatry, The University of Vermont, Burlington, VT, ²Psychology, University of Vermont, 
   Burlington, VT, ³Psychiatry, Yale University School of Medicine, New Haven, CT

12:00  Unobserved home induction onto buprenorphine: Outcomes at year 7  
   J. D. Lee², E. Patterson Bhatraju², B. Tofighi², M. Flannery², A. Kermack², M. Gourevitch², 
   A. Garment³, K. Goldfeld², J. McNeely¹, E. Grossman³, ¹Population Health, NYU School 
   of Medicine, New York, NY, ²Population Health, New York University, New York, NY, 
   ³Medicine, New York University, New York, NY

Oral Communications 4

MRS. DOUBTFIRE: SEX/GENDER

10:15  Oxytocin reduced motivation to take cocaine in female rats and reduced reinstated drug seeking 
   in male and females  
   K. Leong, A. Hand, S. M. Ghee, C. M. Reichel, Neuroscience, Medical University of South 
   Carolina, Charleston, SC

10:30  Methamphetamine addiction vulnerability, the marked sex differences in the propensity to select 
   methamphetamine over food reinforcement  
   M. Purpura, P. Viera, Psychological and Brain Sciences, University of California Santa 
   Barbara, Santa Barbara, CA

10:45  Sex differences in a mood-based impulsivity model as a predictor for amphetamine CPP in rats  
   D. B. Vazquez Sanroman², M. T. Bardo¹,², ¹Psychology, University of Kentucky, 
   Lexington, KY, ²Psychology, Center for Drug Abuse Research Translation, Lexington, KY

11:00  Taurine’s effects on cocaine–induced behavioral sensitization in male and female rats  
   K. Y. Salas-Ramirez, M. Muritala, S. Singh, S. Ayo, R. Liang, T. Adebowale, K. Chauhan, 
   A. Elzanie, CUNY School of Medicine, New York, NY

11:15  Examining frontal-striatal circuit integrity in male and female cocaine users with TMS  
   L. T. Dowdle, W. DeVries, M. Canterberry, C. A. Hanlon, Medical University of South 
   Carolina, Charleston, SC

11:30  Gender differences in cannabis use disorder treatment: Change readiness and taking steps 
   predict worse outcomes for women  
   B. J. Sherman¹, N. Baker², A. McRae-Clark¹, ¹Psychiatry, Medical University of South 
   Carolina, Charleston, SC, ²Medical University of South Carolina, Charleston, SC
**Monday, June 13, 2016**

11:45 *Sex differences in smoking withdrawal, urge, and cessation after stroke-induced insular cortex damage*

A. Abdolahi¹,², G. Williams², C. Benesch², H. Wang², E. Spitzer³, B. Scott³, R. Block², E. van Wijngaarden²,¹Acute Care Solutions, Philips Research, Cambridge, MA,²University of Rochester, Rochester, NY,³Rochester General Hospital, Rochester, NY

12:00 *Addictive diseases and depression comorbidity: Age trajectory and gender comparison*

E. Butelman¹, S. Bacciardi², A. G. Maremmani², M. Darst-Campbell¹, B. M. Ray¹, E. Ducat¹, M. Kreek¹,¹Laboratory on the Biology of Addictive Diseases, The Rockefeller University, New York, NY,²“VP Dole” Dual Diagnosis Unit, Santa Chiara University Hospital of Pisa, Pisa, Italy

**Poster Session I**

(Lunch) 12:15 - 2:15 PM

Odd-numbered posters manned first hour;
Even-numbered, second hour

**Set-up time begins Sunday, 1 PM**

**Must be removed by Monday 2:30 PM**

**IMMUNE/HIV**

1 *Preliminary findings: HIV/STD risk among crack cocaine-dependent patients in treatment in Brazil’s ‘Crackland’*

S. McPherson², C. S. Madruga¹, A. Q. Miguel¹, M. G. McDonnell², A. Ribeiro¹,¹Psychiatry, UNIFESP, Sao Paulo, Brazil,²Washington State University, Spokane, WA

2 *Rates and correlates of syphilis reinfection among men who have sex with men in San Francisco*

J. P. Jain¹, G. Santos², S. Scheer³, S. Gibson⁴, P. Crouch⁴, R. Kohn³, W. Chang¹, A. Carrico¹,¹CHS, UCSF, San Francisco, CA,²Community Health Systems, University of California San Francisco, San Francisco, CA,³SFDPH, San Francisco, CA,⁴SFAF, San Francisco, CA

3 *HIV, overdose mortality and the impact of anti-retroviral therapy adherence*

A. Caudarella², H. Dong¹, K. Hayashi¹, T. Kerr¹, E. Wood¹, M. Milloy¹,¹Urban Health Research Initiative, BC Centre for Excellence in HIV/AIDS, Vancouver, BC, Canada,²University of British Columbia, Toronto, ON, Canada

4 *Food insecurity and HIV progression among Russians with heavy alcohol consumption*

B. Idrisov², K. Lunze², D. M. Cheng², E. Blokhina¹, N. Gnatienko², G. Pattis², C. Bridden², C. Chaisson², S. D. Weiser⁴, E. Krupitsky¹, J. H. Samet²,¹First St. Petersburg Pavlov State Medical University, St. Petersburg, Russian Federation,²Boston University, Boston, MA,³General Internal Medicine, Butler Hospital, Providence, RI,⁴Brown University, Providence, RI

5 *Predictors of skin infections among hospitalized injection drug users in Boston*

K. T. Phillips², B. J. Anderson³,⁴, J. M. Liebschutz¹, M. Stein³,⁴,¹Medicine, Boston University School of Medicine, Boston, MA,²University of Northern Colorado, Greeley, CO,³General Internal Medicine, Butler Hospital, Providence, RI,⁴Brown University, Providence, RI

6 *CD8+ lymphocytes and CD14high CD16low monocytes in chronic marijuana-using HIV patients*

J. Panee, L. Chang, University of Hawaii, Honolulu, HI

**PRECLINICAL STUDIES**

| **13** | Search for novel TLR4 antagonists for the treatment of neuropathic pain and drug abuse |
|       | M. Wang, A. E. Jacobson, Molecular Targets and Medications Discovery Branch, National Institute of Drug Abuse and National Institute on Alcohol Abuse and Alcoholism, National Institutes of Health, Bethesda, MD |
| **14** | Morphine-induced analgesia in the sensory and affective components of inflammatory pain |
|       | A. Armendariz, A. Nazarian, Pharmaceutical Sciences, Western University of Health Sciences, Pomona, CA |
| **15** | Partial kappa opioid receptor agonist effects in vivo in mice: Biased versus unbiased |
|       | C. Guariglia, A. Dunn, K. Windisch, E. Butelman, B. Reed, M. Kreek, The Rockefeller University, New York, NY |
| **16** | Abuse-related effects of the biased mu opioid receptor agonist TRV130 on intracranial self-stimulation in rats |
|       | A. Altarifi¹, B. Blough³, S. S. Negus², ¹Pharmacology, Jordan University of Science & Technology, Irbid, Jordan, ²Virginia Commonwealth University, Richmond, VA, ³Research Triangle Institute, Research Triangle Park, NC |
17 Chronic administration of nandrolone increases the liability to morphine dependence with no correlation with LVV-hemorphin 7 in rats
   E. Huang¹, Y. Chen², T. Huang¹, L. Chow¹, ¹Pharmacology, National Defense Medical Center, Taiwan, Taipei, Taiwan, ²Anesthesiology Department, Taipei Veterans General Hospital, Taipei, Taiwan, ³Department of Neurological Surgery, Tri-Service General Hospital, Taipei, Taiwan

18 Anxiolytic-like and discriminative stimulus effects of benzodiazepine+neuroactive steroid combinations in rats
   B. W. Gunter²,¹, S. A. Jones¹, D. Platt¹, J. K. Rowlett¹, ¹University of Mississippi Medical Center, Jackson, MS, ²Vanderbilt University, Pegram, TN

19 Novel environment response as a predictor of midazolam self-administration in rats
   J. E. Cook¹, S. L. Huskinson¹, B. W. Gunter², K. Freeman¹, J. K. Rowlett¹, ¹University of Mississippi Medical Center, Jackson, MS, ²Vanderbilt University, Pegram, TN

20 Emerging role of microRNAs in regulation of nicotine dependence: A Caenorhabditis elegans model
   X. Pan, J. R. Polli, Biology, East Carolina University, Greenville, NC

21 The role of the α7 and α4β2 nicotinic receptors in nicotine sensitization and neural plasticity of adolescent rats neonatally treated with quinpirole: Effects on mTOR and nicotinic receptor density
   D. J. Peterson¹,², J. Wherry², E. D. Cummins³, D. Hoover², R. W. Brown², ¹Psychology, East Tennessee State University, Johnson City, TN, ²Biomedical Sciences, East Tennessee State University, Johnson City Tennessee, TN, ³Psychology, University of Nebraska, Lincoln, NE

22 Silencing giant cholinergic interneurons in the nucleus accumbens with DREADDs reduces nicotine self-administration in rats
   E. A. Williams, C. A. Bradley, M. I. Palmatier, Psychology, East Tennessee State University, Johnson City, TN

23 Role of accumbens nicotinic acetylcholine receptors in cue-induced nicotine seeking and synaptic plasticity
   A. del Franco¹,², G. Powell¹,², B. Pagni¹, J. Goenaga¹, M. Scofield³, C. Gipson-Reichardt¹, ¹Psychology, Arizona State University, Tempe, AZ, ²School of Life Sciences, Arizona State University, Tempe, AZ, ³Neurosciences, Medical University of South Carolina, Charleston, SC

24 Vulnerability to glutamate excitotoxicity is sexually dimorphic in rats exposed to chronic social defeat stress: Relevance to astrocytic glutamate-glutamine cycle
   V. Rappeneau¹, A. BLAKER², J. PETRO¹, B. Yamamoto², A. Shimamoto¹, ¹Neuroscience and Pharmacology, Meharry Medical College, Nashville, TN, ²Department of Pharmacology and Toxicology, Indiana University School of Medicine, Indianapolis, IN

25 Expression of the cannabinoid CB1 receptor in Chinese hamster ovary cells: A specific cellular model to investigate the acute and chronic effects of synthetic cannabinoids
   M. Funada, K. Tomiyama, Drug Dependence Research, NIMH, NCNP, Kodaira, Japan

26 In vivo and in vitro cannabinoid effects of three synthetic compounds
   M. J. Forster, M. B. Gatch, Center for Neuroscience Discovery, UNT Health Science Center, Fort Worth, TX
27 Physiological and pharmacokinetic effects of e-cigarette-type exposure to delta9-tetrahydrocannabinol in rats
J. D. Nguyen¹, S. M. Aarde¹, S. Vandewater¹, Y. Grant¹, D. G. Stouffer¹, M. Cole²,
L. Parsons¹, M. A. Taffe¹, ¹CNAD, The Scripps Research Institute, San Diego, CA, ²La Jolla
Alcohol Research, Inc., La Jolla, CA

28 Real-time, continuous electrochemical monitoring of drugs in vivo
P. Vieira¹, N. Arroyo Currás², J. Somerson², K. Ploense¹, K. Plaxco², T. E. Kippin¹,
¹Psychological & Brain Sciences, University of California Santa Barbara, Goleta, CA,
²Chemistry, University of California Santa Barbara, Santa Barbara, CA

IMAGING

29 Fractional anisotropy increase in long-term anabolic-androgenic steroid users
M. J. Kaufman², J. Seitz¹, A. E. Lyall¹, G. Kanayama¹, N. Makris¹, J. I. Hudson²,
M. Kubicki¹, H. G. Pope, Jr.², ¹Brigham & Women’s Hospital, Boston, MA, ²McLean
Hospital, Belmont, MA

30 Alexithymia and addiction: A review and preliminary data suggesting neurobiological links to reward/loss processing
K. P. Morie¹, S. W. Yip², C. Nich³, K. Hunkele³, K. Carroll², M. N. Potenza², ¹Diagnostic
Radiology, Yale University, New Haven, CT, ²Psychiatry, Yale University, New Haven, CT,
³Connecticut Mental Health Center, New Haven, CT

31 A brain imaging study of dopamine receptor D₂ availability in cannabis-dependent users after recovery from cannabis-induced psychosis using [¹²³I] IBZM in Single Photon Emission Tomography
A. M. Weinstein¹,², H. Lerman², M. Greemland², O. Frisch³, E. Even-Sapir², ¹Behavioral
Sciences, University of Ariel, Ariel, Israel, ²Nuclear Medicine, Tel Aviv Sourasky Medical
Center, Tel Aviv, Israel, ³Kfar Izun Treatment Center, Ceasaria, Israel

32 Psilocybin in long-term meditators: Effects on default mode network functional connectivity and retrospective ratings of qualitative experience
F. S. Barrett¹, M. W. Johnson¹, R. R. Griffiths¹, ¹Psychiatry and Behavioral Sciences, Johns
Hopkins University School of Medicine, Baltimore, MD, ²Neuroscience, Johns Hopkins
University School of Medicine, Baltimore, MD

33 Altered resting state fMRI response in young adult marijuana users and heavy drinkers
A. D. Dager¹, S. Meda², H. Tennen³, S. Raskin⁴, C. Austad³, R. Wood³, C. Fallahi³,
G. Pearlson¹,², ¹Yale, New Haven, CT, ²Olin Neuropsych Res Ctr, Hartford, CT, ³Univ of CT
Health Ctr, Farmington, CT, ⁴Trinity College, Hartford, CT, ⁵Central CT State Univ, New
Britain, CT

34 Striatal responses to d-amphetamine differentiates young adults at “high-risk” of drug abuse
M. J. Wesley¹, J. A. Lile¹, C. E. Emurian¹, C. Martin², J. Joseph², T. H. Kelly¹, ¹Behavioral
Science, University of Kentucky, Lexington, KY, ²Psychiatry, University of Kentucky
College of Medicine, Lexington, KY, ³Neurosciences, Medical University of South Carolina,
Charleston, SC

35 Psychological intervention with working memory training increases basal ganglia volume: A VBM study of inpatient treatment for methamphetamine dependence
S. J. Brooks, D. J. Stein, L. Van Nunen, Psychiatry and Mental Health, University of Cape
Town, Cape Town, South Africa
36 Methamphetamine dependence linked to interoceptive processing deficits during aversive breathing load
A. C. May¹, J. L. Stewart⁴, P. Davenport², S. Tapert¹, M. P. Paulus³, ¹UC San Diego, San Diego, CA, ²Physiological Sciences, University of Florida, Gainesville, FL, ³Laureate Institute for Brain Research, Tulsa, OK, ⁴Queens College, City University of New York, Flushing, NY

37 The effects of naltrexone on neural responses to methamphetamine cues
K. E. Courtney¹, D. Ghahremani², L. Ray³, ¹Psychology, University of California, Los Angeles, San Diego, CA, ²Psychiatry and Biobehavioral Science, University of California, Los Angeles, Los Angeles, CA, ³Psychology, University of California, Los Angeles, Los Angeles, CA

38 Structural analysis of the limbic system in substance dependence

39 Effective connectivity of attentional bias in cocaine dependence
F. Moeller⁷,³, L. Ma⁷,⁹, J. Steinberg⁷,³, J. Bjork⁷,³, S. D. Lane², P. A. Narayana¹⁰, T. Kosten¹, A. Bechara¹¹, J. Schmitz⁴, A. E. Price⁶, K. A. Cunningham⁵, ¹Psychiatry, Baylor, Houston, TX, ²Psychiatry & Behavioral Sciences, UT Health Science Center, Houston, TX, ³Psychiatry and Pharmacology, VCU, Richmond, VA, ⁴UT, Houston, TX, ⁵Center for Addiction Research, UT Medical Branch, Galveston, TX, ⁶Neuroscience Graduate Program, UT Medical Branch, League City, TX, ⁷Institute for Drug and Alcohol Studies, VCU, Richmond, VA, ⁸Center for Clinical and Translational Research, Richmond, VA, ⁹Radiology, VCU, Richmond, VA, ¹⁰Radiology, UT Houston Medical School, Houston, TX, ¹¹Psychology, USC Brain and Creativity Institute, Los Angeles, CA

40 When bigger isn’t better: Widespread brain activation during attempted inhibition of the response to 6-sec cocaine video cues predicts poor drug use outcome

41 Transition to problem stimulant use marked by amplified insular responding to pleasant interoceptive stimuli
E. Ramirez-Coombs¹, A. C. May², J. L. Stewart¹,⁴, S. Tapert⁵,³, M. P. Paulus⁶,³, ¹Psychology, CUNY Graduate Center, New York, NY, ²Psychiatry, UC San Diego, San Diego, CA, ³Psychiatry, CUNY Queens College, Flushing, NY, ⁴Psychiatry Service, Veterans Affairs San Diego Healthcare System, San Diego, CA, ⁵Laureate Institute of Brain Research, Tulsa, OK

42 Resting state functional connectivity among cocaine users
A. L. Hobkirk¹, R. P. Bell², A. V. Utevsky³, C. S. Meade¹, ¹Psychiatry & Behavioral Sciences, Duke University, Durham, NC, ²Psychology, University of North Carolina, Chapel Hill, NC, ³Psychology and Neuroscience, Duke University, Durham, NC

43 Hemispheric associations of behavioral inhibition and approach in substance dependence
D. Yamamoto¹, M. T. Banich³, M. F. Regner³, J. Sakai¹, J. Tanabe¹, ¹Department of Psychiatry and Radiology, University of Colorado Denver, Aurora, CO, ³Departments of Radiology and Bioengineering, University of Colorado Denver, Denver, CO, ³Institute of Cognitive Science, University of Colorado Boulder, Boulder, CO
Neural effects of treatment in a trial of behavioral therapies and disulfiram for cocaine dependence
E. E. DeVito1, G. Dong2,1, H. Kober1, J. Xu1, K. Carroll1, M. N. Potenza1, 1Psychiatry, Yale University School of Medicine, New Haven, CT, 2Psychology, Zhejiang Normal University, Jinhua, China

Poorer working memory performance among cocaine users accounted for by increased activation in the middle frontal gyrus
J. Y. Yi1, R. P. Bell1, T. Ross2, E. Stein2, S. B. Daughters1, 1Department of Psychology and Neuroscience, University of North Carolina at Chapel Hill, Chapel Hill, NC, 2Neuroimaging Research Branch, National Institute on Drug Abuse, National Institutes of Health, Baltimore, MD

Distress tolerance among substance users associated with connectivity between the MFG and vmPFC/sgACC during a distress tolerance task
E. D. Reese1, R. P. Bell1, J. Y. Yi1, T. Ross2, E. Stein2, S. B. Daughters1, 1Department of Psychology and Neuroscience, University of North Carolina at Chapel Hill, Chapel Hill, NC, 2Neuroimaging Research Branch, National Institute on Drug Abuse, National Institutes of Health, Baltimore, MD

The “little brain” steps up: Cerebellar activity during successful inhibition predicts treatment outcome in cocaine patients

Switching gears: Shifts in reward function associated with age of onset of MJ use
N. Hager1, K. Jagannathan1, R. Wetherill1, P. Regier1, Y. Mashhoon2, H. Pater1, C. P. O’Brien1, A. R. Childress1, T. Franklin1, 1Psychiatry, University of Pennsylvania, Philadelphia, PA, 2Psychiatry, Harvard, Belmont, MA

Losing balance: Time course of smoking cue-elicited neural activity

Right inferior frontal gyrus structure and function predict smoking (re)lapse in real-world and laboratory contexts
B. Froeliger1,2, P. McConnell1, S. Bell1, C. Eichberg1, M. Sweitzer1, K. M. Gray2, J. McClernon3, 1Neuroscience, MUSC, Charleston, SC, 2Psychiatry, MUSC, Charleston, SC, 3Psychiatry, Duke, Durham, NC

Insula reactivity to negative stimuli is associated with daily cigarette use: A preliminary investigation using the human connectome database
A. L. Peechatka1,2, N. Dias3, A. Janes3, 1McLean Imaging Center, McLean Hospital, Belmont, MA, 2Psychology, Suffolk University, Boston, MA, 3McLean Imaging Center, McLean Hospital/ Harvard Medical School, Belmont, MA

Impact of smoking reduced nicotine content cigarettes on sensitivity to cigarette price: Results from a multi-site clinical trial
E. Donny1, T. T. Smith1, R. Cassidy2, J. W. Tidey2, X. Luo3, C. L. Le3, D. Hatsukami4, 1Psychology, University of Pittsburgh, Pittsburgh, PA, 2Brown University, Providence, RI, 3University of Minnesota, Minneapolis, MN, 4University of Minnesota Medical School, Minneapolis, MN
53 Interactions between alcohol and mephedrone in humans
M. Farré1,2,3, E. Papaseit2,1,3, C. Pérez-Mañà2,3, E. de Souza Fernandes4, J. F. Mateus2, E. Olesti2,6, K. Kuypers4, E. Theunisen4, F. Fonseca5,3, M. Torrens5,3, J. Ramaekers4, R. 105 Naloxone uptake and use among people who inject drugs in the Seattle area, 2009-2015
S. N. Glick¹, J. Tsui¹, M. Hanrahan², C. J. Banta-Green¹, H. Thiede², ¹University of Washington, Seattle, WA, ²Public Health-Seattle & King County, Seattle, WA

106 Change in abuse diagnoses in patients prescribed oxycontin after its reformulation with abuse-deterrent properties
A. Kadakia², P. Coplan¹, R. Singh², A. DeVeaugh-Geiss¹, ¹Risk Management and Epidemiology, Purdue Pharma, Stamford, CT, ²Purdue, Stamford, CT

107 Diversion of controlled substances at the pharmacy level: Findings from RxPATROL since introduction of opioids with abuse-deterrent properties
J. G. Erensen, J. D. Haddox, L. N. Bauza, Purdue Pharma L.P., Stamford, CT

108 Drug users’ advice on enrollment and retention in health research
A. Zulich, A. Elliott, C. W. Striley, L. Cottler, Epidemiology, University of Florida, Gainesville, FL

109 Drug users and non-drug users both favor uncommon informed consent practices
A. Elliott, A. Zulich, L. Cottler, C. W. Striley, Epidemiology, University of Florida, Gainesville, FL

110 Increased drug use and the timing of social assistance receipt among people who use illicit drugs

111 Meta-analysis as a form of evidence: An examination of the Cochrane reviews for behavioral health
S. Magura, M. J. Lee, S. Means, Western Michigan University, Kalamazoo, MI

112 A summary of addiction services in a Canadian city: Preliminary results from an Internet-based scoping study
E. Knight, St. Paul’s Hospital Goldcorp Addiction Medicine Fellowship, BC Centre for Excellence in HIV/AIDS, Vancouver, BC, Canada

113 Using residential in-patient detoxification units to facilitate effectiveness of therapeutic community rehabilitation: A comparative follow-up pilot study
S. Rabinovitz, School of Criminology, University of Haifa, Haifa, Israel
Monday, June 13, 2016

Marian W. Fischman Memorial Award Lecture
Presentation of the Marian W. Fishman Award to Marilyn Huestis

Introduction by Jack Henningfield

Lecture: The Great US Cannabis Experiment: Research & Education to Enable Informed Public Decisions
Marilyn Huestis

Symposium V

INTRACELLULAR SIGNALING MOLECULES AS TARGETS FOR STIMULANT ABUSE TREATMENT

Chairs: Margaret Gnegy and John Traynor

3:30 A tonic-phasic model explains the effect of deltaFosB on addiction-related behaviors
Thomas Green, University of Texas Medical Branch, Galveston, TX

3:55 RGS2 signaling and implication for drug addiction
Rong Chen, Wake Forest School of Medicine, Winston Salem, SC

4:20 Trace amine-associated receptor 1 as a target for stimulant abuse treatment
Jun-Xu Li, University at Buffalo, New York, NY

4:40 PKCbeta as a target for amphetamine abuse
Margaret Gnegy, University of Michigan School of Medicine, Ann Arbor, MI

5:10 DISCUSSANT:
John Traynor, University of Michigan Medical School, Ann Arbor, MI

Symposium VI

IS TWO BETTER THAN ONE? NEW INSIGHTS ON POLYSUBSTANCE USE FROM EPIDEMIOLOGICAL, CLINICAL, AND BASIC RESEARCH

Chairs: Heather Kimmel and Paul W. Czoty

3:30 Epidemiology of polysubstance use in the United States: Findings from national cross-sectional and longitudinal studies
Sean McCabe, University of Michigan, Ann Arbor, MI

3:55 Early adolescent polysubstance use and young adult substance use disorders
Howard Moss, University of California at Riverside School of Medicine, La Jolla, CA

4:20 Polysubstance users versus alcohol users: Do different cognitive and neurobiological deficits ask for different treatment?
Dieter Meyerhoff, School of Medicine UCSF, San Francisco, CA

4:45 The toxic effects of serial exposure to alcohol and methamphetamine
Bryan K Yamamoto, Indiana University School of Medicine, Indianapolis, IN

5:10 DISCUSSANT: Translational studies of polysubstance abuse: Enhancing translation
Paul W. Czoty, Wake Forest School of Medicine, Winston-Salem, NC
Oral Communications 5

STUDIO 54: CLUB DRUGS

Chairs: Leonard Howell and Matthew W. Johnson

3:30  Ketamine-induced changes in resting state functional connectivity in conscious nonhuman primates: Implications for drug abuse
E. A. Maltbie¹, K. Gopinath², L. Howell¹, ¹Yerkes National Primate Research Center, Emory University, Atlanta, GA, ²Department of Radiology and Imaging Sciences, Emory University, Atlanta, GA

3:45  Juvenile ketamine exposure alters sensitivity to reward-related stimuli in adulthood
S. D. Iniguez¹,², L. M. Riggs³, A. R. Zavala¹, ¹Psychology, University of Texas at El Paso, El Paso, TX, ²Psychology, California State University, San Bernardino, San Bernardino, CA, ³Psychology, California State University, Long Beach, Long Beach, CA

4:00  Alterations in brain neurotransmitter levels after single and repeated inhalation of toluene in rats
A. A. Elkoussi, Pharmacology, Assiut College of Medicine, Assiut, Egypt

4:15  MDMA increases affiliative behaviors and vocalizations in nonhuman primates in a 5-HT₂A receptor-dependent manner
E. G. Pitts, A. R. Minerva, E. B. Oliver, L. Howell, Yerkes National Primate Research Center, Emory University, Atlanta, GA

4:30  S-Mephedrone: Preclinical investigation against behavioral effects of the synthetic cathinone MDPV
H. Philogene¹, S. Rawls¹, A. Reitz², ¹Center for Substance Abuse Research, Lewis Katz School of Medicine at Temple University, Philadelphia, PA, ²Fox Chase Chemical Diversity Center, Doylestown, PA

4:45  3,4-Methylenedioxy-N-ethylcathinone and its analogs differentially affect dopamine and 5-HT systems in rat brain
H. M. Walters¹, O. Dillon-Carter¹, J. S. Partilla¹, F. Sakloth², R. A. Glennon², C. W. Schindler³, M. H. Baumann¹, ¹Designer Drug Research Unit, IRP, NIDA, NIH, Baltimore, MD, ²Department of Medicinal Chemistry, VCU School of Pharmacy, Richmond, VA, ³Preclinical Pharmacology Section, IRP, NIDA, NIH, Baltimore, MD

5:00  Pharmacological mechanisms underlying cardiovascular effects of 3,4-methylenedioxyppyrovalerone
C. W. Schindler¹, E. Thorndike¹, M. Suzuki¹, K. Rice⁴, M. Baumann⁵, ¹Preclinical Pharmacology Section, NIH/NIDA Intramural Research, Baltimore, MD, ⁴Drug Design and Synthesis Section, NIH/NIDA Intramural Research, Baltimore, MD, ⁵Designer Drug Unit, NIH/NIDA Intramural Research, Baltimore, MD

5:15  Commuting distance to Miami’s club scene and binge substance use and related problems among young adults
M. E. Buttram¹, M. Pagano², S. P. Kurtz¹, ¹Center for Applied Research on Substance Use and Health Disparities, Nova Southeastern University, Miami, FL, ²Department of Psychiatry, Division of Child Psychiatry, Case Western Reserve University, Cleveland, OH
Oral Communications 6

A STREET CAR NAMED DESIRE: REWARD/REINFORCEMENT

Chairs: Adam Leventhal and Sally L. Huskinson

3:30  Caffeine self-administration in rats
      C. A. Bradley, E. M. Sanders, E. A. Williams, M. I. Palmatier, Psychology, East Tennessee State University, Johnson City, TN

3:45  Variable availability as a determinant of cocaine choice in rhesus monkeys
      S. L. Huskinson1, K. Freeman1, N. Petry2, J. K. Rowlett1,3, 1University of Mississippi Medical Center, Jackson, MS, 2University of Connecticut School of Medicine, Farmington, CT, 3Tulane National Primate Research Center, Covington, LA

4:00  Increasing nicotine cost and decreasing nicotine dose are not equivalent manipulations: A behavioral economics analysis
      T. T. Smith2, L. E. Rupprecht1, A. F. Sved1,2, E. Donny2, 1Center for Neuroscience, University of Pittsburgh, Pittsburgh, PA, 2Psychology, University of Pittsburgh, Pittsburgh, PA

4:15  Influence of cocaine cues on monetary choice in cocaine users
      J. C. Strickland1, C. R. Rush1,2,3, W. W. Stoops1,2,3, 1Psychology, University of Kentucky, Lexington, KY, 2Behavioral Science, University of Kentucky, Lexington, KY, 3Psychiatry, University of Kentucky, Lexington, KY

4:30  Physical activity enjoyment predicts sensitivity to the acute subjective effects of amphetamine in healthy volunteers
      M. Pester, M. Kirkpatrick, A. Leventhal, Preventive Medicine, University of Southern California, Los Angeles, CA

4:45  Neural responses to risk and reward predict transition to problem stimulant use
      J. L. Stewart2,3, A. C. May1, M. Reske4, S. Tapert1,5, M. P. Paulus6,1, 1Psychiatry, UC San Diego, La Jolla, CA, 2Psychology, CUNY Graduate Center, New York, NY, 3Psychology, CUNY Queens College, Flushing, NY, 4Institute of Neuroscience and Medicine-4, Medical Imaging Physics, Forschungszentrum Jülich GmbH, Jülich, Germany, 5Psychiatry Service, Veterans Affairs San Diego Healthcare System, San Diego, CA, 6Laureate Institute of Brain Research, Tulsa, OK

5:00  Activity based reward processing among opiate users: Validation of the behavioral incentive delay task
      R. P. Bell, J. Y. Yi, Y. Chen, A. Petruzzella, I. Jiang, K. A. Johnson, E. D. Reese, S. B. Daughters, Department of Psychology and Neuroscience, University of North Carolina at Chapel Hill, Chapel Hill, NC

5:15  Differences in delay discounting between heroin and prescription opioid users
      S. L. Karakula1, M. L. Griffin2, R. Weiss2, K. McHugh2, 1McLean Hospital, Belmont, MA, 2McLean Hospital/Harvard Medical School, Belmont, MA
### Pre- and Post-Doctoral Trainees Networking Event  
**CAPRA**  
5:45 - 7:00 PM

### Workshop VI
**Fiesta 10/14**  
7:00 - 9:00 PM

#### 22ND ANNUAL CONTINGENCY MANAGEMENT WORKING GROUP
Chairs: Diann Gaalema and Kelly E. Dunn

### Workshop VII
**Fiesta 4**  
7:00 - 9:00 PM

#### INTRODUCING THE NATIONAL DRUG EARLY WARNING SYSTEM (NDEWS)
Chairs: Eric Wish and Moira O’Brien

- **Building a national drug early warning system: Introducing the NDEWS model and new drug use trends and patterns from 12 sentinel community sites**  
  Erin Artigiani, University of Maryland, Center for Substance Abuse Research (CESAR), College Park, MD

- **Emerging patterns and trends in the use of heroin, prescription opioids, and other drugs in San Francisco**  
  Phillip Coffin, San Francisco Department of Public Health, San Francisco, CA

- **Screening and reporting synthetic cannabinoid use in an urban emergency department**  
  J Richardson, University of Maryland, African-American Studies Department, College Park, MD

- **Analyzing drug trends on social media**  
  Jennifer Golbeck, University of Maryland, College of Information Studies, College Park, MD

- **Discussant: NIDA’s new epidemiology**  
  Linda Cottler, University of Florida, Department of Epidemiology, Gainesville, FL

### Workshop VIII
**Fiesta 12**  
7:00 - 9:00 PM

#### A GENDER LENS TO ADDRESSING ADOLESCENT SUBSTANCE USE DISORDERS AND TRAUMA WITH SYSTEMS LEVEL APPROACH / SASATE BUSINESS MEETING
Chairs: Michael L. Dennis and Sally Stevens

- **Substance use disorders and trauma symptoms in national data from adolescents entering substance abuse treatment by sex and sexual identity**  
  Michael L Dennis, Chestnut Health Systems, Normal, IL

- **The impact of a system of care approach in treating substance use disorders among adolescent girls**  
  Sally Stevens, University of Arizona – Southwest Institute for Research on Women, Tucson, AZ
Outcomes of a trauma responsive system of care for LGBT youth
Claudia Powell, University of Arizona – Southwest Institute for Research on Women, Tucson, AZ

Empowering female adolescent drug users in Cape Town: A government response
Felicia Browne, RTI International, Durham, NC

Workshop IX
Fiesta 6/8
7:00 - 9:00 PM

MARIJUANA LAWS: THE CHANGING LEGAL LANDSCAPE AND ITS CONSEQUENCES

Chairs: Marsha Lopez and Andrew Freedman

Do patterns of medical marijuana use correspond to overall health levels?
Bridget Freisthler, Luskin School of Public Affairs, University of California, Los Angeles, CA

Tracking emerging cannabis use trends with social media
Raminta Daniulaityte, Boonshoft School of Medicine, Wright State University, Kettering, OH

Adolescent marijuana-related attitudes and behaviors in the context of non-medical marijuana legalization in Washington State: Implications for prevention
Walter Mason, Boys Town National Research Institute for Child and Family Studies, Boys Town, NE

Public health effects of medical marijuana legalization in Colorado
Karen F Corsi, Univ. of Colorado School of Medicine, Denver, CO

DISCUSSANT:
Andrew Freedman, Governor’s Office of Marijuana Coordination, Denver, CO

Please be advised that no photographing of presentations or data is permitted. Badges must be worn at all times and are required for admission into all events and sessions.
Basic Science

100 The impact of lifestyle on mental health in the Gilgel Gibe Field Research Center, Ethiopia: Khat abuse as a risk factor for the development of psychotic symptoms
K. Adorjan1, M. Tesfaye2, M. Widmann3, F. Tessema4, M. Odenwald3, S. Toennes5, S. Papiol1, E. Susser6, M. Soboka2, Z. Mekonnen7, M. Rietschel8, S. Suleman7, T.G. Schulze1. 1Institute of Psychiatric Phenomics and Genomics, Germany; 2Department of Psychiatry, Jimma University, Ethiopia; 3Department of Psychology, University of Konstanz, Germany; 4Department of Epidemiology, Jimma University, Ethiopia; 5Toxicology, University of Frankfurt, Germany; 6Department of Epidemiology, Columbia University, United States; 7Drug Laboratory, Jimma University, Ethiopia; 8Department of Genetic Epidemiology in Psychiatry, Germany

101 Haemodynamic responses to tobacco smoke inhalation in male adolescents in Lusaka, Zambia
T. Chikopela1, F.M. Goma2. 1Lusaka Apex Medical University, Zambia; 2 School of Medicine, The University of Zambia, Zambia

102 Alterations in brain neurotransmitter levels after single and repeated inhalation of toluene in rats
A. Elkoussi, Department of Pharmacology, College of Medicine, University of Assiut, Egypt

103 Cognitive dysfunction and altered cerebral functional connectivity in chronic ketamine users
C. Hung1,2,3, C-S.R. Li4,5, S. Zhang4, S. Hu4, J.R. Duann6, T. S-H. Lee7. 1Bali Psychiatric Center, Ministry of Health and Welfare, Taiwan; 2Institute of Brain Science, National Yang-Ming University, Taiwan; 3Brain Connectivity Laboratory, Institute of Neuroscience, National Yang-Ming University, Taiwan; 4Department of Psychiatry, Yale School of Medicine, United States; 5Department of Neuroscience, Yale School of Medicine, United States; 6Biomedical Engineering Research and Development Center, China Medical University, China; 7Department of Health Promotion and Education, National Taiwan Normal University, Taiwan

104 Attenuation of morphine withdrawal by kappa agonist nalbuphine: Involvement of adenosine 3':5'-cyclic monophosphate system
R. Jain1, R. Raghav1, T.S. Roy2, A. Dhawan1, P. Kumar1. 1Department of Psychiatry, National Drug Dependence Treatment Centre, India; 2Department of Anatomy, All India Institute of Medical Sciences, India

105 The effects of recreational marijuana and ecstasy use on brain activation during visual-motor associative learning
A. Kustubayeva2,3, B. Lewis1, M. Smith1, M. Smith1, J. Eliassen1. 1University of Cincinnati, United States; 2Kazakh National University, Kazakhstan

106 Effects of short periods of maternal separation on social behavior and drug reward on the adolescent rat
A. Magalhães1,2, M. Nogueira3, J. Bravo1, C.J. Alves1, A. Mesquita3, T. Summavielle1, L. De Sousa2. 1Instituto de Investigação e Inovação em Saúde, Portugal; 2Instituto de Ciências Biomédicas Abel Salazar, Universidade do Porto, Portugal; 3Centro de investigação em Psicologia, Universidade do Minho, Portugal
Survival meta-analysis of age at onset of cannabis use based on the International Cannabis Consortium sample of 24,222 individuals
C.C. Minica¹, K.J.H. Verweij¹, P. van der Moost², H. Mbarek¹, International Cannabis Consortium, D.I. Boomsma¹, J.M. Vink³, N.A. Gillespie⁴, E.M. Derks⁵. ¹Department of Biological Psychology, Vrije Universiteit Amsterdam, The Netherlands; ²Department of Epidemiology, University of Groningen, University Medical Center, The Netherlands; ³Behavioural Science Institute, Radboud University, The Netherlands; ⁴Department of Psychiatry, Virginia Institute for Psychiatric and Behavior Genetics, Virginia Commonwealth University, United States; ⁵Department of Psychiatry, Academic Medical Centre, The Netherlands

Reduced insula and prefrontal cortex volumes in chronic methamphetamine users with psychosis
C. Qi, Y.H. Liao, Q.X. Wu, T.Q. Liu, W. Hao. Mental Health Institute, The Second Xiangya Hospital, Central South University, China

Effect of nalbuphine on opiate withdrawal and changes in dopaminergic and serotoninergic expressions in rat brain
R. Raghav¹, R. Jain¹, T.S. Roy², A. Dhawan¹, P. Kumar². ¹National Drug Dependence Treatment Centre, All India Institute of Medical Sciences, India; ²Department of Anatomy, All India Institute of Medical Sciences, India

Abused drugs regulate dopamine release in the striatum throughout presynaptic nicotinic receptors
F.R. Rizzo, M. Federici, N.B. Mercuri. IRCCS Fondazione Santa Lucia and Università Tor Vergata, Italy

No association between crack cocaine addiction and COMT Val/Met polymorphism
T. Roman¹,², A.R. Stolf³, J.B. Schuch¹,², D. Müller¹,², G.C. Akutagava-Martins¹,², C.M. Szobot³,⁴, F. Pechansky¹, F.H.P. Pechansky1. 1Collaborating Center on Alcohol and Drugs, Center for Drug and Alcohol Research,
Hospital de Clínicas de Porto Alegre, Federal University of Rio Grande do Sul, Brazil; 2Center for Drug and Alcohol Research, Nova Southeastern University, United States

535 A stepped-wedge cluster randomized trial of behavioral interventions targeting amphetamine-type stimulant use and sexual risk among female entertainment and sex workers in Cambodia: Design of implementation science protocol
K. Page1, E.S. Stein2, A.W. Carrico3, J.L. Evans2, M. Sokunny4, E. Nil4, S. Ngak4, C.
Sophal5, C. McCulloch2, L. Maher6. 1Division of Epidemiology, Biostatistics and Preventive Medicine, Department of Internal Medicine, University of New Mexico Health Sciences Center, United States; 2Department of Epidemiology and Biostatistics, University of California, San Francisco, United States; 3Department of Community Health Systems, School of Nursing, University of California, San Francisco, United States; 4FHI360 Cambodia, Cambodia; 5Department of Mental Health and Substance Abuse, Ministry of Health, Cambodia; 6The Kirby Institute for Infection and Immunity, University of New South Wales, Australia

536 Codeine misuse/dependence: Best practice and future innovations in addressing risk, harm, and successful treatment
C.D.H. Parry1, M.C. van Hout2, I. Norman3. 1Alcohol, Tobacco, and Other Drug Research Unit, Medical Research Council, South Africa; 2School of Health Sciences, Waterford Institute of Technology, Ireland; 3Florence Nightingale Faculty of Nursing and Midwifery, Kings College London, United Kingdom

537 Validation of a purchase task for assessing the relative reinforcing efficacy of e-cigarettes
I. Pericot-Valverde, S. Fernández-Artamendi, A. González-Roz, C. López-Núñez, S.
Wiedberg, R. Secades-Villa. University of Oviedo, Spain

538 What does addiction mean? A qualitative study to assess patients’ understanding about addiction and its treatment
S. Prakash, R. Rao, P. Ramshankar, V. Krishnan, A. Ambekar, A. Dhawan. National Drug Dependence Treatment Centre, All India Institute of Medical Sciences, India
Retention and drop out of opioid substitution therapy program due to drug diversion in Ukraine
T. Prokhorova, V.P. Kolomiets. ICF Alliance for Public Health, Ukraine

Detoxification unit within a residential substance abuse treatment facility: A gateway to better outcomes?
S. Rabinovitz. School of Criminology, Unit for Excellence in Research & Study of Addiction, University of Haifa, Israel

Quality of life in patients attending substance abuse treatment: A study in Songkhla Province, Thailand
P. Rattanakornpreeda, S. Paileeklee. Khon Kaen University, Thailand

Preliminary findings: Suicidal ideation among crack cocaine-dependent patients receiving treatment in São Paulo, Brazil’s “Crackland” and its association with HIV/STD
A. Ribeiro1,2, C. Madruga2,3, A. Miguel2,3, S. McPherson4, M. Ribeiro1,2. 1Reference Centre of Drug Addiction Treatment, Brazil; 2Federal University of São Paulo, Brazil; 3National Institute of Alcohol and Drug Policies, Brazil; 4Washington State University, United States

Substance use: Recruitment and control tools for forced entry into sex work in two U.S.–Mexico border cities

Linking infectious and narcology care: A strengths-based case management intervention to link HIV-infected people who inject drugs in Russia to HIV care: Randomized controlled trial results
J.H. Samet1,2, E. Blokhina3, D.M. Cheng1, A.Y. Walley1,2, D. Liozov3, C.E. Chaisson1, C. Bridden2, E. Quinn1, N. Gnatenko2, O. Toussova3, A. Gifford1, E. Krupitsky3, A. Raj4. 1Boston University, United States; 2Boston Medical Center, United States; 3First St. Petersburg Pavlov State Medical University, Russia; 4University of California, San Diego, United States

A retrospective chart review of treatment completers versus noncompleters among those seeking in-patient treatment at a tertiary care drug dependence treatment center
S. Sarkar, Y.P.S. Balhara, N. Gautam, J. Singh. Department of Psychiatry, National Drug Dependence Treatment Centre, All India Institute of Medical Sciences, India

Improvement in the treatment of substance use disorders through adopting evidence-based practices in Pakistan
U. Shamim. Hubert H. Humphrey Fellowship Program, Virginia Commonwealth University, United States

Gender differences among Russian addicts in their attitude toward long-term nonmedical treatment
E. Smirnova1, B. Lobodov1, L. Rod2. 1Medical Center “Semya,” Russia; 2Voronezh State Regional Narcological Dispensary, Russia

The percentage of patients on high methadone doses in Ho Chi Minh City and related factors

Acute tryptophan depletion response in cocaine-dependent subjects with comorbid depression
M. Torrens1,2,3, J.I. Mestre-Pintó1, C. Pérez-Mañá1,3, E. Papaseit1,3, F. Fonseca1,2,3, M. Farre1,3,4. 1Institut Hospital del Mar d’Investigacions Mèdiques, Spain; 2Institut de Neuropsiquiatria i Addiccions, Spain; 3Universidad Autónoma de Barcelona, Spain; 4Hospital Universitari Germans Trias i Pujol-IGTP, Spain
550  Antiretroviral therapy initiation and adherence in people who inject drugs: Community-based approach
   A. Tyshkevych, O. Denisiuk, P. Smyrnov. ICF Alliance for Public Health, Ukraine

551  Initial results of integrated antiretroviral and methadone treatment in District Preventive Medicine Centers in Ho Chi Minh City, 2013–2015

552  Fatal overdose in recently detoxified HIV-infected individuals who inject drugs in St. Petersburg, Russia: Role of Naltrexone
   T. Yaroslavtseva¹, E. Blokhina¹, E. Krupitsky¹,², D.M. Cheng³, N. Gnatienko⁴, A.Y. Walley³, E. Verbitskaya¹, E. Zvartau¹, S. Poole⁵, R. Gross⁵, G. Woody⁵, J.H. Samet³,⁴. ¹First Pavlov State Medical University of St. Petersburg, Russia; ²Bekhterev Research Psychoneurological Institute, Russia; ³Boston University, United States; ⁴Boston Medical Center, United States; ⁵University of Pennsylvania, United States

Please be advised that no photographing of presentations or data is permitted.
Badges must be worn at all times and are required for admission into all events and sessions.
Policy Forum  
Fiesta 6/8  
8:00 - 10:00 AM

Chairs: Martin Y. Iguchi

8:00 Friends of NIDA  
Martin Y. Iguchi

8:10 Update from Capitol Hill: Implications for NIH/NIDA funding  
Ed Long, Van Scoyoc Associates, Washington, DC

8:40 Integrated care: Is 42 CFR Part 2 a barrier or a necessity?  
Westley Clark, Santa Clara University Public Health Program, Santa Clara, CA

9:06 Integrated care: Is 42 CFR Part 2 a barrier or a necessity?  
Gavin Bart, Division of Addiction Medicine Hennepin County Medical Center, Minneapolis, MN

9:32 Integrated care: Is 42 CFR Part 2 a barrier or a necessity?  
Dennis McCarty, OHSU/PSU School of Public Health, Oregon Health & Science University, Portland, OR

Symposium VII  
Fiesta 10/14  
10:15 - 12:15 PM

5HT2A AND 5HT2C LIGANDS AS POTENTIAL THERAPEUTICS FOR SUBSTANCE USE DISORDERS

Chairs: Jane B. Acri and Leonard Howell

10:15 Behavioral effects of lorcaserin in rhesus monkeys: Interactions with stimulant drugs  
C. P. France, Dept. of Pharmacology, University of Texas Health Science Center, San Antonio, TX

10:40 Effects of pimavanserin and lorcaserin on drug vs. food choice in rhesus monkeys  
Matt Banks, Dept. of Pharmacology and Toxicology, Virginia Commonwealth University, Richmond, VA

11:05 Effects of 5-HT2C receptor agonist lorcaserin on THC self-administration and reinstatement of THC-seeking in squirrel monkeys  
Zuzana Justinova, Preclinical Pharmacology Section, National Institute on Drug Abuse, IRP, NIH, Baltimore, MD

11:25 Modification of the abuse-related effects of cocaine by serotoninergic ligands  
Jack Bergman, McLean Hospital, Harvard Medical School, Belmont, MA

11:50 DISCUSSANT: Targeted 5HT2A/C pharmacotherapy for drug addiction  
Leonard Howell, Yerkes National Primate Research Center, Emory University, Atlanta, GA
Symposium VIII  
NEONATAL ABSTINENCE SYNDROME: CONTEXT AND CONSEQUENCES IN 2016  

10:15 Neonatal abstinence syndrome: How it has been used to drive policies against women using substances during pregnancy  
Hendree E Jones, University of North Carolina School of Medicine, Chapel Hill, NC  

10:45 Understanding factors that exacerbate or mitigate severity and duration of neonatal abstinence syndrome  
Karol Kaltenbach, Emeritus Professor of Pediatrics, Sidney Kimmel Medical College at Thomas Jefferson University, Moorestown, NJ  

11:15 The assessment and treatment of neonatal abstinence syndrome: What do we know?  
Sarah Hughes Heil, University of Vermont, Burlington, VT  

11:45 DISCUSSANT: Neonatal abstinence syndrome in context: Science, family, and society  
Mishka Terplan, Behavioral Health System, Baltimore, MD  

Oral Communications 7  
GATTACA: GENOTYPE/PHENOTYPE  

10:15 Extinction and reinstatement of cocaine-reinforced behavior in rat lines selected for low and high levels of intravenous drug self-administration  
K. Grasing, H. Xu, Kansas City VA Medical Center, Kansas City, MO  

10:30 Adrenoceptor variants moderate treatment response of doxazosin for cocaine use disorder  
D. A. Nielsen², D. Shorter³, C. Domingo³, M. H. Harding³, E. M. Nielsen², T. Kosten¹, ¹Psychiatry, Baylor, Houston, TX, ³Psychiatry and Behavioral Science, Baylor College of Medicine, Houston, TX  

10:45 Composition of the N-methyl-D-aspartate receptor protein complex in the medial prefrontal cortex associates with individual differences in motor impulsivity  
C. A. Krebs, N. C. Anastasio, UTMB Galveston, Galveston, TX  

11:00 Recent cocaine use behavior differs by GLTI genotype: A pilot study  
M. Greenwald¹, E. A. Woodcock¹, L. H. Lundahl¹, M. Burmeister³, ¹Psychiatry and Behavioral Neurosciences, Wayne State University School of Medicine, Detroit, MI, ³Psychiatry and Human Genetics, University of Michigan, Ann Arbor, MI  

11:15 Targeted over-expression of brain-derived neurotrophic factor in the nucleus accumbens increases goal tracking and nicotine locomotor sensitization, but reduces nicotine self-administration in rats  
R. W. Brown², L. A. Beuttel¹, S. A. Dean¹, C. A. Bradley¹, J. Wherry², S. Kirby¹, M. I. Palmatier¹, M. Zhu², ¹Psychology, East Tennessee State University, Johnson City, TN, ²Biomedical Sciences, East Tennessee State University, Johnson City, TN
11:30  **GABBR2 gene variants affect cigarette smoking pattern in alcohol-dependent individuals: A genetic association study**  
M. Farokhnia¹, M. Schwandt², C. Hodgkinson¹, L. Leggio¹, ¹Section on Clinical Psychoneuroendocrinology and Neuropsychopharmacology, NIAAA and NIDA, NIH, Bethesda, MD, ²Laboratory of Clinical and Translational Studies, NIAAA, NIH, Bethesda, MD, ³Laboratory of Neurogenetics, NIAAA, NIH, Rockville, MD

11:45  **Cannabinoid receptor gene polymorphism (rs2023239) associated with demand for marijuana**  
E. R. Aston¹, V. Knopik³,⁴, J. McGeary²,³,⁴, J. MacKillop⁵,¹, J. Metrik²,¹, ¹Center for Alcohol and Addiction Studies, Brown University School of Public Health, Providence, RI, ²Providence Veterans Affairs Medical Center, Providence, RI, ³Division of Behavioral Genetics, Department of Psychiatry, Rhode Island Hospital, Providence, RI, ⁴Department of Psychiatry and Human Behavior, Alpert Medical School, Brown University, Providence, RI, ⁵Peter Boris Centre for Addictions Research, McMaster University, Hamilton, ON, Canada

**Oral Communications 8**  
**Fiesta 12**  
**10:15 - 12:15 PM**  

**ALTERED STATES: ABUSE LIABILITY**

Chairs: Ziva D. Cooper and Michelle Baladi

10:15  **The experimental tobacco marketplace II: Substitutability in dual e-cigarette and cigarette users**  
A. Quisenberry, M. N. Koffarnus, A. Bianco, E. Perry, W. K. Bickel, Addiction Recovery Research Center, Virginia Tech Carilion Research Institute, Roanoke, VA

10:30  **Validity of the modified cigarette evaluation questionnaire in predicting the reinforcing effects of cigarettes that vary in nicotine content under double-blind conditions**  
C. A. Arger⁴, S. H. Heil⁴, S. C. Simgon⁴, J. W. Tidey⁴, M. Stitzer⁴, D. Gaalema¹, M. Desarno¹, H. Durand⁴, E. Ruggieri⁴, S. T. Higgins⁴, ¹University of Vermont, Burlington, VT, ³Psychiatry, Brown, Providence, RI, ³Psychiatry, University of Vermont, Burlington, VT

10:45  **3,4-Methylenedioxypyrovalerone maintains differential patterns of responding in male Sprague-Dawley rats**  
G. T. Collins¹,², B. M. Gannon¹, K. Rice³, ¹Pharmacology, University of Texas Health Science Center at San Antonio, San Antonio, TX, ²South Texas Veterans Health Care System, San Antonio, TX, ³Chemical Biology Research Branch, NIDA/NIAAA, Bethesda, MD

11:00  **Evaluation of the effects of JZP-110 in nonclinical models of abuse liability**  
M. Baladi², L. P. Carter²,³, J. Black², J. Bergman¹, ¹McLean Hospital/Harvard Medical School, Belmont, MA, ²Jazz Pharmaceuticals, Palo Alto, CA, ³University of Arkansas for Medical Sciences, Little Rock, AR

11:15  **Assessment of the abuse potential of ABT-126, an α7-selective nicotinic agonist**  
T. J. Hudzik, Preclinical Safety, AbbVie, North Chicago, IL

11:30  **Opioid modulation of cannabis-induced analgesia and subjective effects in cannabis smokers**  
Z. D. Cooper, S. D. Comer, M. Haney, Psychiatry, Columbia University and NYSPI, New York, NY
11:45 Analgesia and abuse liability of high-dose intravenous opioids in patients on methadone or buprenorphine
   D. A. Tompkins¹, M. T. Smith¹, R. R. Edwards², G. Bigelow¹, E. C. Strain¹, ¹Johns Hopkins University, Baltimore, MD, ²Harvard Medical School, Boston, MA

12:00 No evidence of increased abuse potential of CL-108, a bilayered tablet containing hydrocodone/acetaminophen/promethazine, in recreational opioid users
   N. Levy-Cooperman¹, M. Shram¹, L. R. Webster², ¹Altreos Research Partners, Toronto, ON, Canada, ²PRA, Salt Lake City, UT

Poster Session II
(Lunch) 12:15 - 2:15 PM
Odd-numbered posters manned first hour;
Even-numbered, second hour

Set-up time begins Monday, 3 PM
Must be removed by Tuesday 2:30 PM

MARIJUANA & CANNABINOID: HUMAN STUDIES

1 Timing of sexual abuse, sexual risk behaviors and substance use among U.S. women
   M. Cook. “Moved to Poster Session IV, #04 on Thursday”

2 Ethical issues in using text message assessments for sensitive behaviors: A prospective study of young adults’ drug use and risky sexual behaviors
   E. E. Bonar¹, G. P. Koocher¹, R. Cunningham², R. L. Collins³, J. A. Cranford¹, M. Walton², ¹University of Michigan, Ann Arbor, MI, ²Psychiatry, University of Michigan, Ann Arbor, MI, ³DePaul University, Chicago, IL

3 Examining problematic marijuana use among marijuana-using young adults
   C. F. Wong¹, E. Iverson¹, S. E. Lankenau², ¹Children’s Hospital Los Angeles/USC, Los Angeles, CA, ²Community Health and Prevention, Drexel University, Philadelphia, PA

4 Properties of the marijuana motives questionnaire among medical cannabis patients
   K. Bohnert²¹, M. Ilgen²¹, ¹Psychiatry, University of Michigan, Ann Arbor, MI, ²VA Center for Clinical Management Research, Ann Arbor, MI

5 Linking animal models to human self-administration practices among medical cannabis patients: A daily diary study
   S. P. Novak, N. Peiper, J. Wiley, Behavioral Epidemiology, RTI International, Research Triangle Park, NC

6 High impulsivity correlates with cannabis cue-induced craving in a non-treatment seeking cohort of heavy cannabis users
   G. Sahlem¹, N. Baker¹, R. J. Malcolm², A. McRae-Clark¹, ¹Psychiatry, Medical University of South Carolina, Charleston, SC, ²Psychiatry and Behavioral Sciences, Medical University of South Carolina, Charleston, SC

7 Craving and anxiety responses to laboratory stress for individuals seeking treatment for cannabis use disorder: A pilot study
   M. Olonoff², M. Pavlicova³, S. Evans², J. J. Mariani², J. Choi³, D. J. Brooks¹, A. Mahony³, F. R. Levin², ¹Substance Abuse, NYSPI, New York, NY, ²Columbia University, New York State Psychiatric Institute, New York, NY, ³Columbia University, New York, NY
8 Responses to social stress in regular cannabis smokers
   J. Xia, D. N. Patel, G. Bedi, Psychiatry, Columbia University and NYSPI, New York, NY

9 Single administration of oxytocin attenuates craving to smoke cannabis
   K. J. Hartwell1,2, N. Baker1, J. R. Walker1, A. McRae-Clark1, 1MUSC, Charleston, SC,
   2Ralph H Johnson VAMC, Charleston, SC

10 A dynamic causal modeling study of the reward system in marijuana users
   L. Ma1,2, J. Steinberg1,3, J. Bjork1,3, L. Keyser-Marcus1,3, J. Vassileva1,3, S. Ferré4, F. Moeller1,3,
   1Institute for Drug and Alcohol Studies, Virginia Commonwealth University, Richmond, VA,
   2Department of Radiology, Virginia Commonwealth University, Richmond, VA, 3Department
   of Psychiatry, Virginia Commonwealth University, Richmond, VA, 4Integrative Neurobiology
   Section, National Institute on Drug Abuse, Intramural Research Program, National Institutes
   of Health, Baltimore, MD

11 Chronic cannabis use is associated with impaired discrimination of threat and safety cues in
   Pavlovian conditioning
   S. Papini4, L. Ruglass2, T. Lopez-Castro2, J. Smits4, A. Campbell3, D. Hien1, 1Psychology,
   Adelphi University, NY, NY, 2Psychology, The City College of New York, New York, NY,
   3Psychiatry, Columbia University Medical Center, New York, NY, 4Psychology,
   The University of Texas at Austin, Austin, TX

12 Efforts to diversity research populations can pay dividends
   C. W. Striley, E. Kwiatkowski, L. Cottler, Epidemiology, University of Florida,
   Gainesville, FL

SEX/GENDER DIFFERENCES

13 Sex differences on cortical brain morphometry and behaviors in adolescent marijuana users
   V. Douet, L. Chang, B. Stoytcheva, T. Ernst, T. PING Consortium, Department of Medicine,
   University of Hawaii, John A. Burns School of Medicine, Honolulu, HI

14 Are gender differences in the prevalence of past-year marijuana use and risk perception in the
   U.S. narrowing from 2002-2013?
   P. M. Mauro, D. Hasin, Columbia University, New York, NY

15 Gender differences in the effect of childhood adversity on alcohol, drug, and poly-substance use
   disorders
   E. Evans1,2, D. Upchurch1, C. E. Grella2, 1Fielding School of Public Health, UCLA,
   Los Angeles, CA, 2UCLA Integrated Substance Abuse Programs, University of California,
   Los Angeles, CA

16 Gender differences in the effects of concurrent drug use on the risk of heroin relapse
   A. L. Moskowitz1,2, C. E. Grella2, 1Psychology, UCLA, Los Angeles, CA, 2Integrated
   Substance Abuse Programs, UCLA, Los Angeles, CA

17 Gender differences in remission from alcohol and marijuana dependence in college students
   B. A. Bugbee1, K. M. Caldeira1, K. E. O’Grady2, K. B. Vincent1, A. M. Arria1, 1University of
   Maryland School of Public Health, College Park, MD, 2Psychology, University of Maryland,
   College Park, MD

18 Heavy episodic drinking and weight control behavior among college students: Does gender
   matter?
   R. L. Peralta1, P. B. Barr2, 1Department of Sociology, The University of Akron, Akron, OH,
   2Department of Psychology and African American Studies, Virginia Commonwealth
   University, Richmond, VA
19 Barriers to long-acting reversible contraceptive use among opioid-maintained women
A. K. Matusiewicz, H. S. Melbostad, S. H. Heil, Department of Psychiatry, University of Vermont, Burlington, VT

20 Health characteristics and sexual risk behaviors among young adult prescription opioid misusers in the club scene: Examining the role of gender
M. A. Levi Minzi, M. E. Buttram, S. P. Kurtz, ARSH: Center for Research on Substance Use and Health Disparities, Nova Southeastern University, Miami, FL

21 What's in Your medicine cabinet?: Gender differences
L. Cottler, E. Kwiatkowski, C. W. Striley, Epidemiology, University of Florida, Gainesville, FL

22 Male-female differences in making a rapid transition from first heroin use to onset of heroin dependence: United States, 2005-2013
O. J. Santiago Rivera, J. C. Anthony, Epidemiology and Biostatistics, Michigan State University, East Lansing, MI

23 Gender differences among PWID with regard to HIV transmission risk in St. Petersburg, Russia
N. Gnatienko5, J. Tsui2, J. A. Wagman3, D. M. Cheng4, A. Raj3, E. Blokhina1, O. Toussova1, L. Forman4, D. Lioznov1, J. H. Samet4, 5First Pavlov State Medical University of St. Petersburg, St. Petersburg, Russian Federation, 2University of Washington, Seattle, WA, 3University of California, San Diego, CA, 4Boston University, Boston, MA, 5Boston Medical Center, Boston, MA

24 Working memory is impaired for both male and female HIV+ substance users
E. Martin2, R. Gonzalez1, J. Vassileva4, P. Maki3, L. Rubin3, D. Hardy5, 1Psychology, Florida International University, Miami, FL, 2Psychiatry, Rush University Medical Center, Chicago, IL, 3Psychiatry, University of Illinois, Chicago, IL, 4Psychiatry, Virginia Commonwealth University, Richmond, VA, 5Psychology, Loyola Marymount University, Los Angeles, CA

25 Sexual violence among patients with substance use disorders in FQHCs
C. W. Bone2, R. Andersen3, M. Vahidi1, L. Gelberg1,3, 1Family Medicine, UCLA, Woodland Hills, CA, 2Internal Medicine, Yale, New Haven, CT, 3UCLA School of Public Health, Los Angeles, CA

26 Predictors of Internet-delivered drug treatment outcomes and acceptability among women
T. Saraiya1, A. Campbell2, M. Hu2, 1Adelphi University, New York, NY, 2Dept of Psychiatry, Columbia University, New York, NY

27 Gender and racial/ethnic differences in referral sources for SUD treatment among adolescents and young adults in California (2009-2014)
J. Lim, D. Urada, UCLA Integrated Substance Abuse Programs, Los Angeles, CA

28 WITHDRAWN

29 “Sex and the new Kandel-Kandel nicotine gateway evidence”: Initial stepping-stones
F. A. Wagner1,3, K. C. Alcover1, O. A. Vsevolozhskaya2, J. C. Anthony3, 1PSRC, Morgan State University, Baltimore, MD, 2Biostatistics, University of Kentucky, Lexington, KY, 3Department of Epidemiology and Biostatistics, Michigan State University, East Lansing, MI
Mentholated cigarette use among African American women and men: What’s blunt smoking got to do with it
L. Montgomery, Counseling/Substance Abuse Counseling, University of Cincinnati, Cincinnati, OH

Gender discrimination, educational attainment, and illicit drug use among U.S. women
H. Carliner1, A. Sarvet2, A. R. Gordon3, D. S. Hasin1,2, 1Epidemiology, Columbia University, New York, NY, 2New York State Psychiatric Institute, New York, NY, 3Pediatrics, Harvard Medical School, Boston, MA

Social ties and substance use among reserve soldiers in single and dual military households

**Symposium IX**

**Fiesta 6/8**

**TRANSLATIONAL MARKERS OF SUBSTANCE USE VULNERABILITY: RECEPTORS, RISK-PROCESSING, AND PSYCHOPATHOLOGY**

**Chairs:** Noelle C. Anastasio and Thomas J. Crowley

**2:15 Interrogations into the neuromolecular underpinnings of inherent impulsivity in rodents**
Noelle C Anastasio, University of Texas Medical Branch at Galveston, Galveston, TX

**2:35 Brain-driven vulnerability to substance use disorders: Do brains make drug abusers?**
Thomas J Crowley, University of Colorado School of Medicine, Aurora, CO

**2:55 Interventions targeting endophenotypes of risk for addiction**
Patricia Conrod, University of Montreal, Catherine Montreal, QC, Canada

**Symposium X**

**Fiesta 10/14**

**IMAGING THE MALE & FEMALE ADDICTED BRAIN: STRUCTURAL AND FUNCTIONAL DIFFERENCES AND IMPLICATIONS FOR PRECISION MEDICINE**

**Chairs:** Cora Lee Wetherington and Will Aklin

**2:15 Brain structure and function in female compared to male stimulant users with long-term abstinence**
Jody Tanabe, University of Colorado Denver School of Medicine, Aurora, CO

**2:35 Imaging the dopamine signature in tobacco smokers**
Kelly Cosgrove, Yale University, New Haven, CT

**2:55 Functional brain connectivity in addictions: The impact of sex and early trauma**
Kathleen T. Brady, Medical University of South Carolina, Charleston, SC
Oral Communications 9

SON OF FLUBBER: CHEMISTRY

Chairs: Jun Zhu and Linda Dwoskin

2:15 Tyrosine470 and 88 of human dopamine transporter are responsible for the allosteric modulatory effect of SRI-30827, SRI-20041 and HIV-1 Tat protein on dopamine transporter

J. Zhu, W. Sun, S. Ananthan, C. Zhan, Drug Discovery and Biomedical Sciences, South Carolina College of Pharmacy, University of South Carolina, Columbia, SC, Drug Discovery and Biomedical Sciences, University of South Carolina, Columbia, SC, Organic Chemistry, Southern Research Institute, Birmingham, AL

2:30 Oral JPC-077, a vesicular monoamine transporter-2 inhibitor, reduces methamphetamine self-administration across repeated treatments

A. Wilson, N. Lee, J. R. Nickell, J. P. Culver, V. Janganati, G. Zheng, P. A. Crooks, L. P. Dwoskin, M. T. Bardo, Pharmaceutical Sciences, University of Kentucky, Lexington, KY, Psychology, University of Kentucky, Lexington, KY, University of Arkansas for Medical Sciences, Little Rock, AR

2:45 Stereoselective differences in the reinforcing effects of “bath salts” constituent 3,4-methylenedioxypyrovalerone under a progressive ratio schedule of reinforcement in rats

B. M. Gannon, K. Galindo, K. Rice, G. T. Collins, Pharmacology, University of Texas Health Science Center at San Antonio, San Antonio, TX, Chemical Biology Research Branch, NIDA and NIAAA, Bethesda, MD, South Texas Veterans Health Care System, San Antonio, TX

3:00 Investigation of the κ-opioid receptor agonist CR845 and reference comparator, butorphanol, in rats trained to discriminate (-) pentazocine from saline

D. J. Heal, J. Gosden, N. Slater, R. H. Spencer, F. Menzaghi, Cara Therapeutics, Shelton, CT, RenaSci Ltd, Nottingham, United Kingdom

Oral Communications 10

SHAWSHANK REDEMPTION: CRIMINAL JUSTICE

Chairs: Carlos C. Mahaffey and David S. Festinger

2:15 Attitudes and practices on the use of extended-release naltrexone in criminal justice settings

D. S. Festinger, K. L. Dugosh, D. R. Gastfriend, C. Sierka, Law and Ethics, Treatment Research Institute, Philadelphia, PA, Treatment Research Institute, Philadelphia, PA

2:30 An evaluation of opioid substitution treatment in prison on risk of mortality in period immediately after prison: Does leaving prison on OST reduce the risk of death?

G. Stillwell, H. Jones, J. Shaw, M. Farrell, J. Marsden, National Addiction Centre, Institute of Psychiatry, Kings College London, London, United Kingdom, School of Social and Community Medicine, University of Bristol, Bristol, United Kingdom, Institute of Brain, Behaviour and Mental Health, University of Manchester, Manchester, United Kingdom, National Drug and Alcohol Research Centre, University of New South Wales, Sydney, NSW, Australia

2:45 Alcohol and cocaine use and drug distribution among formerly incarcerated black men

C. C. Mahaffey, D. Stevens-Watkins, C. Leukefeld, Spalding University, Louisville, KY, University of Kentucky, Lexington, KY, Behavioral Science, University of Kentucky, Lexington, KY
Tuesday, June 14, 2016

3:00  *The Silk Road Health Project: The intersection between criminal justice involvement, substance use and HIV risks among migrant and non-migrant workers in Almaty, Kazakhstan*

P. Marotta, N. El-Bassel, Columbia University, New York, NY

**Symposium XI**  
**Fiesta 6/8**  
**3:30 - 5:30 PM**

**NOT YOUR AVERAGE JOINT: ALTERNATIVE METHODS OF CANNABIS ADMINISTRATION**

Chairs: Adam Leventhal and Marcel Bonn-Miller

3:30  *Dose effects of oral cannabis administration*

Ryan Vandrey, Johns Hopkins University School of Medicine, Baltimore, MD

3:55  *Patterns of vaping cannabis among adolescent and adult cannabis users*

Dustin C. Lee, Geisel School of Medicine at Dartmouth, Lebanon, NH

4:20  *Routes of cannabis consumption as a function of clinical status*

Marcel O. Bonn-Miller, VA Palo Alto Health Care System & University of Pennsylvania, Menlo Park, CA

4:45  *Prevalence and correlates of cannabis vaping, smoking, and edible use among adolescents*

Adam Leventhal, University of Southern California Keck School of Medicine, Los Angeles, CA

5:10  *DISCUSSANT: Leveraging alternative methods of cannabis administration research to inform science, practice, and policy*

Alan J. Budney, Geisel School of Medicine at Dartmouth, Lebanon, NH

**Oral Communications 11**  
**Fiesta 4**  
**3:30 - 5:30 PM**

**DAYS OF WINE AND ROSES: ALCOHOL**

Chairs: Elise M. Weerts and Erica McGrath

3:30  *Regional- and sex-dependent effects of chronic ethanol and cocaine co-administration on adult neural stem cell survival and differentiation*

E. McGrath1,3,4, P. Wu3, K. A. Cunningham1, T. Dunn3, J. Gao3, A. C. Grant3, K. Dineley2, J. Allende-Labastida4, B. Kaphalia7, 1Center for Addiction Research, University of Texas Medical Branch, Galveston, TX, 2Neurology, University of Texas Medical Branch, Galveston, TX, 3Neuroscience and Cell Biology, University of Texas Medical Branch, Galveston, TX, 4Institute for Translational Science, University of Texas Medical Branch, Galveston, TX, 5Cell Biology, University of Texas Medical Branch, Galveston, TX, 7Toxicology, University of Texas Medical Branch, Galveston, TX

3:45  *Comparison of the reinforcing efficacy of midazolam, ethanol, and mixtures of the two in male rats*

D. Townsend1, J. K. Rowlett1, D. Platt1, K. Freeman1, 1University of Mississippi Medical Center, Jackson, MS, 2Comparative Pathology, Tulane National Primate Research Center, Covington, LA

4:00  *Naltrexone reduces appetitive and consummatory responses to alcohol in a sex-dependent manner in rats*

S. J. Nieto, K. J. Winoske, T. A. Kosten, Psychology, University of Houston, Houston, TX
4:15  The peroxisome proliferator-activated receptor alpha agonist fenofibrate attenuates alcohol self-administration in rats
C. N. Haile1,2,3, T. A. Kosten1,2,3, 1Psychiatry, Baylor College of Medicine, Houston, TX, 2Psychology & TIMES, University of Houston, Houston, TX, 3Michael E. DeBakey VA Medical Center, Houston, TX

4:30  Reduction of alcohol self-administration by 3-ISO-PBC
E. M. Weerts1, V.V.N.P.B. Tiruveedhulaand2, J. M. Cook2, 1Psychiatry and Behavioral Sciences, Johns Hopkins University, Baltimore, MD, 2Department of Chemistry & Biochemistry, University of Wisconsin Milwaukee, Milwaukee, WI

4:45  Inhibitory processing predicts increases in binge-drinking behavior: A six-month longitudinal design
A. L. Paz2, J. Conniff1, D. Ferrato1, R. Gonzalez3, M. Rosselli1, 1Florida Atlantic University, Davie, FL, 2Neuropsychology, Florida Atlantic University, Miami, FL, 3Florida International University, Miami, FL

5:00  Rates of homelessness and factors that predict them among homeless, alcohol-dependent adults in a therapeutic workplace clinical trial
A. Holtyn1, E. Carlson1, B. Jarvis2, M. Fingerhood1, K. Silverman2, 1Johns Hopkins, Baltimore, MD, 2Johns Hopkins University School of Medicine, Baltimore, MD

5:15  Treatment for alcohol use disorders in seriously mentally ill adults using the ethyl glucuronide biomarker
M. G. McDonell1, E. Leickly1, S. McPherson1, D. Srebnik2, J. M. Roll1, R. Ries2, J. Skalisky1, 1Washington State University, Spokane, WA, 2University of Washington, Seattle, WA

Oral Communications 12

DUE DATE: PERINATAL DRUG ABUSE

Chairs: Loretta Finnegan and Qiana Brown

3:30  Cannabis use during pregnancy for the United States, 2005-2013
O. Alshaarawy1,2, J. C. Anthony1, 1Epidemiology and Biostatistics, Michigan State University, East Lansing, MI, 2Epidemiology and Biostatistics, Indiana University, Bloomington, IN

3:45  Trends in marijuana use among reproductive age women: 2002-2013
Q. Brown1, D. Shmulewitz1,2, S. S. Martins1, D. Hasin1,2, 1Columbia University, New York, NY, 2New York State Psychiatric Institute, New York, NY

4:00  Marijuana doesn’t count: Is objective screening in obstetrics clinics needed to identify and assist pregnant marijuana users?
T. Northrup1, M. R. Klawans1, Y. Villarreal1, P. Berens2, A. Stotts1, 1Family and Community Medicine, University of Texas Health Science Center at Houston, Houston, TX, 2OB/GYN, University of Texas Health Science Center at Houston, Houston, TX

4:15  Prevalence of prenatal cigarette smoking and marijuana use in North Delaware State
Y. Washio, R. Butler, N. D. Goldstein, M. K. Hoffman, Christiana Care Health Services, Newark, DE
Microstructural brain development in infants with prenatal stimulant exposure during first three months of age
L. Chang¹, K. Oishi², J. Skranes³, S. Buchthal¹, E. Cunningham¹, C. Jiang¹, D. Alicata¹, R. Yamakawa¹, S. Hayama¹, T. Ernst¹, ¹University of Hawaii, John A. Burns School of Medicine, Honolulu, HI, ²Johns Hopkins Medicine, Baltimore, MD, ³Norwegian University Science and Technology, Tronheim, Norway

Bupropion therapy during pregnancy: Concentrations of the drug and its major metabolites in umbilical cord plasma and amniotic fluid
V. M. Fokina¹, H. West¹, C. Oncken², S. Clark¹, M. S. Ahmed¹, G. Hankins¹, T. Nanovskaya¹, ¹OB/GYN Maternal Fetal Medicine, University of Texas Medical Branch, Galveston, TX, ²University of Connecticut Health Center, Farmington, CT

Benzodiazepine and other illicit drug use during methadone-maintained pregnancies: 2002-2011
D. J. Hand, K. Kaltenbach, V. Short, D. J. Abatemarco, Pediatrics, Thomas Jefferson University, Philadelphia, PA

WITHDRAWN - Factors associated with cocaine use in pregnancy
R. M. Nagarajan, X. Cai, C. Hine, B. Merry, K. A. Yonkers, Psychiatry, Yale University, New Haven, CT

Oral Communications 13

MISERY: PAIN

3:30 Pain as a predictor and consequence of tobacco withdrawal among African-American smokers
J. F. McBeth¹, J. Ditre², M. Kirkpatrick¹, L. Ray³, A. Leventhal⁴, ¹Preventive Medicine, University of Southern California, Camarillo, CA, ²Psychology, Syracuse University, Syracuse, NY, ³Psychology, University of California Los Angeles, Los Angeles, CA, ⁴Preventive Medicine, University of Southern California, Los Angeles, CA

Marijuana use in adults with sickle cell disease
A. Forray², J. Bozzo³, J. Cole³, J. Spodick³, J. D. Roberts¹, ¹Yale School of Medicine, New Haven, CT, ²Psychiatry, Yale School of Medicine, New Haven, CT, ³Yale-New Haven Hospital, New Haven, CT

Healed injury sites can hurt again during opioid withdrawal: A descriptive case series
L. M. Rieb²,¹, W. Norman², R. Martin³, J. Berkowitz²,⁴, E. Wood¹,⁵, M. Miloy¹,⁵, ¹BC Centre for Excellence in HIV/AIDS, Vancouver, BC, Canada, ²Family Practice, University of British Columbia, Vancouver, BC, Canada, ³School of Population and Public Health, University of British Columbia, Vancouver, BC, Canada, ⁴Sauder School of Business, UBC, Vancouver, BC, Canada, ⁵Medicine, UBC, Vancouver, BC, Canada

Rates and correlates of specialized pain clinic use nationally in the Veterans Health Administration
C. A. Arout², M. Sofuoglu¹,³, R. A. Rosenheck²,³, ¹Psychiatry, Yale University, West Haven, CT, ²Psychiatry, Yale University School of Medicine, New Rochelle, NY, ³Mental Illness Research, Education, and Clinical Center, Veterans Health Administration, West Haven, CT
Oral Communications 14  
Fiesta 10/14  
4:45 - 5:45 PM  

CLEAN AND SOBER: WITHDRAWAL  
Chairs: Scott E. Lukas and Meg Haney  

4:45  Parallel changes in brain GABA levels, sleep and mood state during acute cocaine withdrawal: Predictors of “readiness for treatment”?  
S. E. Lukas2, C. Zuo2, N. Dias1, A. Janes2, J. Betts1, W. Tartarini1, M. L. Copersino2, D. Penetar2, 1McLean Hospital/Harvard Medical School, Belmont, MA, 2Psychiatry, McLean Hospital/Harvard Medical School, Belmont, MA  

5:00  Nicotine withdrawal induces negative correlation in resting connectivity between insula and executive control networks in smokers  
A. L. Matous, J. Fedota, K. Slater, B. Salmeron, H. Gu, T. Ross, E. Stein, NIDA-IRP, Baltimore, MD  

5:15  Premenstrual symptom severity and tobacco withdrawal, craving, and mood after overnight tobacco abstinence  
R. Pang1, A. Leventhal2, 1University of Southern California, Los Angeles, CA, 2Preventive Medicine, University of Southern California, Los Angeles, CA  

5:30  Effects of zolpidem alone and in combination with nabilone on cannabis withdrawal and relapse among non-treatment-seeking cannabis users  
E. S. Herrmann, Z. Cooper, G. Bedi, D. Ramesh, S. C. Reed, S. D. Comer, R. Foltin, M. Haney, New York State Psychiatric Institute, New York, NY  

Film Night  
CAPRA  
7:00 - 9:00 PM  

THE HUNGRY HEART  
A documentary about prescription drug abuse  
Produced and directed by Bess O’Brien  

MIT- Town Hall  
Fiesta 4  
5:45 - 6:45 PM  

Workshop X  
Fiesta 12  
7:00 - 9:00 PM  

RESEARCH AND EMERGING STRATEGIES FOR PARENTS OF SUBSTANCE INVOLVED ADOLESCENTS AND YOUTH: RESULTS FROM NIDA’S PARENTS’ TRANSLATIONAL RESEARCH CENTER  
Chairs: Kimberly C. Kirby and Elena Bresani  

Addressing adolescent substance use: Parental perspectives  
Brenda L Curtis, Department of Psychiatry, University of Pennsylvania School of Medicine, Philadelphia, PA  

Quality indicators for adolescent SAT: The consumer guide to adolescent treatment  
Kathleen Meyers, Treatment Research Institute, Philadelphia, PA
Adolescent treatment for substance abuse: What goes on outside of specialty treatment?
Mary Tabit, Treatment Research Institute, Philadelphia, PA

Community reinforcement and family training (CRAFT) for parents: Efficacy and online training program
Kimberly C Kirby, Departments of Psychology and Biomedical Sciences, Rowan University, Glassboro, NJ

Discussant: Making sense of needs and quality treatment
David R Gastfriend, American Society of Addiction Medicine, Newtown Center, ME

Workshop XI
Fiesta 10/14
7:00 - 9:00 PM

ANNUAL CPDD DESIGN AND ANALYSIS WORKSHOP
Chairs: Sterling M. McPherson and Susan K. Mikulich-Gilbertson

Potential peril lurking in substance variables that are ratios
Susan Kay Mikulich-Gilbertson, University of Colorado Anschutz Medical Center, Aurora, CO

Testing invariance of growth models to examine gender differences in substance use outcomes from clinical trials
Celestina Barbosa-Leiker, Washington State University, College of Nursing, Spokane, WA

Issues in the measurement and analysis of health-related quality of life in populations with substance use disorders
Bohdan Nosyk, BC Centre for Excellence in HIV/AIDS, Vancouver BC, BC, Canada

An introduction to machine learning and potential uses in substance use research
Daniel J. Feaster, University of Miami Miller School of Medicine, Miami, FL

Toward precision addiction medicine: Applying machine learning techniques to predict and model treatment response on an individual level
Sean Luo, Columbia University, New York, NY

Workshop XII
Fiesta 4
7:00 - 9:00 PM

EDUCATION IN DRUG ABUSE
Chairs: Michael Kuhar and Jack Stein

Online degree programs
Robert Balster, Virginia Commonwealth University, Richmond, VA

Those amazing MOOCs
Michael Kuhar, Emory University, Atlanta, GA

Available knowledge: What should a physician/scientist in the 21st century know?
Bertha Madras, Harvard University, Belmont, ME

Discussant: Discovering NIDA’s research portfolio
Jack Stein, National Institute on Drug Abuse, Bethesda, MD
REGULATORY AND METHODOLOGICAL CONSIDERATIONS IN THE EVALUATION OF DRUG DEPENDENCE IN THE PRECLINICAL AND CLINICAL SETTING

Chairs: Beatrice Setnik and Michael Klein

Regulatory and methodological considerations in the assessment of drug dependence and withdrawal in humans
Alicja Lerner, Controlled Substances Staff, FDA, Silver Spring, MD

Untangling dependence, tolerance, and addiction – An examination of definitions and diagnostic criteria
Jack Henningfield, Pinney Associates, The Johns Hopkins School of Medicine, Bethesda, MD

An overview of preclinical models to assess physical and psychological dependence and their translation to the clinic
David John Heal, RenaSci, Ltd, BioCity, Nottingham, United Kingdom

Analyzing and interpreting adverse events related to withdrawal and dependence
Sian Ratcliffe, Pfizer Inc., Groton, CT

DISCUSSANT: Practical considerations for the assessment of drug dependence in animal, patient and healthy volunteer populations
Beatrice Setnik, INC Research, Raleigh, NC
Population Neuroscience  
Fiesta 6/8  
8:00 - 10:00 AM  

TOWARDS POPULATION NEUROSCIENCE  
Chairs: Carlos Blanco and A. Roger Little  

Priorities within the division of neuroscience and behavior: Overview and opportunities  
A. Roger Little, NIDA, Bethesda, MD  

Research priorities for epidemiology, services and prevention  
Carlos Blanco, NIDA, Bethesda, MD  

Animal Forum  
Fiesta 4  
8:00 - 10:00 AM  

STUDYING ADDICTION IN MALE AND FEMALE ANIMALS: TRANSLATION TO HUMANS  
Chairs: Marilyn E. Carroll and Mark S. Todtenkopf  

8:00 Sex influences on brain and body: An issue whose time has come  
Larry Cahill, UC Irvine, Irvine, CA  

9:00 Sex differences in behavioral dyscontrol, addiction and treatment: Translation from animals to humans  
John R. Smethells, University of Minnesota  

9:30 Power analysis for animal studies of sex differences in addiction  
Mark S Todtenkopf, Alkermes, Inc., Waltham, MA  

Symposium XII  
Fiesta 4  
10:15 - 12:15 PM  

MEDICINAL CHEMISTRY OF NOVEL KAPPA OPIOID RECEPTOR LIGANDS  
Chairs: F. I. Carroll and Thomas Prisinzano  

10:15 Small changes in macrocyclic tetrapeptide structure have significant impact on opioid activity in vivo  
Jane Aldrich, University of Florida, Gainesville, FL  

10:40 Development of neoclerodane-based drug abuse medication  
Thomas Prisinzano, University of Kansas, Lawrence, KS  

11:05 Biased kappa opioid receptor ligands: Chemistry, pharmacology, and physiology  
Jeff Aubé, University of North Carolina, Chapel Hill, NC  

11:30 New JDTic analogs as potential pharmacotherapies for treating substance abuse  
Ivy Carroll, Research Triangle Institute, Research Triangle Park, NC  

11:55 DISCUSSANT:  
Linda P Dwoskin, University of Kentucky, Lexington, KY
Wednesday, June 15, 2016

**Symposium XIII**

**BIO-BEHAVIORAL RESEARCH ON HIV AMONG PEOPLE WHO USE DRUGS**

Chairs: Christina S. Meade and Adam Carrico

10:15 *Bio-behavioral outcomes from the women’s health CoOp: The seek, test, treat and retain model in Pretoria, South Africa*
   Wendee Wechsberg, RTI International, Research Triangle Park, NC

10:40 *Prospects of ending the HIV epidemic among people who inject drugs in Haiphong, Vietnam*
   Don Des Jarlais, Icahn School of Medicine at Mount Sinai, New York, NY

11:05 *Impact of HIV infection and cocaine dependence on decision-making processes: Results from a functional neuroimaging study*
   Christina S Meade, Duke University, Durham, NC

11:30 *Optimizing biomedical approaches to HIV prevention with substance-using men who have sex with men*
   Adam Carrico, University of California San Francisco, San Francisco, CA

11:55 *DISCUSSANT: NIH and NIDA priorities for HIV/AIDS research*
   Shoshana Kahana, National Institute on Drug Abuse, Bethesda, MD

---

**Oral Communications 15**

**A BEAUTIFUL MIND: CO-MORBIDITIES**

Chairs: Marc Auriacombe and Cathryn Glanton Holzhauer

10:15 *How psychiatric comorbidity and mood states influence craving and substance use in daily life? An ecological momentary assessment study in patients with alcohol, tobacco, cannabis and heroin use disorders*
   F. Serre², M. Fatseas², J. Swendsen³, M. Auriacombe², ²Addiction Psychiatry (CNRS USR 3413), Universite Bordeaux, Bordeaux, France, ³CNRS UMR 5287 - INCIA, Univ. Bordeaux, Bordeaux, France

10:30 *Are greater consequences in polysubstance-using women related to anxiety?*
   C. Glanton Holzhauer¹, E. Wulfert², ¹Psychiatry, University of Massachusetts Medical School, Worcester, MA, ²Psychology, University at Albany, SUNY, Albany, NY

10:45 *Prevalence and correlates of hazardous alcohol use and co-occurring mental health problems in Nepal following the 2015 earthquakes*
   J. C. Kane¹, N. Luitel², M. J. Jordans³,⁴, B. A. Kohrt⁵, M. Greene¹, W. A. Tol¹,⁶, ¹Mental Health, Johns Hopkins Bloomberg School of Public Health, Baltimore, MD, ²Transcultural Psychosocial Organization, Kathmandu, Nepal, ³Research and Development, Healthnet TPO, Amsterdam, Netherlands, ⁴Centre for Global Mental Health, Institute of Psychiatry, Psychology and Neuroscience, Kings College, London, United Kingdom, ⁵Duke Global Health Institute, Duke University, Durham, NC, ⁶Peter C. Alderman Foundation, Bedford, NY
11:00 *1-Year post-treatment outcomes from a RCT of a behavioral activation treatment for substance use and depression*
K. A. Johnson, C. Seitz-Brown, K. Anderson, D. Degeorge, E. Blevins, S. B. Daughters, Department of Psychology and Neuroscience, University of North Carolina at Chapel Hill, Chapel Hill, NC

11:15 *Neuropharmacological investigation of withdrawal-induced inhibitory control deficits among smokers with ADHD*

11:30 *The prevalence of adult attention deficit/hyperactivity disorder among treatment-seeking problem gamblers*
L. Brandt1, G. Fischer1,2, 1Center for Public Health, Medical University of Vienna, Vienna, Austria, 2Department for Psychiatry and Psychotherapy, Medical University of Vienna, Vienna, Austria

11:45 *Internalizing symptoms and conduct problems: Redundant, incremental, or interactive risk factors for substance use during the first year of high school?*
R. Khoddam1, N. Jackson1, A. Leventhal2, 1Psychology, University of Southern California, Los Angeles, CA, 2Preventive Medicine, University of Southern California, Los Angeles, CA

12:00 *Anxiety and depression as predictors of long-term abstinence among stimulant-dependent outpatients in a clinical trial of concurrent smoking cessation and substance abuse treatment*
K. Sanchez1,2, 1School of Social Work, University of Texas at Arlington, Arlington, TX, 2Psychiatry, University of Texas Southwestern Medical Center, Dallas, TX

---

**Oral Communications 16**

THE SOCIAL NETWORK

Chairs: Warren K. Bickel and Deena Peyser

10:15 *The effects of social contact on “binge” cocaine self-administration*
A. M. Robinson3, R. Lacy1, J. C. Strickland2, C. P. Magee3, M. A. Smith1, 1Psychology, Franklin and Marshall, Lancaster, PA, 2University of Kentucky, Lexington, KY, 3Psychology, Davidson College, Davidson, NC

10:30 *Prosocial effects and neurotoxicity of (−)-3,4-methylenedioxymethamphetamine in mice*
D. Curry, A. Belkoff, L. Howell, Yerkes National Primate Research Center, Emory University, Atlanta, GA

10:45 *Social reinstatement: A rat model of peer-induced relapse*
V. G. Weiss2, J. R. Yates1, M. T. Bardo3, 1Experimental Psychology, University of Kentucky, Lexington, KY, 2Psychology, University of Kentucky, Lexington, KY, 3University of Kentucky, Lexington, KY

11:00 *Social facilitation of alcohol effects predicts self-reported progression of use in adolescents*
M. Kirkpatrick, R. Pang, M. Stone, A. Leventhal, Preventive Medicine, University of Southern California, Los Angeles, CA

11:15 *Social networks, support, and alcohol use among late middle-aged and older adults*
S. Kim1, S. Spilman2, D. Liao3, P. Sacco1, A. Moore2, 1UCLA Integrated Substance Abuse Programs, Los Angeles, CA, 2University of California, Los Angeles, Los Angeles, CA, 3University of Maryland, Baltimore, MD
Wednesday, June 15, 2016

11:30  *Age- and gender-specific impacts of social influences on last 30-day marijuana use*
J. E. Goldstick, Q. Epstein-Ngo, J. Heinze, H. Hsieh, M. Walton, R. Cunningham, M. Zimmerman, University of Michigan, Ann Arbor, MI

11:45  *Do as I say, not as I do: A unique social support network among women, but not men, seeking treatment for alcohol and drug use disorders*
D. Peyser, J. Buckman, L. Banu, M. Bates, Psychology, Rutgers University, Piscataway, NJ

12:00  *The social interactome of recovery: Network topology influences social media engagement*
W. K. Bickel¹, A. Quisenberry¹, P. Chandrasekar², M. N. Koffarnus¹, E. A. Fox², Č. Franck²,
¹Addiction Recovery Research Center, Virginia Tech Carilion Research Institute, Roanoke, VA, ²Virginia Tech, Blacksburg, VA

**Poster Session III**
(Lunch)
Odd-numbered posters manned first hour;
Even-numbered, second hour

Set-up time begins Tuesday, 3 PM
Must be removed by Wednesday 2:30 PM

**OPIOID TREATMENT**

1  *Gender differences in timing of reminder messages for automated, CBT-based treatment for methadone*
   D. M. Printz¹, F. D. Buono¹, D. P. Lloyd², S. Reichin², B. A. Moore¹, ¹Psychiatry, Yale University, New Haven, CT, ²APT Foundation, New Haven, CT

2  *Predicting craving and mood 90 minute into the future using GPS data*
   W. J. Kowalczyk¹, M. Tyburski¹, M. Vahabzadeh¹, J. Lin¹, K. A. Phillips¹, A. J. Milam², D. M. Furr-Holden³, M. Mezghanni¹, D. H. Epstein¹, K. L. Preston¹, ¹NIDA, IRP, Baltimore, MD, ²Johns Hopkins, Baltimore, MD

3  *Evaluation of tailored therapeutic recommendations to improve use of an automated telephone-based treatment for methadone*
   D. P. Lloyd¹, D. M. Printz², F. D. Buono³, S. Reichin¹, B. A. Moore², ¹APT Foundation, New Haven, CT, ²Psychiatry, Yale University School of Medicine, New Haven, CT, ³Psychiatry, Yale University, New Haven, CT

4  *Finding a needle in the haystack: Using machine learning to predict overdose in opioid users*
   B. S. Crosier¹, J. Borodovsky², P. Mateu-Gelabert³, H. Guarino⁴, ¹Center for Technology and Behavioral Health, Dartmouth College, West Windsor, VT, ²Psychiatry, Dartmouth College, Hanover, NH, ³NDRI, Inc., New York, NY, ⁴National Development & Research Institutes, New York, NY

5  *Gender differences in methadone dose patterns and length of treatment in outpatient methadone maintenance treatment programs*
   J. A. Frimpong¹, K. Shiu², T. D’Aunno³, H. Pollack⁴, P. Friedmann⁵, ¹Columbia University, New York, NY, ²Sociomedical Sciences, Columbia University, New York, NY, ³New York University, New York, NY, ⁴University of Chicago, Chicago, IL, ⁵Baystate Health, Springfield, MA

6  *Measuring circadian entrainment during outpatient opioid agonist maintenance*
   J. W. Bertz¹, D. H. Epstein¹, M. Rea², M. G. Figueiro², G. Ward², K. L. Preston¹, ¹Clinical Pharmacology and Therapeutics Research Branch, NIDA Intramural Research Program, Baltimore, MD, ²Lighting Research Center, Rensselaer Polytechnic Institute, Troy, NY
7 A randomized trial of patient-centered methadone treatment with optional counseling
R. P. Schwartz1, S. M. Kelly1, J. Gryczynski1, K. O’Grady2, D. Gandhi4, Y. Olsen3, J. H. Jaffe1, 
S. G. Mitchell1, 1Friends Research Institute, Baltimore, MD, 2Univ. of Maryland, College 
Park, MD, 3IRB REACH, Baltimore, MD, 4Psychiatry, Univ. of Maryland, Baltimore, MD

8 Fair hearing outcomes for patients recommended discharge from methadone maintenance

9 A systematic review of opioid agonist treatments for pharmaceutical opioid dependence
S. Nielsen3,2, B. Larance3, L. Degenhardt3, L. Gowing1, N. Lintzeris2,4, 1University of Adelaide, 
Adelaide, SA, Australia, 2South Eastern Sydney Local Health District, Sydney, NSW, 
Australia, 3UNSW Australia, Sydney, NSW, Australia, 4University of Sydney, Sydney, NSW, 
Australia

10 The impact of psychopharmacotherapy on disenrollment from office-based opioid treatment 
with buprenorphine
Z. M. Weinstein1,2, D. M. Cheng1, E. Quinn1, D. Hui1, H. Kim1, G. Gryczynski1,2, C. Labelle1,2, 
J. H. Samet1,2, 1Boston University, Boston, MA, 2Boston Medical Center, Boston, MA

11 Urine drug testing for patients on buprenorphine: Informative beyond self-reported cocaine and 
opioid use?
S. M. Bagley2, D. M. Cheng3, M. R. Winter1, D. Alford3, C. Labelle3, A. Y. Walley1, 
J. H. Samet3, 1General Internal Medicine, Boston Univ, Boston, MA, 2Medicine, Boston 
University School of Medicine, Boston, MA, 3Boston University Medical Center/Boston 
Medical Center, Boston, MA, 4Boston University School of Public Health, Boston, MA

12 Within-subject evaluation of interim buprenorphine vs. waitlist on illicit opioid use
T. A. Ochalek5, J. D. Pusey5, B. Hruska1, S. H. Heil1, S. Higgins1, G. Rose1, B. A. Moore4, 
S. C. Sigmon1, 1Psychiatry, The University of Vermont, Burlington, VT, 4Psychiatry, Yale 
University School of Medicine, New Haven, CT, 5Psychology, University of Vermont, 
Burlington, VT

13 Safety of combination buprenorphine/naloxone and extended-release naltrexone
R. Lindblad1, A. Saxon3, P. VanVeldhuisen1, L. Lu1, L. Hu1, A. Hasson2, C. Thomas2, 
S. Sparenborg4, L. Mooney2, W. Ling2, 1EMMES, Rockville, MD, 2UCLA, Los Angeles, CA, 
3VA, Seattle, WA, 4NIDA, Rockville, MD

14 “The devil I know is better than the devil I don’t know”: Enrollment in a pilot trial of opioid 
dose escalation vs. buprenorphine/naloxone for pain
A. Manhapra, D. A. Fiellin, W. Becker, Yale University, New Haven, CT

15 Improving buprenorphine treatment outcomes with the L-type calcium channel blocker 
isradipine
A. Oliveto1, J. McGaugh1, J. B. Guise1, J. D. Thostenson2, M. J. Mancino1, 1Psychiatry, 
University of Arkansas for Medical Sciences, Little Rock, AR, 2Biostatistics, University of 
Arkansas for Medical Sciences, Little Rock, AR

16 Sensitivity analysis of a comparative trial of 6-month buprenorphine implants (Probuphine) and 
sublingual buprenorphine in stable opioid-dependent patients
R. Rosenthal2, M. R. Lofwall1, S. Kim3, M. Chen4, K. Beebe3, F. Voci6, 1University of 
Kentucky, Lexington, KY, 2Psychiatry, Icahn School of Medicine, New York, NY, 3Braeburn 
Pharmaceuticals, Princeton, NJ, 4TCM Groups, Berkeley Heights, NJ, 5Titan Pharmaceuticals, 
South San Francisco, CA, 6Friends Research Institute, Baltimore, MD
17 **Pregabalin for opioid detoxification: Interim results**

  L. Johnson, S. Hartz, L. Bierut, Psychiatry, Washington University in St. Louis, Saint
  Louis, MO

111 Effects of electronic vs. combustible cigarette administration on smoking withdrawal suppression
  C. G. Aguirre, A. Leventhal, M. Kirkpatrick, N. Goldenson, J. Huh, Preventive Medicine,
  University of Southern California, Los Angeles, CA

112 The tobacco status project: Three month outcomes for a randomized controlled trial of a
  Facebook smoking cessation intervention for young adults
  D. Ramo¹, J. Thrul¹, K. Delucchi¹, S. m. Hall¹, P. Ling¹, A. Belohlavek¹, S. Zhao¹, B. Han¹,
  J. Prochaska², ¹UCSF, San Francisco, CA, ²Stanford University, Stanford, CA

113 Tobacco cessation among poor and underserved: Expanding alternatives through community-
  based participatory research
  P. Sheikhattari¹², C. Schutzman¹², T. Addison¹², J. Apata¹², J. Bucceri², M. Gunning²,
  F. A. Wagner¹², ¹PSRC, Morgan State University, Baltimore, MD, ²CEASE, Baltimore, MD

114 Impact of group motivational interviewing on enhancing treatment engagement for homeless
  veterans with nicotine dependence and other substance use disorders
  E. J. Santa Ana, S. LaRowe, K. J. Hartwell, K. Lamb, Charleston VAMC and MUSC, Charleston, SC

Late-Breaking Research

Symposium XIV

REDDUCING THE HARMS OF OPIOID ANALGESIC USE IN HEALTH SYSTEMS

Chairs: Amy S. Bohnert and Tae Woo Park

  3:30 Treatment patterns associated with overdose among patients with comorbid pain and substance
  use disorders
  Tae Woo Park, Alpert Medical School of Brown University, Providence, RI

  3:55 Opioid risk mitigation in the military health system: Results from a mixed-methods study
  Jennifer Sharpe Potter, University of Texas Health Science Center San Antonio, San
  Antonio, TX

  4:20 Investigating clinicians’ opioid prescribing and dispensing practices: A qualitative study
  Mark Edlund, RTI International, Research Triangle Park, NC

  4:45 Use of non-pharmacological strategies for pain relief in addiction treatment patients with
  chronic pain
  Lewei Allison Lin, University of Michigan Medical School, Ann Arbor, MI

  5:10 DISCUSSANT: Future directions in reducing opioid misuse and overdose
  David A Fiellin, Yale University School of Medicine, New Haven, CT
Wednesday, June 15, 2016

Oral Communications 17  
THE BREAKFAST CLUB: ADOLESCENTS  
3:30 - 5:30 PM

Chairs: Katherine M. Serafine and Kaliris Y. Salas-Ramirez

3:30  Taurine’s effects on cocaine reward in adolescent male and female rats  
U. Akpara, R. Liang, A. Villa-Gonzalez, D. Harris, A. Elzanie, K. Chauhan, C. Vasquez,  
T. Irving, A. Cole, K. Y. Salas-Ramirez, Department of Physiology, Pharmacology and  
Neuroscience, CUNY School of Medicine, New York, NY, Brooklyn, NY

3:45  Addiction-like and cognitive effects of adolescent cannabinoid self-administration in rats  
E. Kirschmann, M. Pollock, V. Nagarajan, M. M. Torregrossa, Psychiatry, University of  
Pittsburgh, Pittsburgh, PA

4:00  Sex differences in high fat diet-induced enhancement of sensitivity to the behavioral effects of  
the dopamine D2/D3 receptor agonist quinpirole in adolescent rats  
K. M. Serafine, C. Hernandez-Casner, J. Ramos, Psychology, University of Texas at El Paso,  
El Paso, TX

4:15  Altered intrinsic brain connectivity in prenatally cocaine-exposed adolescents  
Y. Zakiniaeiz, S. W. Yip, I. Balodis, C. Lacadie, L. C. Mayes, R. Sinha, M. N. Potenza,  
Psychiatry, Yale University, New Haven, CT

4:30  Age and working memory predict delay discounting in adolescents in treatment for cannabis use  
disorders  
M. M. Sweeney, M. W. Johnson, Psychiatry and Behavioral Sciences, Johns Hopkins  
University School of Medicine, Baltimore, MD

4:45  Neural activity in childhood predicts adolescent substance use initiation  
L. M. Cope, J. Heffernan, C. S. Sripada, J. E. Hardee, R. A. Zucker, M. Heitzeg, University of  
Michigan, Ann Arbor, MI

5:00  Predicting contingency management treatment efficacy among adolescents by using measures of  
impulsivity  
A. Harvanko, J. C. Strickland, B. Reynolds, University of Kentucky, Lexington, KY

5:15  A novel paradigm associated with callous unemotional traits among adolescents with substance  
and conduct problems: Behavioral and fMRI findings  
J. Sakai¹, M. Dalwani¹, S. K. Mikulich-Gilbertson¹, S. K. McWilliams¹, K. Raymond¹,  
J. Tanabe¹, M. T. Banich², T. J. Crowley¹, ¹University of Colorado, Aurora, CO, ²University of  
Colorado Boulder, Boulder, CO

Oral Communications 18  
SUPER SIZE ME: ALTERNATE ADDICTIONS  
3:30 - 5:30 PM

Chairs: Elizabeth C. Katz and Cecile M. Denis

3:30  Naloxone-precipitated withdrawal following sucrose self-administration in C57BL/6 mice  
C. Kroll, B. D. Fischer, Cooper Medical School of Rowan University, Camden, NJ

3:45  Chronic fructose consumption enhances cue-triggered cocaine- and food-seeking  
A. Kosheleff¹, L. Tsan¹, Y. Zhuang¹, F. Gomez-Pinilla¹, S. Ostlund², N. Murphy¹,  
N. Maidment¹, ¹University of California Los Angeles, Encino, CA, ²University of California  
Irvine, Irvine, CA
4:00 *Eating disorder, food addiction and associated factors in obese patients*
M. Fatseas³, M. Henry⁴, M. C. Rosa¹, J. Collombat³, A. Gregoire³, C. Kervran³, B. Cherifi⁴, M. Auriacombe³, ¹Center for Drug and Alcohol Research, Federal University of Rio Grande do Sul, Porto Alegre, Brazil, ³Addiction Psychiatry (CNRS USR 3413), Universite Bordeaux, Bordeaux, France, ⁴Obesity Clinic, CHU de Bordeaux, Bordeaux, France

4:15 *Are DSM-5 criteria for SUD transferable to food addiction? IRT analysis for alcohol, tobacco, cannabis, opiate and food addiction in a clinical sample*
C. M. Denis¹,², M. C. Rosa³, F. Serre³, C. Kervran³, M. Henry⁴, B. Cherifi⁴, M. Auriacombe¹,³, M. Fatseas³, ¹Univ. Pennsylvania, Philadelphia, PA, ³Addiction Psychiatry, Univ. Bordeaux / CNRS USR 3413, Bordeaux, France, ⁴Obesity Clinic, CHU de Bordeaux, Bordeaux, France, ²Univ. Rio Grande, Porto Allegre, Brazil

4:30 *Video game addiction: Duration of play and impulsivity*
F. D. Buono², B. A. Moore³, D. M. Printz³, D. P. Lloyd³, C. J. Cutter¹, M. E. Sprong⁴, ¹Internal Medicine, Yale School of Medicine, New Haven, CT, ²Psychiatry, Yale University, New Haven, CT, ³Psychiatry, Yale University School of Medicine, New Haven, CT, ⁴Rehabilitation Counseling, Northern Illinois University, DeKalb, IL

4:45 *Association between working memory, impulsivity and problematic technology use*
C. Lewis, E. C. Katz, Psychology, Towson University, Towson, MD

5:00 *Game type as a moderator of the relationship between pathological video game use, impulsivity, aggression, and general psychopathology*
M. S. Sferra¹, S. Fields¹, D. Gentile², ¹Psychology, Texas A&M University, College Station, TX, ²Psychology, Iowa State University, Ames, IA

5:15 *Reduced precuneus activation in adolescents at risk for food addiction*
J. Hardee, A. Gearhardt, L. M. Cope, R. Zucker, M. Heitzeg, Psychiatry, University of Michigan, Ann Arbor, MI

**Oral Communications 19**

**WHAT’S LOVE GOT TO DO WITH IT?: TRAUMA/PTSD**

Chairs: Shane A. Perrine and Jacquelyn L. Meyers

3:30 *Cocaine self-administration and single prolonged stress produce hyperarousal-like, but not anxiety-like, behavior in rats*
M. J. Lisieski, S. A. Perrine, Psychiatry and Behavioral Neurosciences, Wayne State University School of Medicine, Detroit, MI

3:45 *A modified single prolonged stress episode delays acquisition of cocaine self-administration*
R. S. Hofford, M. A. Prendergast, M. T. Bardo, Psychology, University of Kentucky, Lexington, KY

4:00 *Pharmacological mechanisms of MDMA’s facilitative effect on fear extinction*
M. Young¹, L. F. Berro², L. Howell¹, ¹Emory University, Atlanta, GA, ²Yerkes National Primate Research Center, Emory University, Atlanta, GA

4:15 *Early life trauma, neurocognitive functioning, and substance use*
J. L. Meyers¹,², V. V. McCutcheon³, J. Salvatore⁴, D. Chorlian¹, A. Pandey¹, *, Collaborative Study on the Genetics of Alcoholism Collaborators¹, K. K. Bucholz², B. Porjesz¹, ¹Psychiatry, The State University of New York, Brooklyn, NY, ²Columbia University, New York, NY, ³Washington University School of Medicine, St. Louis, MO, ⁴Virginia Commonwealth University, Richmond, VA
4:30  Oxytocin decreases methamphetamine-seeking and gene expression changes in rats after traumatic stress
   J. F. McGinty, Neuroscience, Medical University of South Carolina, Charleston, SC

4:45  Concurrent treatment with prolonged exposure for co-occurring PTSD and substance use disorders: A randomized clinical trial
   D. Hien1,2, L. Ruglass3, S. Back4, 1Psychology, Adelphi University, NY, NY, 2Psychiatry, Columbia University College of Physicians and Surgeons, New York, NY, 3Psychology, City College of New York, New York, NY, 4Psychiatry and Behavioral Sciences, Medical University of South Carolina, Charleston, SC

5:00  Nonmedical and illicit drug use: Associations with PTSD severity & symptom clusters among a sample of U.S. Army Reserve/National Guard Soldiers
   D. Homish1, S. Cercone Heavey1, J. Devonish1, J. Cornelius2, G. G. Homish1, 1Community Health & Health Behavior, State University of New York at Buffalo, Buffalo, NY, 2Psychiatry, University of Pittsburgh Medical Center, Pittsburgh, PA

Business Meeting
(MEMBERS ONLY)

CAPRA
5:30 - 6:30 PM

DINNER AND DANCING
BADGES MUST BE WORN FOR ADMISSION

Fiesta Ballroom
7:30 - 10:30 PM

Please be advised that no photographing of presentations or data is permitted. Badges must be worn at all times and are required for admission into all events and sessions.
**Thursday, June 16, 2016**

**Poster Session IV**
*(Breakfast)*

Odd-numbered posters manned first hour;  
Even-numbered, second hour

Set-up time begins Wednesday, 3PM  
Must be removed by Thursday 12 Noon

**PROGRAM DESCRIPTION**

1. **Forging a new path: Urban Indian approaches to service improvement in Ramsey County, Minnesota**  
   A. H. Skinstad, J. Gringer Richards, L. E. Thompson, S. A. Bear, Dept of Community and Behavioral Health, University of Iowa, College of Public Health, Iowa City, IA

2. **Mother and child: Improving the health of opiate-dependent mothers and their babies using a community-based peer counselor**  
   T. L. Horton, L. Bechler, B. L. Wilson, M. Lanyon, c. Jurkovitz, Y. Washio, Christiana Care Health System, Newark, DE

3. **“Group Prenatal Care” – Providing obstetric care in a community-based substance abuse treatment center**  
   E. Zadzielski, S. Rogers, S. Gargano, Y. Washio, Christiana Care Health Services, Newark, DE

4. **Integrated telemedicine-based treatment for hepatitis C at an opioid agonist treatment program**  
   L. S. Brown, A. Talal, P. Andrews, A. Mcleod, M. Zeremski, Y. Chen, C. Sylvester,  
   ^1Research & Evaluation, START: Treatment & Recovery Centers, Brooklyn, NY,  
   ^2Medicine, University at Buffalo, Buffalo, NY,  
   ^3Gastroenterology, Hepatology, and Nutrition, Cornell University, New York, NY,  
   ^4Medicine, START: Treatment & Recovery Centers, New York, NY,  
   ^5Gastroenterology, Hepatology, and Nutrition, Cornell University, New York, NY,  
   ^6CEO, START: Treatment & Recovery Centers, Brooklyn, NY,  
   ^7Biostatistics, University at Buffalo, Buffalo, NY,  
   ^8Medicine, Weill Cornell Medical College, New York, NY

5. **OverdoseFreePA.org: A resource for overdose prevention in Pennsylvania**  
   M. D. Reynolds, J. L. Pringle, S. Rickard-Aasen, J. Oblak, School of Pharmacy, University of Pittsburgh, Pittsburgh, PA

6. **Images for science communications pertinent to drug dependence research and to the general public**  
   D. Barondess, J. C. Anthony, Epidemiology and Biostatistics, Michigan State University, East Lansing, MI

7. **Contribution of e-learning to addiction teaching: A successful experience at the University of Bordeaux, France**  
   M. Auriacombe, J. Alexandre, J. Dubernet, J. Tanguy, M. Fatseas,  
   ^1Addiction Psychiatry (CNRS USR 3413), Universite Bordeaux, Bordeaux, France,  
   ^2MAPI, Univ. Bordeaux, Bordeaux, France

8. **The research in addiction medicine scholars program – Developing researchers in addiction fellowships**  
   P. O’Connor, J. I. Tsui, D. Gobel, B. Brett, C. Briddlen, J. H. Samet,  
   ^1Boston Medical Center, Boston, MA,  
   ^2Internal Medicine, University of Washington School of Medicine, Seattle, WA,  
   ^3Yale University, New Haven, CT,  
   ^4Boston University, Boston, MA,  
   ^5Brett Consulting Group, Somerville, MA
9 Specialized community disease management to reduce substance use and hospital readmissions
J. E. Chambers¹, A. C. Brooks¹, M. F. Morrison², J. R. McKay³, D. R. Gastfriend⁴, ¹Treatment Research Institute, Philadelphia, PA, ²Lewis Katz School of Medicine at Temple University, Philadelphia, PA, ³Department of Psychiatry, University of Pennsylvania, Philadelphia, PA

10 Research to practice: Fidelity monitoring and lessons learned with patient navigation and HIV
K. Gilmore², D. Svikis¹, A. Rhodes², T. Moore¹, L. Yerkes², ¹Virginia Commonwealth Univ., Richmond, VA, ²Virginia Department of Health, Richmond, VA

11 Theoretical implications of gender, power, and sexual scripts for HIV prevention programs aimed at young, substance-using African American women
M. Hill¹, A. Stotts², ¹Emergency Medicine, University of Texas Health Science Center, McGovern Medical School, Houston, TX, ²University of Texas Medical School at Houston, Houston, TX

12 RICH Recovery: Integrating primary and behavioral healthcare for individuals with substance use disorders
J. May²,¹, D. Farrell-Moore²,¹, D. N. Masri²,¹, B. Cox²,¹, ¹Grants, Research, Evaluation and Planning, RBHA, Richmond, VA, ²Richmond Behavioral Health Authority, Richmond, VA

13 The Baltimore reproductive health initiative: Bringing family planning to women in treatment
M. Terplan¹, J. Kirschner², S. Muqueeth², R. Dineen², ¹Behavioral Health System Baltimore, Baltimore, MD, ²Baltimore City Health Department, Baltimore, MD

14 Using electronic health records data for clinical research
L. T. Wu², S. Spratt², B. Heidenfelder², B. Tai⁴, U. Ghitza⁴, ²Duke University, Durham, NC, ⁴NIDA, Bethesda, MD

15 Foundational development of a post-market surveillance program for e-vapor products using Internet forum data
E. C. McNaughton, T. M. Dailey, M. Behling, S. F. Butler, Inflexxion, Inc., Newton, MA

16 In-house outreach: Strategies to promote and advertise a smoking cessation program in a Mexican university hospital
O. Campollo¹,², O. Torres¹, ¹Center of Alcoholism and Addictions, University of Guadalajara, Guadalajara, Mexico, ²Molecular Biology, Hospital Civil de Guadalajara FAA, Guadalajara, Mexico

LITERATURE REVIEW

17 Prenatal cannabis exposure and cognitive functioning: A critical review
C. A. Torres², C. L. Hart¹,³, ¹Psychology, Columbia University, New York, NY, ²School of Social Work, Columbia University, New York, NY, ³Psychiatry, Columbia University, New York, NY

18 A review of recent developments (2012-15) on the use of financial incentives with pregnant smokers
D. R. Davis¹,², L. J. Solomon², S. Higgins²,¹, ¹Psychology, University of Vermont, Burlington, VT, ²Psychiatry, University of Vermont, Burlington, VT

19 WITHDRAWN

20 Community-based drug treatment in Thailand
U. Perngparn, C. Areesantichai, Drug Dependence Research Center WHO Collaborating Center for Research and Training in Drug Dependence (WHOCC), Chulalongkorn University, Bangkok, Thailand
21 Systematic review: Do take-home naloxone programs effectively reduce opioid overdose deaths? A Bradford Hill analysis
R. McDonald, J. Strang, Addictions Department, King’s College London, London, United Kingdom

22 Prescription stimulant non-medical use: Literature review
S. Vosburg, M. Sokolowska, Grunenthal, Morristown, NJ

23 A systematic review of barriers and facilitators to implementing a prescription drug monitoring program
A. A. Garcia¹, K. D. Rosen², E. Finley³, J. S. Potter¹, ¹Psychiatry, University of Texas Health Science Center San Antonio, San Antonio, TX, ²University of Texas Health Science Center, San Antonio, TX, ³South Texas Veterans Healthcare System, San Antonio, TX

24 Opioid therapy misuse factors: A systematic review
K. Song¹, ³, D. McGeary², M. Pugh⁴, ⁵, W. Kazanis², S. M. Paniagua², E. Finley⁴, ⁶, A. A. Garcia², V. Bebarta⁷, D. Carnahan⁸, ⁹, J. S. Potter³, ¹Pharmacotherapy Education & Research Center, University of Texas Health Sciences Center at San Antonio, San Antonio, TX, ²Psychiatry, UT Health Science Center, San Antonio, TX, ³Pharmacy, South Texas Veterans Healthcare System, San Antonio, TX, ⁴South Texas Veterans Healthcare System, San Antonio, TX, ⁵Epidemiology & Biostatistics, University of Texas Health Sciences Center at San Antonio, San Antonio, TX, ⁶Division of Clinical Epidemiology, University of Texas Health Sciences Center at San Antonio, San Antonio, TX, ⁷San Antonio Military Medical Center, San Antonio, TX, ⁸San Antonio Military Medical Center, San Antonio, TX, ⁹United States Air Force Medical Support Agency, San Antonio, TX

PREVENTION

25 Child-parent attachment mediates but not moderates parent and child substance involvement
Z. Zhai², T. Ridenour¹, R. E. Tarter⁴, ¹Research Triangle Institute, Allison Park, PA, ²Psychiatry, Yale University School of Medicine, New Haven, CT, ³University of Pittsburgh School of Pharmacy, Pittsburgh, PA

26 Are distinct parenting practices all equally protective against adolescent substance use?
L. A. Ghandour, N. J. El Salibi, N. Yassin, R. Afifi, American University of Beirut, Beirut, Lebanon

27 Conflicts between youths and their parents in relation to future NIDA prevention research
J. R. Parra-Cardona¹, H. H. Yeh², J. C. Anthony², ¹Michigan State University, East Lansing, MI, ²Epidemiology, Michigan State University, East Lansing, MI

28 Is parenting really that stressful? Daily behavioral stress in drug-using parents compared to non-parents
A. Moreland¹, D. Brown³, N. Baker², A. McRae-Clark¹, ¹Psychiatry and Behavioral Sciences, Medical University of South Carolina, Charleston, SC, ²Medical University of South Carolina, Charleston, SC, ³Howard University, Washington, DC

29 Codeine misuse/dependence: Best practice and future innovations in addressing risk, harm and successful treatment
C. D. Parry¹, M. van Hout², I. Norman³, ¹Alcohol, Tobacco & Other Drug Research Unit, South African Medical Research Council, Cape Town, South Africa, ²School of Health Sciences, Waterford Institute of Technology, Waterford, Ireland, ³Florence Nightingale Faculty of Nursing & Midwifery, King’s College London, London, United Kingdom
30 An exploratory factor analysis of a brief self-report scale to detect neurocognitive impairment among MMT patients

M. Copenhaver1,2, R. Shrestha2,3, F. L. Altice4, 1Allied Health Sciences, University of Connecticut, Storrs, CT, 2Center for Health, Intervention, and Prevention, University of Connecticut, Storrs, CT, 3Community Medicine & Health Care, University of Connecticut Health Center, Farmington, CT, 4Department of Medicine, Yale University, New Haven, CT

31 The Affordable Care Act and HIV/HCV testing in substance use disorder treatment programs

32 Harm reduction service utilization and HIV incidence among people who inject drugs in Ukraine

D. C. Ompad1, J. Wang1, K. Dumchev3, J. Barska4, M. Samko4, O. Zeziulin5, T. Salyuk4, O. Varetska1, J. DeHovitz2, 1New York University, New York, NY, 2University of Chicago, Chicago, IL, 3Ukrainian Institute on Public Health Policy, Kiev, Ukraine, 4Alliance for Public Health Ukraine, Kiev, Ukraine, 5SUNY Downstate Medical Center, Brooklyn, NY

33 HIV pre-exposure prophylaxis for people who inject drugs: Willingness to prescribe among general internists

E. J. Edelman1, B. A. Moore1, G. Berkenblit2, S. Calabrese1, C. Cunningham4, D. A. Fiellin1, V. Patel1, K. A. Phillips3, J. Tetrauld1, M. Shah5, O. Blackstock4, 1Yale, New Haven, CT, 2Johns Hopkins, Baltimore, MD, 3NIDA-IRP, NIH, Baltimore, MD, 4Montefiore, Bronx, NY, 5UIC, Chicago, IL

34 High-risk behaviors among Iranian female drug users inspiring health belief model

E. Merghati-khoei1, M. Jamshidimanesh1, I. Ilika1, M. Hosseini2, 1Iranian National Center for Addiction Studies, Tehran University of Medical Sciences, Tehran, Iran (the Islamic Republic of), 2Epidemiology, Tehran University of Medical Sciences, Tehran, Iran (the Islamic Republic of)

35 Screenig for oral cancer in tobacco and/or alcohol addicts: A comparison of different organizations

S. Rollier, Public Health, Centre Hospitalier Régional Universitaire de TOURS, Tours, France

36 The interaction of masculine gender norm conformity and depression predict alcohol use in African American young adult men

F. Fonseca, C. M. Risco, M. L. Boyd, T. S. Chaudhry, G. M. Munayco, C. I. Burt, C. W. Lejuez, R. Yi, Psychology, University of Maryland, College Park, MD

37 Marijuana use in young adult women & men attending primary care: Results from a pilot study integrating behavioral health care into primary care

G. Lapham, M. Addis, A. K. Lee, C. Achtmeyer, J. Richards, E. Ludman, T. Gildred, R. Caldeiro, L. Marx, P. Lozano, K. A. Bradley, Group Health Research Institute, Seattle, WA

38 Application of system dynamics to inform a model of adolescent SBIRT implementation in primary care settings

S. G. Mitchell1, D. Lounsbury2, Z. Li3, R. P. Schwartz1, J. Gryczynski1, A. Kirk1, M. Oros4, C. Hosler4, K. Dusek1, B. Brown1, 1Friends Research Institute, Baltimore, MD, 2Albert Einstein College of Medicine, Yeshiva University, Bronx, NY, 3Total Health Care, Baltimore, MD, 4The Mosaic Group, Baltimore, MD, 5College of Global Public Health, New York University, New York, NY

39 Key ingredients for conducting daily or weekly IVR/SMS surveys

L. Massey1, M. A. Walton1, R. M. Cunningham2, J. Cranford1, A. Buu3, 1Psychiatry, University of Michigan, Ann Arbor, MI, 2Emergency Medicine, University of Michigan, Ann Arbor, MI, 3School of Nursing, University of Michigan, Ann Arbor, MI
**40** E-cigarette expectancies: Initial qualitative assessment for measure development  
P. T. Harrell¹, G. Quinn², B. Vesely¹, T. Brandon², ¹Pediatrics, Eastern Virginia Medical School, Norfolk, VA, ²Health Outcomes & Behavior, Moffitt Cancer Center, Tampa, FL

**WITHDRAWN**

**POLYDRUG**

**42** Psychedelic-associated addiction remission: An online survey  
A. Garcia-Romeu, R. R. Griffiths, M. W. Johnson, Psychiatry, Johns Hopkins, Baltimore, MD

**43** A pilot study of the feasibility and potential effectiveness of using smartphones to provide recovery support  
C. K. Scott¹, M. L. Dennis¹, D. Gustafson³, K. Johnson³, ¹Lighthouse Institute, Chestnut Health Systems, Chicago, IL, ²CHESS, University of Wisconsin, Madison, WI

**44** Healthcall on smartphone: A brief intervention to reduce concurrent drug and alcohol use  
E. Aharonovich¹,², E. Greenstein², A. Le², D. S. Hasin¹,², ¹Psychiatry, Columbia University Medical Center, New York, NY, ²NYSPI, New York, NY

**45** Clinician involvement with internet-delivered treatment and association to outcomes  
A. Campbell¹, E. V. Nunes¹, M. Pavlicova², ¹Department of Psychiatry, Columbia University Medical Center, New York, NY, ²Columbia University, New York, NY

**46** Comparing predictors of treatment completion and length of stay for outpatient treatment  
G. Stahler, J. Mennis, Temple University, Philadelphia, PA

**47** Housing status, psychiatric distress, and substance use among sober living house residents  
D. L. Polcin, R. Korcha, A. Mericle, S. Gupta, J. Witbrodt, Alcohol Research Group, Public Health Institute, Emeryville, CA

**48** Intrinsic and extrinsic motivation predict treatment outcome in a sample of HIV+ drug users  
D. Cannizzaro¹, M. Stohl¹, D. Hasin¹,², E. Aharonovich¹,², ¹New York State Psychiatric Institute, New York, NY, ²Psychiatry, Columbia University, New York, NY

**49** Methadone maintenance therapy and comorbid substance use: A brief qualitative report  
N. Puri, R. McNeil, W. Small, Urban Health Research Institute, BC Centre for Excellence in HIV/AIDS, Vancouver, BC, Canada

**50** Performance of the TAPS-I brief screening tool in primary care  
J. Gryczynski², J. McNeely⁴, L. T. Wu¹, G. Subramaniam³, G. Sharma⁵, C. Nordeck², A. Sharma³, L. A. Cathers⁶, C. Cushing³, D. Svikis⁶, E. Jelstrom⁶, K. O’Grady⁷, R. P. Schwartz², ¹Duke University, Durham, NC, ²Friends Research Institute, Baltimore, MD, ³NIDA, Rockville, MD, ⁴NYU, New York, NY, ⁵The EMMES Corporation, Rockville, MD, ⁶VCU, Richmond, VA, ⁷Univ. of Maryland, College Park, MD

**51** Prevalence and correlates of recovery from drug dependence  
J. A. Cranford², C. J. Boyd¹, S. McCabe³, ¹Health Behavior and Behavioral Science, University of Michigan, Ann Arbor, MI, ²Psychiatry, University of Michigan, Ann Arbor, MI, ³Institute for Research on Women & Gender, University of Michigan, Ann Arbor, MI

**COMORBIDITY**

**52** Feasibility and satisfaction of the women’s recovery group for patients with co-occurring substance use and eating disorders  
S. F. Greenfield¹,²,³, D. E. Sugarman¹,²,³, B. Iles², E. Dechant³, T. Weigel³, P. Tarbox³, ¹Harvard Medical School, Boston, MA, ²Division of Alcohol and Drug Abuse, McLean Hospital, Belmont, MA, ³Division of Women’s Mental Health, McLean Hospital, Belmont, MA
53 **Smartphone-enhanced behavioral activation treatment for substance use and depression**
Y. Chen2, J. A. De Leo2, L. Matalehas1, A. C. McLaughlin1, A. Petruzzella2, E. Jones2, S. B. Daughters2, 1Department of Psychology, North Carolina State University, Raleigh, NC, 2Department of Psychology and Neuroscience, University of North Carolina at Chapel Hill, Chapel Hill, NC

54 **Nicotine metabolite ratio and associations with smoking topography in a population with affective disorders**
D. Gaaema2, J. W. Tidey1, R. Tyndale3, S. Higgins2, 1Center for Alcohol & Addictions Studies, Brown University, Providence, RI, 2University of Vermont, Burlington, VT, 3University of Toronto, Toronto, ON, Canada

55 **OCD symptom severity and tobacco withdrawal symptomatology among African American smokers**
M. S. Bello, J. F. McBeth, R. Pang, A. Leventhal, Preventive Medicine, University of Southern California, Los Angeles, CA

56 **Emotion dysregulation in adult smokers with and without ADHD: Baseline differences and abstinence-induced effects**
J. T. Mitchell2, C. W. Lejuez6, F. McClernon2, J. Beckham2,5, R. A. Brown2, S. H. Kollins1, 1Psychiatry, Duke University Medical Center, Durham, NC, 2Psychiatry & Behavioral Sciences, Duke University Medical Center, Durham, NC, 3Veterans Affairs Medical Center, Durham, NC, 6University of Maryland, College Park, MD

57 **Facets of mindfulness mediate the relationship between depressive symptoms and smoking expectancies**
C. Vinci1, C. A. Spears3, M. R. Peltier1, A. Copeland1, 1UT MD Anderson Cancer Center, Houston, TX, 3The Catholic University of America, Washington, DC

58 **High prevalence of major depression among treatment-seeking ketamine-dependent patients**
L. Chen1, K. Xu2, C. Chen4, M. Huang3, 1General Psychiatry, Taipei City Psychiatric Center, Taipei City Hospital, Songde Branch, Taipei, Taiwan, 2Yale School of Medicine, New Haven, CT, 3Taipei City Psychiatric Center, Taipei, Taiwan, 4Department of Psychiatry, Chang Gung Memorial Hospital, Keelung, Taiwan

59 **Major depressive disorder and family history of alcoholism in two treatment samples: Does gender matter?**
K. M. Polak1, A. Edwards2, K. S. Kendler2, D. Svikis1, E. Ngelina1, S. Spicer1, 1Psychology, Virginia Commonwealth University, Henrico, VA, 2Psychiatry, Virginia Commonwealth University, Richmond, VA

60 **Substance use disorder and home neighborhood disorder do not predict posttraumatic stress symptoms**

61 **Predictors of barriers to mental healthcare service utilization in returning veterans**
M. B. Benz1, B. Borsari1,2, J. Metrik1,3, 1Center for Alcohol and Addiction Studies, Brown University, Providence, RI, 2San Francisco VAMC, San Francisco, CA, 3Providence VAMC, Providence, RI

62 **Greater psychiatric morbidity among youth with synthetic cannabinoid use in residential treatment**
V. L. Selby2,1, C. Storr2, M. Fishman3,1, 1Maryland Treatment Centers, Baltimore, MD, 2University of Maryland School of Nursing, Baltimore, MD, 3Johns Hopkins School of Medicine, Baltimore, MD
Improvement in psychiatric symptoms during Interim buprenorphine treatment
J. M. Streck1, T. A. Ochalek1, B. Hruska3, J. D. Pusey3, S. C. Sigmon3, 1Psychological Science, University of Vermont, Burlington, VT, 3Psychiatry, University of Vermont, Burlington, VT

The impact of addiction medications on outcomes for persons with co-occurring PTSD and opioid use disorders
E. Saunders1, M. P. McGovern4, C. Lambert-Harris2, A. Meier4, B. McLeman3, 1The Dartmouth Institute, Lebanon, NH, 2Psychiatry, Dartmouth Geisel School of Medicine, Lebanon, NH, 3Dartmouth Psychiatric Research Center, Lebanon, NH, 4Psychiatry, Dartmouth Geisel School of Medicine, Lebanon, NH

Development and pilot test of integrated cognitive behavioral therapy for anxiety and opioid use disorder
K. McHugh, S. F. Greenfield, R. Weiss, McLean Hospital/Harvard Medical School, Belmont, MA

Life in the barrio: Stress, depression and drug use
Y. Villarreal1, M. R. Klawans1, L. Torres2, P. Bordnick2, A. Stotts1, 1McGovern Medical School, University of Texas Health Science Center at Houston, Houston, TX, 2Graduate College of Social Work, University of Houston, Houston, TX

Anxiety disorders as a risk factor for needle sharing among cocaine users: Results from the COSMO study
A. Levesque2,3, E. Roy1, D. Jutras-Aswad2,5, G. Zang2, A. Artenie2,3, J. Bruneau2,4, 1Community Health Sciences, Université de Sherbrooke, Longueuil, QC, Canada, 2Research Center, Centre Hospitalier de l’Université de Montréal, Montreal, QC, Canada, 3Family Medicine, McGill University, Montreal, QC, Canada, 4Family and Emergency Medicine, Université de Montréal, Montreal, QC, Canada, 5Psychiatry, Université de Montréal, Montréal, QC, Canada

Acute tryptophan depletion in cocaine dependent subjects with comorbid-depression
M. Torrens2,1,3, J. I. Mestre-Pintó1, C. Pérez-Mañà1,3, E. Papaseit1,3, F. Fonseca2,1,3, M. Farré4,1,3, 1Institut Hospital del Mar d’Investigacions Mèdiques, PSMAR, Barcelona, Spain, 2Institut de Neuropsiquiatria i Addiccions, Parc de Salut Mar, Barcelona, Spain, 3Universitat Autònoma de Barcelona, Barcelona, Spain, 4Hospital Universitari Germans Trias i Pujol-IGTP, Badalona, Spain

Effect of vasopressin and oxytocin on ACTH secretion in cocaine-dependent patients
M. S. Heller, F. R. Levin, E. V. Nunes, W. N. Raby, Psychiatry, Columbia University, New York, NY

Effects of plasma pregnanolone levels on stress response, mood and drug craving in cocaine-dependent men and women
V. Milivojevic1, H. C. Fox1, J. Covault2, R. Sinha1, 1Psychiatry, Yale University School of Medicine, New Haven, CT, 2Psychiatry, University of Connecticut School of Medicine, Farmington, CT

Self-reported impulsivity is related to age at first methamphetamine use
A. Cservenka2, L. Ray1,2,3, 1Psychology, University of California, Los Angeles, Los Angeles, CA, 2Psychiatry and Biobehavioral Sciences, University of California, Los Angeles, Los Angeles, CA, 3Brain Research Institute, University of California, Los Angeles, Los Angeles, CA

Differences in clinical presentation between high and low impulsive methamphetamine users
E. E. Hartwell2,3, L. Ray2,3, 1Psychiatry, UCLA, Los Angeles, CA, 2Psychology, UCLA, Los Angeles, CA, 3Integrated Substance Abuse Programs, UCLA, Los Angeles, CA
Behavioral impulsivity as a predictor of success in a smoking cessation in adolescents
S. M. Dowd1, S. Fields1, B. Reynolds2, 1Psychology, Texas A&M University, College Station, TX, 2University of Kentucky, Lexington, KY

Impulsivity, sensation seeking and substance use among adolescents: A longitudinal research study
L. Carla, V. Martinez-Loredo, S. Fernández Artamendi, J. Fernández-Hermida, I. Pericot-Valverde, W. Sara, R. Secades-Villa, University of Oviedo, Spain, Oviedo, Spain

Assessing naturalistic risk-taking in nondaily smokers using a novel momentary balloon analogue risk task
R. R. MacLean3,1,2, J. M. Smyth3, C. F. Geier3, S. J. Wilson3, 1VA Connecticut Healthcare System, West Haven, CT, 2Yale University, New Haven, CT, 3Pennsylvania State University, University Park, PA

Psychopathological symptoms, impulsivity and decision making in HIV patients with and without tobacco smoking
A. Lim, E. Lau, L. Chang, Department of Medicine, University of Hawaii, John A. Burns School of Medicine, Honolulu, HI

STIMULANTS: HUMAN STUDIES

History of cocaine sensitization in humans is associated with lipidomic changes similar to those in cocaine-sensitized rats
K. L. Preston2, K. A. Phillips4, J. J. Wagner1, B. Cummings1, D. H. Epstein1, 1Treatment Section, NIDA IRP, Baltimore, MD, 2Clinical Pharmacology and Therapeutics Research Branch, NIDA Intramural Research Program, Baltimore, MD, 3Univ. of Georgia, Athens, GA, 4Intramural Research Program, National Institute on Drug Abuse, National Institutes of Health, Baltimore, MD

Regional and network-based alterations in D2/D3 receptor availability in cocaine use disorder
P. D. Worhunsky1,2, D. Matuskey1,2, J. Gallezot1, N. Nabulsi1, G. A. Angarita2, V. D. Calhoun3,4, R. T. Malison2, M. N. Potenza1,5, R. E. Carson1, 1Radiology & Biomedical Imaging, Yale School of Medicine, New Haven, CT, 2Psychiatry, Yale School of Medicine, New Haven, CT, 3Electrical & Computer Engineering, University of New Mexico, Albuquerque, NM, 4The Mind Research Network, Albuquerque, NM, 5Neuroscience, Yale School of Medicine, New Haven, CT

A careful assessment of cognitive functioning in individuals with cocaine use disorder
K. M. Frazer1, J. J. Manly2, G. Downey1,3,4, C. L. Hart1,3,4, 1Psychology, Columbia University, New York, NY, 2Neurology, Columbia University College of Physicians and Surgeons, New York, NY, 3Division on Substance Abuse and Department of Psychiatry, New York State Psychiatric Institute, New York, NY, 4Columbia University College of Physicians and Surgeons, New York, NY

Executive functioning and outpatient treatment adherence after intensive inpatient care in cocaine dependence: A six-month follow-up study
P. D. Goncalves3, M. Ometto2, A. Malbergier2, P. Martins2, L. Beraldo2, B. Santos4, S. Nicastrì2, A. Andrade2, P. J. Cunha1, 1Department of Psychiatry, Laboratory of Psychiatric Neuroimaging (LIM 21), São Paulo, Brazil, 2Psychiatry, University of São Paulo, São Paulo, Brazil, 3Psychiatry, University of California San Diego, San Diego, CA, 4University of Sao Paulo, Sao Paulo, Brazil
81 Acute inhibitory control training in cocaine users
J. L. Alcorn2, E. Pike1,2, J. A. Lile1,2,3, W. W. Stoops1,2,3, C. R. Rush1,2,3, 1Psychology, University of Kentucky, Lexington, KY, 2Behavioral Science, University of Kentucky, Lexington, KY, 3Psychiatry, University of Kentucky, Lexington, KY

82 Effects of mixed amphetamine salts dose and belief about drug assignment on cognitive performance in college students
K. Cropsey, M. Froelich, P. Hendricks, R. Fargason, University of Alabama at Birmingham, Birmingham, AL

83 Cocaine decreases preference for condom use as function of delayed condom availability and STI risk
M. W. Johnson1, E. S. Herrmann2, P. S. Johnson3, M. M. Sweeney1, 1Psychiatry and Behavioral Sciences, Johns Hopkins University School of Medicine, Baltimore, MD, 2New York State Psychiatric Institute, New York, NY, 3Psychology, California State University, Chico, Chico, CA

84 The influence of buspirone maintenance on the pharmacodynamic effects of methamphetamine
A. R. Reynolds1, W. W. Stoops1,2,3, J. A. Lile1,2,3, C. R. Rush1,2,3, 1Behavioral Science, University of Kentucky, Lexington, KY, 2Psychology, University of Kentucky, Lexington, KY, 3Psychiatry, University of Kentucky, Lexington, KY

85 Impact of lisdexamfetamine on retention of methamphetamine-dependent patients in a residential facility
M. J. Mancino2, J. D. Thostenson3, J. B. Guise2, J. McGaugh2, A. Oliveto2, 2Psychiatry, University of Arkansas for Medical Sciences, Little Rock, AR, 3Biostatistics, University of Arkansas for Medical Sciences, Little Rock, AR

86 Cue-induced cocaine craving increases with aripiprazole treatment in methadone-maintenance patients
L. Moran1, K. A. Phillips1, W. J. Kowalczyk1, U. Ghitza2, D. H. Epstein1, K. L. Preston1, 1NIDA-IRP, Baltimore, MD, 2NIDA, Baltimore, MD

87 A novel approach to naltrexone injections may reduce complications and increase adherence
J. Walker1, D. Santos3, C. Rowe1, G. Santos1,2, S. Jung1, P. Coffin1,4, 1Substance Use Research Unit, San Francisco Department of Public Health, San Francisco, CA, 2Community Health Systems, University of California San Francisco, San Francisco, CA, 3Housing and Urban Health, San Francisco Department of Public Health, San Francisco, CA, 4Division of HIV/AIDS, University of California, San Francisco, San Francisco, CA

88 Changes in quality of life in cocaine-dependent participants provided treatment with buprenorphine and naloxone and extended-release naltrexone
D. Blumberg1, F. Carrizales2, W. Kazanis2, M. P. Hillhouse4, A. G. Matthews4, J. S. Potter2, 1NIDA Clinical Coordinating Center, The Emes Corporation, Rockville, MD, 2Psychiatry, UT Health Science Center, San Antonio, TX, 3Integrated Substance Abuse Programs, University of California, Los Angeles, CA, 4The Emes Corporation, Rockville, MD

89 Participant treatment assignment perceptions in the NIDA CTN cocaine use reduction with buprenorphine study
A. G. Matthews2, M. P. Hillhouse1, C. Thomas1, W. Ling1, D. Blumberg2, 1UCLA, Los Angeles, CA, 2Emes, Rockville, MD

90 Use of contingency management for crack cocaine dependence in South America: Preliminary results from a randomized clinical trial
A. Q. Miguel1, C. S. Madruga2, S. McPherson3, M. G. McDonell3, J. M. Roll1, R. Laranjeira2, 1Psychiatry, Federal University of São Paulo, Sao Paulo, Brazil, 2Psychiatry, Universidade Federal de São Paulo, Sao Paulo, Brazil, 3Washington State University, Spokane, WA
91 Early exposure to prescription drugs and substance use disorder symptoms in adulthood
   P. T. Veliz1, J. Schulenberg2, S. McCabe1, 1Institute for Research on Women & Gender,
   University of Michigan, Ann Arbor, MI, 2Institute for Social Research, University of
   Michigan, Ann Arbor, MI

92 Reasons for prescription opioid misuse while playing in the NFL associated with current use
   and misuse among retired players
   E. M. Dunne1, C. W. Striley2, N. E. Whitehead1, L. Cottler2, 1Clinical and Health Psychology,
   University of Florida, Gainesville, FL, 2Epidemiology, University of Florida, Gainesville, FL

93 Physical health of women recovering from prescription opioid abuse
   K. R. Marks, M. Delaney, C. Leukefeld, Behavioral Science, University of Kentucky,
   Lexington, KY

94 Association between lifetime heroin use and perceived risk of heroin among nonmedical
   prescription opioid users
   V. R. Votaw1, K. McHugh1,3, 1McLean Hospital, Belmont, MA, 3Harvard Medical School,
   Boston, MA

95 Patient perspectives of transitioning from prescription opioids to heroin and the role of route of
   administration
   L. Monico, S. G. Mitchell, Friends Research Institute, Baltimore, MD

96 Defining problematic pharmaceutical opioid use among people prescribed opioids for chronic
   non-cancer pain: Different measures, same patients?
   G. Campbell5, R. Bruno2, M. Cohen3, W. Hall4, S. Nielsen5, N. Lintzeris1, B. Larance5,
   R. P. Mattick5, M. Farrell5, L. Degenhardt5, 1Langton Centre, Sydney, NSW, Australia,
   2School of Medicine, University of Tasmania, Hobart, TAS, Australia, 3Clinical School, St.
   Vincents, Sydney, NSW, Australia, 4Centre for Youth Substance Abuse Research, University
   of Queensland, Brisbane, QLD, Australia, 5National Drug and Alcohol Research Centre,
   UNSW, Sydney, NSW, Australia

97 A fully automated algorithm for identifying patients with problem prescription opioid use using
   electronic health record data
   D. Carrell1, J. Mardeki2, D. Cronkite1, A. Ramaprasan1, K. Hansen1, D. E. Gross2,
   R. E. Palmer2, E. Masters2, M. Von Korff2, 1Group Health Research Institute, Seattle, WA,
   2Pfizer Inc., New York, NY

98 Prescribing opioids safely in the emergency department study: Predictors of emergency
   department discharge with high morphine milligram equivalent prescription
   K. Hawk1, S. Weiner2, J. Dziura1, D. A. Fiellin3, D. DaEun4, L. Nelson5, J. Hoppe6, J. Perrone7,
   G. D’Onofrio1, 1Emergency Medicine, Yale University, New Haven, CT, 2Emergency
   Medicine, Brigham & Women’s Hospital, Boston, MA, 3Internal Medicine, Yale University,
   New Haven, CT, 4Harvard Medical School, Boston, MA, 5Emergency Medicine, NYU,
   New York, NY, 6Emergency Medicine, University of Colorado, Denver, CO, 7Emergency
   Medicine, University of Pennsylvania, Philadelphia, PA
Patterns of prescription drug use in Spain: The European opioid treatment patient survey
F. Fonseca, M. Torrens, M. Farré, J. L. Green, I. Maremmani, M. Guareschi, M. Auriacombe, N. Scherbaum, T. Clausen, R. C. Dart, RADARS System, Denver Health, Denver, CO, Institut de Neuropsiquiatria i Addiccions, Parc de Salut Mar, Barcelona, Spain, Addiction Psychiatry (CNRS USR 3413), Universite Bordeaux, Bordeaux, France, Institut Hospital del Mar d'Investigacions Mediques, PSMAR, Barcelona, Spain, Universitat Autònoma de Barcelona, Barcelona, Spain, Hospital Universitari Germans Trias i Pujol-IGTP, Badalona, Spain, Department of Neurosciences, Santa Chiara University Hospital, Pisa, Italy, Associazione per l’Utilizzo delle Conoscenze Neuroscientifiche a fini Sociali, Pietrasanta, Italy, Department of Psychiatry, LVR Clinic, Essen, Germany, Norwegian Centre for Addiction Research, Oslo, Norway, NHS Lanarkshire, Motherwell, United Kingdom

Alcohol, cannabis, and cigarette use and non-medical prescription drug use stages
B. J. Arterberry, S. R. Horbal, H. Lin, A. Buu, Indiana University, Bloomington, IN, University of Michigan, Ann Arbor, MI

Collaborative care for injured patients with prescription drug misuse: A feasibility study
L. K. Whiteside, D. Darnell, K. Jackson, D. Donovan, D. Zatzick, Division of Emergency Medicine, University of Washington, Seattle, WA, Psychiatry and Behavioral Sciences, University of Washington, Seattle, WA, Alcohol and Drug Abuse Institute, University of Washington, Seattle, WA

Acceptability and feasibility of an intervention for overdose and HIV risk during addictions treatment for patients with prescription opioid misuse
A. S. Bohnert, F. Blow, L. Thomas, M. Ilgen, Psychiatry, University of Michigan, Ann Arbor, MI

Change in overdose/poisoning diagnoses in patients prescribed oxycontin after its reformulation with abuse-deterrent properties
P. Coplan, A. Kadakia, R. Singh, A. DeVeaugh-Geiss, Risk Management and Epidemiology, Purdue Pharma, Stamford, CT, Purdue, Stamford, CT

Timing of sexual abuse, sexual risk behaviors and substance use among U.S. women
M. Cook, Integrated Substance Abuse Programs, University of California, Los Angeles, CA

Symposium XV

RISKY BUSINESS: NEUROBIOLOGICAL MECHANISMS OF RISKY DECISION MAKING IN DRUG ABUSE AND ADDICTION

Chairs: Shelley Su and Carlos Blanco

10:00 Dopaminergic modulation of frontal-amygdalar-striatal circuits subserving risk/reward decision making
Stan Floresco, University of British Columbia, Vancouver, BC, Canada

10:25 Risky decision making, cocaine self-administration, and dopamine signaling
Barry Setlow, University of Florida, Gainesville, FL

10:50 Linking neural networks to markers of dopamine signaling and risky decision-making in methamphetamine dependence
Milky Kohno, University of California, Los Angeles, CA

11:15 The danger of inadequate risk and reward processing in drug addiction
Martin P Paulus, Laureate Institute for Brain Research, Tulsa, OK

11:40 DISCUSSANT: Risky decision making: towards integrating basic and clinical perspectives
Carlos Blanco, NIH/NIDA/DESPR, Bethesda, MD
Thursday, June 16, 2016

Oral Communications 20

TRADING PLACES: RACE/SOCIO-ECONOMIC STATUS

Chairs: Debra Furr-Holden and Raymond L. Moody

10:00 Alcohol use among Native Americans compared to whites: Examining the veracity of the 'Native American elevated alcohol consumption' belief
J. K. Cunningham, T. A. Solomon, M. L. Muramoto, Native American Research and Training Center, University of Arizona, Tucson, AZ

10:15 Racial, ethnic and gender disparities in substance use at discharge
E. Guerrero, K. Fenwick, Y. Kong, H. Amaro, School of Social Work, University of Southern California, Los Angeles, CA

10:30 Emotion regulation moderates the relationship between perceived discrimination and risk behaviors in African American college students
A. M. Heads, L. G. Castillo, A. Glover, J. Schmitz, University of Texas HSC Houston, Houston, TX

10:45 The impact of discrimination on drug dependence among gay and bisexual men: A look at the role of emotion dysregulation
R. L. Moody, J. T. Parsons, C. Grov, Psychology, Graduate Center, City University of New York, New York, NY

11:00 Association between any major discrimination and current cigarette smoking among adult African American men

11:15 Environmental smoke exposure among daily smokers with low v.s. high educational attainment
J. W. Tidey, R. Denlinger, D. Hatsukami, E. Donny, Behavioral and Social Sciences, Brown University, Providence, RI

11:30 Diminished alternative reinforcement mediates socioeconomic disparities in adolescent substance use: A longitudinal study
N. Andrab, A. Leventhal, R. Khoddam, Institute for Preventive Medicine, University of Southern California, Los Angeles, CA

11:45 Perceived social support and socioeconomic status predict maternal delay discounting behavior and neural function in healthy postpartum women
L. K. Brents, J. Young, B. Knight, J. L. Coker, S. L. Ray-Griffith, Z. Stowe, G. A. James, C. Kilts, University of Arkansas for Medical Sciences, Little Rock, AR
**Oral Communications 21**

**Fiesta 6/8**

**10:00 - 12:00 PM**

**TRAINSPOTTING: OVERDOSE**

Chairs: Alexander Y. Walley and Amy Peacock

10:00 *Use of a prescription opioid registry to examine opioid misuse and overdose*

C. Campbell¹, A. Bahorik³, C. Weisner¹³, P. VanVeldhuisen², A. Rubinstein⁴, T. Ray¹,

¹Division of Research, Kaiser Permanente Northern California, Oakland, CA, ²The EMMES Corporation, Rockville, MD, ³Psychiatry, UCSF, San Francisco, CA, ⁴Anesthesiology, Kaiser Permanente, Santa Rosa Medical Center, Santa Rosa, CA

10:15 *Polypharmacy and non-fatal overdose in patients with HIV infection and substance dependence*

10:30 *Same-day use of opioids and depressants: A retrospective diary study*

A. Peacock⁵³, R. Bruno⁴, B. Larance⁴, N. Lintzeris¹, R. Ali², D. Oen³, O. Sotade³, N. White²,

¹Langton Centre, Sydney, NSW, Australia, ²University of Adelaide, Adelaide, SA, Australia, ³National Drug and Alcohol Research Centre, University of NSW, Sydney, NSW, Australia, ⁴University of New South Wales, Sydney, NSW, Australia, ⁵School of Medicine, University of Tasmania, Hobart, TAS, Australia

10:45 *Factors associated with nonfatal overdose among young opioid users: Heroin and benzodiazepine use, prescription opioid and heroin injection and HCV status*

P. Mateu-Gelabert¹, H. Guarino¹, D. Frank¹, K. Ruggles³, C. Syckes¹, E. Goodbody¹,

¹NYU, New York, NY, ²NYU, New York, NY

11:00 *Overdose risk behaviors during the period preceding non-fatal overdose events among veterans*

A. S. Bennett¹, E. R. Pouget², L. Elliott², A. Golub², A. Rosenblum², P. Britton³, ¹National Development and Research Institutes, New York City, NY, ²NDRI, New York, NY, ³NYU School of Medicine, New York, NY

11:15 *Integrating opioid overdose prevention in the emergency department*

R. McCormack, MD², C. Koziatek, MD², A. Rubin¹, L. O’Donnell², L. Nelson¹, ¹NYU School of Medicine, New York, NY, ²Ronald O. Perelman Department of Emergency Medicine, NYU School of Medicine, New York, NY

11:30 *Effect of local health department leadership on community overdose prevention coalitions*

A. A. Alexandridis, N. Dasgupta, C. Ringwalt, C. Sanford, A. McCort, Injury Prevention Research Center, University of North Carolina at Chapel Hill, Chapel Hill, NC

11:45 *Help-seeking among community responders trained in overdose prevention and naloxone administration*

A. Y. Walley¹, J. Sisti⁴, L. Forman², S. Ruiz⁵, Z. Xuan², ¹BU School of Med, Boston, MA, ²BU School of Public Health, Boston, MA, ³Mass Dept of Public Health, Boston, MA, ⁴Harvard School of Public Health, Boston, MA
Oral Communications 22

COCAINE COWBOYS: CLINICAL STUDIES

Chairs: William W. Stoops and Margaret Haney

10:00 Changes in brain white matter integrity after PPAR-gamma agonist treatment for cocaine use disorder
S. D. Lane¹, K. M. Hasan³, B. Mwangi¹, P. A. Narayana³, J. Vincent¹, F. Moeller⁴, J. Steinberg⁴, K. Dineley³, K. A. Cunningham², J. Schmitz¹, ¹Psychiatry & Behavioral Sciences, University of Texas Health Science Center - Houston, Houston, TX, ²Center for Addiction Research, University of Texas Medical Branch, Galveston, TX, ³Neurology, University of Texas Medical Branch, Galveston, TX, ⁴Institute for Drug and Alcohol Studies, Virginia Commonwealth University, Richmond, VA, ⁵Diagnostic and Interventional Imaging, University of Texas Health Science Center - Houston, Houston, TX

10:15 Modafinil reduces cocaine self-administration in humans: Effects vary as a function of cocaine 'priming' and cost
M. Haney¹, E. Rubin², R. Foltin¹, ¹Psychiatry, Columbia University Medical Center, New York, NY, ²Psychiatry, Harlem Hospital, New York, NY

10:30 Safety and tolerability of cocaine during phendimetrazine maintenance
W. W. Stoops¹,²,³, J. A. Lile¹,²,³, L. R. Hays³, A. O. Rayapati³, C. R. Rush¹,²,³, ¹Behavioral Science, University of Kentucky, Lexington, KY, ²Psychology, University of Kentucky, Lexington, KY, ³Psychiatry, University of Kentucky, Lexington, KY

10:45 Effect of a glucocorticoid receptor antagonist - mifepristone - on relapse risk in cocaine-dependent men
W. N. Raby¹,², F. R. Levin¹, E. V. Nunes¹, ¹Psychiatry, Columbia University, New York City, NY, ²Psychiatry, Albert Einstein College of Medicine, Bronx, NY

Oral Communications 23

BUFFALO SOLDIERS: OPIOID PRECLINICAL STUDIES

Chair: Hsiao-Ying Wey

11:15 Pharmacological characterization of the opioid inactive isomers (+)-naltrexone and (+)-naloxone as toll-like receptor 4 antagonists
X. Wang, Chemical Biology Laboratory, Changchun Institute of Applied Chemistry, Chinese Academy of Sciences, Changchun, China

11:30 Simultaneous PET/MRI of static and dynamic functional connectivity to opioids
H. Wey, B. R. Rosen, J. B. Mandeville, Martinos Center for Biomedical Imaging, Department of Radiology, Massachusetts General Hospital, Harvard Medical School, Boston, MA

11:45 Individual differences in heroin reward perception in C57BL/6 mice
C. Wincott, B. Reed, V. Yuferov, M. Kreek, Laboratory of the Biology of Addictive Diseases, The Rockefeller University, New York, NY

12:00 Remifentanil vs. food choice under a dependent schedule
J. J. Chow, J. S. Beckmann, Psychology, University of Kentucky, Lexington, KY
Thursday, June 16, 2016

BRUNCH WITH CHAMPIONS  
(PRE-REGISTRATION ONLY)  

Oral Communications 24  

REEFER MADNESS: CANNABIS AND CANNABINOIDS  

Chairs: Jan Copeland and Staci Gruber

1:15  
Serotonergic responsiveness after repeated exposure to the synthetic cannabinoid JWH-018  
J. S. Elmore, M. H. Baumann, IRP, NIDA, NIH, Baltimore, MD

1:30  
Cannabidiol attenuates a spatial working memory impairment caused by THC in monkey  
M. A. Taffe1, C. Glavis-Bloom2, J. D. Nguyen1, 1CNAD, The Scripps Research Institute, La Jolla, CA, 2SRI, International, Menlo Park, CA

1:45  
Splendor in the Grass? A pilot study assessing the impact of medical marijuana on cognition  
S. Gruber1, 2, M. Dahlgren1, 3, K. Sagar1, A. Gonenc1, 2, M. Racine1, R. Smith1, S. E. Lukas2, 4,  
1Cognitive & Clinical Neuroimaging Core, McLean Hospital - Imaging Center, Belmont, MA,  
2Department of Psychiatry, Harvard Medical School, Belmont, MA, 3Department of Psychology, Tufts University, Medford, MA, 4Behavioral Pharmacology Research Lab, McLean Hospital, Belmont, MA

2:00  
Sleep-related problems in adults receiving medical cannabis  
M. Ilgen2, 1, K. Bohnert2, 1, 1Psychiatry, University of Michigan, Ann Arbor, MI, 2VA Center for Clinical Management Research (CCMR), Ann Arbor, MI

2:15  
Reductions in traffic fatalities rates across states with operational dispensaries of marijuana  
J. Santaella1, C. Mauro2, M. M. Wall2, J. H. Kim1, S. S. Martins1, 1Epidemiology, Columbia University, New York City, NY, 2Biostatistics, Columbia University, New York, NY

2:30  
Illicit drug use among young adult marijuana users in Los Angeles: Implications for medical use  
E. V. Fedorova, S. E. Lankenau, Community Health and Prevention, Drexel University, Philadelphia, PA

2:45  
The relationship of age to cannabis use and motives for use among medical cannabis dispensary patients  
J. E. Sottile1, N. A. Haug1, C. B. Padula2, A. Heinz2, 3, M. O. Bonn-Miller2, 3, 1Palo Alto University, Palo Alto, CA, 2Psychiatry, VA Palo Alto Health Care System, Palo Alto, CA, 3Center of Excellence in Substance Abuse Treatment and Education, VA Palo Alto Health Care System, Menlo Park, CA

3:00  
Comparison of brief versus extended feedback in an online intervention for cannabis users: A randomised controlled trial  
J. Copeland2, S. Rooke1, L. Gibson2, 1Nil, Sydney, NSW, Australia, 2National Cannabis Prevention and Information Centre, University of NSW, Sydney, NSW, Australia
Oral Communications 25

200 CIGARETTES: NICOTINE

Chairs: Yasmin Mashhoon and Elias M. Klemperer

1:15  
**Increased nicotine exposure decreases sensitivity to the nicotine-like effects of AChE inhibitors in monkeys discriminating nicotine**  
M. J. Moerke, L. McMahon, Pharmacology, University of Texas Health Science Center, San Antonio, TX

1:30  
**Effects of chronic nicotine treatment and discontinuation on nicotine self-administration**  
S. Kohut, C. Barkin, J. Bergman, McLean Hospital/Harvard Medical School, Belmont, MA

1:45  
**Repetitive transcranial magnetic stimulation of the dorsal lateral prefrontal cortex inhibits medial orbitofrontal activity in smokers**  
X. Li¹, G. Sahlem¹, C. A. Hanlon¹, K. J. Hartwell¹, B. Badran¹, S. Henderson¹, M. George¹,², ¹Department of Psychiatry and Behavioral Sciences, Medical University of South Carolina, Charleston, SC, ²Psychiatry, Ralph H. Johnson VA Medical Center, Charleston, SC

2:00  
**A behavioral and neurophysiological examination of the impact of smoking abstinence on drug and non-drug reinforcement**  
N. Schlienz¹,², L. Hawk², ¹Psychiatry and Behavioral Sciences, The Johns Hopkins University School of Medicine, Baltimore, MD, ²Psychology, State University of New York at Buffalo, Amherst, NY

2:15  
**Nicotine withdrawal induces neural and behavioral deficits in reward processing**  
J. Oliver¹, D. E. Evans², M. Addicott¹, T. Brandon², D. J. Drobes², ¹Psychiatry and Behavioral Sciences, Duke University, Durham, NC, ²Health Outcomes and Behavior, Moffitt Cancer Center, Tampa, FL

2:30  
**The effects of nicotine administration and drug cue on impulsivity**  
S. Martinez¹,²,³, J. D. Jones¹, A. Bisaga¹, S. D. Comer¹, ¹Division on Substance Abuse, New York State Psychiatric Institute and Department of Psychiatry, College of Physicians and Surgeons, Columbia University, New York, NY, ²Derner Institute of Advanced Psychological Studies, Adelphi University, Garden City, NY, ³Translational Research Training Program in Addiction, City College of New York, New York, NY

2:45  
**Reduction in cigarettes per day prospectively predicts quit attempts and cessation in smokers who are not ready to quit**  
E. M. Klemperer, J. Hughes, Psychiatry and Psychological Sciences, University of Vermont, Burlington, VT

3:00  
**Early age of cigarette smoking onset is associated with greater P300 smoking cue reactivity**  
Y. Mashhoon¹, J. Betts², S. L. Farmer², S. E. Lukas¹, ¹McLean Imaging Center, Harvard Medical School | McLean Hospital, Belmont, MA, ²McLean Imaging Center, McLean Hospital, Belmont, MA
SWEEPSTAKES DRAWING

YOU MUST BE SEATED IN ONE OF THE SESSIONS STARTING AT 1:15 PM IN ORDER TO HAVE YOUR BADGE COLLECTED

HAVE A SAFE TRIP HOME!

SEE YOU IN MONTREAL, CANADA, JUNE 17-22, 2017

President’s Symposium

TITLE: Where There’s Smoke: U.S., Australasian, and European Cannabis Policies and Use

AUTHOR: Deborah Hasin\textsuperscript{1,2}
INSTITUTIONS: \textsuperscript{1}Columbia University; \textsuperscript{2}New York State Psychiatric Institute
Americans increasingly see marijuana as a harmless substance and favor its legalization; changes in state laws regarding marijuana reflect these changing attitudes. Time trends in adolescent marijuana use are reviewed, and the strength of evidence examined for a relationship between medical marijuana laws and adolescent use. Increases over time in adult marijuana use, marijuana use disorders and other marijuana-related consequences are also reviewed, for the population as a whole and within major population subgroups.

AUTHOR: Alison Ritter\textsuperscript{3}
INSTITUTION: \textsuperscript{3}University of New South Wales
Cannabis use in Australia has been one of the highest in the world, yet cannabis policies in Australia have not substantially changed and there is little appetite for a less prohibitionist approach (for example, as of 2013, only 26\% of the population supported cannabis legalisation). Given policy stasis in Australia, it is interesting to reflect on possible drivers for changing cannabis prevalence (which has decreased from 18\% last year use in 1998 to 10\% last year use in 2013). Factors such as attitudes to smoking, and/or awareness of health effects, may be more important than formal drug policies in driving changes in cannabis prevalence rates.

AUTHOR: Marc Auriacombe\textsuperscript{4,5,6}
INSTITUTIONS: \textsuperscript{4}University of Bordeaux (France); \textsuperscript{5}CH Ch. Perrens and CHU Bordeaux, France; \textsuperscript{6}University of Pennsylvania
Marijuana regulations across European countries vary wildly regarding both what is permitted and what is not. There are also significant differences across countries in enforcement of cannabis laws. This gives us an opportunity to examine data available in the different countries in relation to each country’s specific regulations. Prevalence of overall use in adolescents and adults, as well as estimates of problem use will be reviewed in this perspective.
SYMPOSIA

Sunday, June 12

I. Developing innovative brain stimulation treatment options for substance-dependent individuals: Translating basic science knowledge of neural circuits to our clinics
   Chairs: Colleen Hanlon and Antonello Bonci

In the last decade we have become increasingly aware of the role that frontal-striatal circuits have on drug-taking behavior and relapse. Using elegant molecular techniques, we are able to change drug-taking behavior by modulating these circuits. Until recently, however, there were no techniques available to modulate these circuits in our patients. Developing brain stimulation as a treatment option for addiction is one of the goals of NIDA’s new strategic plan. SPECIFIC AIMS: We will introduce transcranial magnetic stimulation (TMS), provide a theoretical model for approaching addiction treatment, and highlight current TMS research in a diverse population of patients with substance use disorders (SUD). APPROACH: First, we will describe a theoretical framework for selecting neural circuit based targets likely to be fruitful candidates for SUD treatment. This will be followed by presentations from several laboratories that are evaluating the efficacy of TMS as a tool to decrease craving and/or increase cognitive control in alcoholics, nicotine smokers, prescription opiate users, and cocaine users. Each of these presentations will highlight both the successes and the challenges they faced when applying these techniques to patients. Finally, we will return to the theoretical model and describe links to both basic science research as well as pragmatic issues required to bring TMS to outpatients.

II. Influence of metabolic hormones on reward processing and addiction
   Chairs: Arbi Nazarian and Minda Lynch

Peripherally based metabolic hormones play significant roles in regulation of homeostatic feeding and satiation systems, with their dysregulation leading to conditions such as obesity and diabetes. More recent examinations have revealed that metabolic hormones are also active modulators of natural hedonic processing for food, as well as modulators of reward processing to drugs of abuse by acting within the mesocorticolimbic system. Understanding the neurobiological mechanisms of metabolic hormones can shed light on the contribution of these hormones on reward signaling in the brain and facilitate development of novel therapeutic approaches for the treatment of drug and food addiction. In this symposium, findings will be presented demonstrating the modulatory role of metabolic hormones in alcoholism in humans, rodent models of nicotine and cocaine abuse, as well as food intake. The aim of this symposium is to 1) introduce the audience to metabolic hormones, as modulators of reward processing; 2) develop an understanding of the intricate interaction of the peripheral endocrine system with reward signaling; and 3) encourage consideration and investigation of the influence of metabolic hormones in studies of addiction.
III. Identifying system-level biomarkers of substance abuse using functional connectivity of the brain
Chairs: Yihong Yang and Elliot Stein

Substance abuse is a complex neuropsychiatric disorder manifested as dysregulations of multiple cognitive and affective constructs. Recent advances in neuroimaging have shown promise in identifying system-level biomarkers that are closely associated with the behavioral phenotype and may be potentially useful for individualized treatment and predicting therapeutic outcome. In particular, brain functional connectivity, derived from the synchronized fluctuations of the resting-state functional MRI signal between brain regions, has undergone rapid technological developments and consequently as a noninvasive imaging tool to assess neuroplasticity of brain circuits and networks in various neuropsychiatric disorders. In this symposium, we will present the latest developments in identifying imaging biomarkers of substance use disorders using functional connectivity. The four speakers will present recent data from their labs using a number of analytical approaches to understand the circuitry underlying the abuse profile of cocaine, marijuana, alcohol and nicotine. Finally, these recent developments will be discussed in view of emerging theory related to drug-induced imbalance of neuronal circuits. We will also discuss the potential value of these imaging biomarkers 1) as therapeutic targets; 2) in the prediction of group or subgroup membership and monitoring of treatment outcomes; and 3) in translational and “back-translational” studies using preclinical models.

IV. Cognitive function as a novel treatment target for drug addiction
Chairs: Mehmet Sofuoglu and Kathleen Carroll

The aim of this symposium is to review the promise of cognitive function as a novel target for behavioral and pharmacological treatments for drug addiction. Results will be presented showing that oral methylphenidate enhances performance and underlying fronto-striatal function on tasks of inhibitory control and drive, and resting-state functional connectivity, in cocaine addiction. Data will be shown from randomized trials designed to determine whether engagement in daily technological enhancements (interactive voice response or smartphone app), as a cognitive-enhancement strategy, and brief interventions to reduce drug use were more effective than brief interventions alone among drug users treated in HIV comprehensive care settings. Following a brief overview of the potential utility of attentional retraining interventions for addictions that aims to reverse attentional bias to drug cues, and therefore cue-provoked craving and drug use, recent data in which cognitive biases for cigarette smoking are assessed and modified on mobile devices will be presented. Findings will be presented from a recently completed clinical trial that tested efficacy of a cognitive enhancer, galantamine (a cholinesterase inhibitor) and computerized cognitive behavioral therapy (CBT4CBT), alone and in combination, on treatment outcome and cognitive functioning among cocaine users. A discussion of the implications of these findings for developing novel treatment approaches for drug addiction and providing future research directions will conclude the symposium.
V. Identifying system-level biomarkers of substance abuse using functional connectivity of the brain
Chairs: Margaret Gnegy and John Traynor

Substance abuse is a complex neuropsychiatric disorder manifested as dysregulations of multiple cognitive and affective constructs. Recent advances in neuroimaging have shown promise in identifying system-level biomarkers that are closely associated with the behavioral phenotype and may be potentially useful for individualized treatment and predicting therapeutic outcome. In particular, brain functional connectivity, derived from the synchronized fluctuations of the resting-state functional MRI signal between brain regions, has undergone rapid technological developments and consequently as a noninvasive imaging tool to assess neuroplasticity of brain circuits and networks in various neuropsychiatric disorders. This symposium will present the latest developments in identifying imaging biomarkers of substance use disorders using functional connectivity. Recent data will be presented using a number of analytical approaches to understand the circuitry underlying the abuse profile of cocaine, marijuana, alcohol and nicotine. These developments will be reviewed in light of emerging theory related to drug-induced imbalance of neuronal circuits. In addition, the potential value of imaging biomarkers will be discussed as therapeutic targets; in the prediction of group or subgroup membership and monitoring of treatment outcomes; and in translational and “back-translational” studies in preclinical models.

VI. Intracellular signaling molecules as targets for stimulant abuse treatment
Chairs: Heather Kimmel and Paul W. Czoty

Epidemiological data suggests that poly-substance use, the use of more than one drug over a period of time, is common; yet basic and clinical research typically examine the consequences of a single drug at a time. Polysubstance users have an increased risk of developing comorbid psychiatric and other health conditions. Current prevention and treatment approaches are under-developed, indicating a need to understand the antecedent and consequential circumstances surrounding polysubstance use. This symposium will showcase current epidemiological, clinical, and basic research findings describing current polysubstance use trends and subsequent health outcomes. We will describe recent polysubstance use findings from two different nationally representative cross-sectional studies of youth and adults. Building upon these cross-sectional data, we will discuss novel longitudinal research tracking polysubstance use from adolescence through young adulthood. A clinical perspective will be provided, presenting neuroimaging and neurocognitive data to demonstrate differing cognitive outcomes in alcohol dependent individuals who also use stimulants compared to alcoholics that do not use stimulants. Data will demonstrate that serial alcohol and methamphetamine administration in rodents exacerbates the neurotoxic effects of either drug alone. The discussion will integrate these data to discuss how these findings inform each other. Bringing these diverse perspectives together will facilitate discussions of how epidemiological data can inform basic animal and clinical research and, conversely, how findings from basic and clinical research can guide epidemiological research.
VII. 5HT2A and 5HT2C ligands as potential therapeutics for substance use disorders
Chairs: Jane B. Acri and Leonard Howell

We will present and discuss data relevant to the clinical advancement of 5HT2 ligands as substance use treatment medications. There are no approved medications for cocaine, methamphetamine, or THC use disorders, and these results may suggest clinical efficacy for substance use disorders. The 5HT system can influence the abuse-related effects of cocaine and other drugs of abuse through its direct and indirect interactions with dopaminergic systems in key brain areas. The regional distribution of 5HT2A and 5HT2C involve the prefrontal cortex, the nucleus accumbens and the ventral tegmental area. The two receptor systems can functionally oppose each other in terms of their regulation of the dopaminergic signaling. Several selective ligands have recently been developed by pharma for different indications; lorcaserin a 5HT2C agonist is in clinical use for weight reduction, and pimavanserin, a 5HT2A antagonist may soon be approved for the treatment of psychosis in Parkinson’s Disease. Clinical availability of selective ligands will greatly enhance our ability to translate these findings in human clinical trials. These compounds have recently been evaluated in drug self-administration models using non-human primates trained to self-administer cocaine, methamphetamine, or THC, using FR, PR, or choice models. These results will be presented and discussed in terms of relevance to the treatment of substance use disorders.

VIII. Neonatal Abstinence Syndrome: Context and consequences in 2016
Chairs: Karol Kaltenbach and Hendree Jones

Under the banner of fetal protection, judges and prosecutors have implemented punitive approaches against women who use prescribed and non-prescribed opioids during pregnancy. Policy makers mirror such punitive approaches in laws passed that focus on women who use drugs while pregnant. The symposium will review the current situation for women who use substances during pregnancy and their NAS-diagnosed babies. These actions in the judicial-political sphere suggest that the science of NAS is well understood. While there are numerous reports in the empirical literature documenting efforts to assess and treat NAS over the past 50 years, rigorous studies testing the best ways to assess and treat these infants are relatively recent as are studies that identify factors that exacerbate or mitigate the severity of NAS. The state of the science in assessment; efficacy of medication used to treat NAS; and protocols for initiation of treatment and weaning will be described. Factors that have been recently been identified that exacerbate the severity and length of treatment as well as changes in hospital policies and practices that been shown to be effective in reducing NAS severity will be discussed. These presentations will outline how a diagnosis of NAS is not a diagnosis of maternal substance use disorder; an indication of a negative relationship between substance use and fetal outcome.
Among human children and adolescents, externalizing behaviors, including impulsivity and risk-taking, predict adolescent and adult substance use disorders. Our translational studies of substance-naive human and non-human subjects suggest that aberrant brain function underlies aberrant early behaviors and reflects a neural vulnerability to substance use disorders. An imbalance in the cortical glutamatergic system as an underpinning of inherent impulsivity in rodents may be driven by dysregulation of N-methyl-D-aspartate receptor signaling and selective NMDAR potentiation may reduce high inherent impulsivity. Earlier work demonstrating that in a risky-decision game, adolescents with substance and conduct problems (SCP) had widespread brain hypoactivity will be extended to the same game-stimulated neural activity in numerous brain regions of drug-naive 9-11 year-olds. Correlation with participants' parent-rated externalizing scores suggests that aberrant brain function antedates, and may contribute to, SCP in many adolescents. Data from the IMAGEN study, a longitudinal cohort of 2200 adolescents who underwent genetic, neuroimaging and behavioral assessments, will be presented. Correlates of factors of psychopathology within a hierarchical structural model associated with psychiatric conditions, including substance use disorder, will be shown. This panel will emphasize that a greater understanding of the vulnerability to the development of substance use disorders requires the cross-talk and contribution of cross-discipline, cross-species studies.

The Precision Medicine Initiative was announced by President Obama in the 2015 State of the Union address, and was subsequently described by Francis Collins & Harold Varmus (NEJM, 2015) as “prevention and treatment strategies that take individual variability into account.” Because biological sex is the most fundamental difference among individuals, studying differences in outcomes between men and women is low-hanging fruit in achieving precision medicine. Speakers in this symposium will present sex differences in neuroimaging data that are providing a window on potential targets, both behavioral and pharmacologic, to enhance precision medicine, from both prevention and treatment perspectives. A brief review of sexual dimorphism in brain structure and connectivity in healthy people will precede discussion of sex-specific differences in cortical and subcortical gray-matter volume and correlated drug use and behavioral measures in long-term abstinent stimulant users. Data from the PET image analysis, lp-ntPET, will be shown, which can provide real-time ‘movies’ and quantification of dopamine release during smoking, and has revealed sex differences in dopamine release in the ventral striatum and dorsal putamen and its relationships to mood and reward in smokers. Also presented will be data from males and females with substance use disorders, with and without trauma histories, comparing their resting-state functional connectivity, their response to pharmacologic probes of neural systems, and their response to drug-related cues.
Tuesday, June 14

XI.  *Not your average joint: Alternative methods of cannabis consumption*
    Chairs: Adam Leventhal and Marcel O. Bonn-Miller

With increasing legalization of cannabis, there has been a proliferation of the number and types of cannabis preparations and drug delivery devices available on the market. Consequently, smoking cannabis is no longer the exclusive route of cannabinoid consumption prominent in the population. Oral consumption of edible cannabis products, transdermal application of topical cannabinoid ointments, and vaporization of cannabis plant, oils, and liquid extracts via e-cigarettes and other electronic devices are becoming increasingly popular. Unfortunately, many drug dependence researchers, clinicians, and policy makers are unaware of this trend and the emerging science on alternative routes of cannabis administration. This symposium synthesizes laboratory, clinical, and population-based research on the pharmacology, clinical correlates, and epidemiology of cannabis consumption via alternative routes. Human laboratory research on the acute pharmacokinetic and pharmacodynamic dose-effects of oral cannabis will be presented and contrasted to prototypical drug effect profiles of cannabis smoking. Clinical research pertaining to use of various cannabis preparations among cannabis-dependent individuals and patients using for therapeutic and recreational purposes will be discussed. Survey data characterizing cannabis vaping in adolescent and adult cannabis users will be presented. Also discussed will be the epidemiology of cannabis use by route of consumption and novel data on the prevalence and mental health correlates of adolescent cannabis vaping and use of edible cannabis products. The session will close with a discussion of translation across basic, clinical, and epidemiologic perspectives, and implications for regulation.

Wednesday, June 15

XII.  *Medicinal chemistry of novel kappa opioid receptor ligands*
    Chairs: F.I. Carroll and Thomas Prisinzano

Every since the discovery of the potent and selective kappa opioid receptor antagonists nor-BNI and kappa opioid receptor agonist such as U69,593 as well as other antagonists and agonists of this receptor system there has been continuing interest in basic medicinal chemistry studies that this receptor plays in numerous biological processes. Animal behavioral studies have shown that both antagonists and agonists have high potential for treating substance abuse (nicotine, alcohol, cocaine, methamphetamine and opiates) as well as other CNS disorders (depression, anxiety, attention deficit hyperactivity disorder, pain, and others). This symposium will provide information concerning newer kappa opioid receptor ligands for treating substance abuse. The presentations will include studies directed towards 1) the effect of substitution for the tryptophan residue in the natural product CJ-15,208; 2) a better understanding of the medicinal chemistry properties of salvinorin A and analogs; 3) the optimization of biased kappa opioid receptor ligands; and 4) the effect of changing the 3,4-dimethyl-4-(3-hydroxyphenyl)piperidine part of JDTic on its medicinal chemistry properties. The basic medicinal chemistry research information presented in these four presentations will provide a better understanding of how the kappa opioid receptor target will lead to potential pharmacotherapies for treatment of various substance abuse problems and other CNS disorders.
SYMPOSIA

Wednesday, June 15

XIII:  *Bio-behavioral research on HIV among people who use drugs*  
Chairs: Christina S. Meade and Adam W. Carrico

Since the beginning of the HIV/AIDS epidemic, drug users have been at increased risk for HIV infection and transmission, both through risky injection drug practices and risky sexual behaviors. As the epidemic has evolved, drug users have faced increasing disparities related to HIV testing treatment, and retention in care— with correspondingly poorer clinical and psychosocial outcomes. Moreover, drug addiction can interfere with HIV treatment outcomes, both directly through biological processes and indirectly through difficulties with HIV disease management. With the goal of an AIDS-free generation, funding priorities now emphasize biomedical approaches. However, behavioral research remains critical to ensure that all individuals - no matter how difficult to reach - can derive the maximum benefits from new biomedical treatments to reduce the transmission of HIV and effectively manage HIV-associated comorbidities. This symposium highlights major advances from interdisciplinary research teams led by behavioral scientists. The presentations cover bio-behavioral approaches to identifying behavioral risks among high-risk groups, neurocognitive impacts on decision-making processes relevant to HIV risk, and multi-component interventions to reduce risk of HIV transmission and improve HIV-related outcomes. The discussant will review the results of these studies in light of new NIH priorities for HIV/AIDS research among persons who use and abuse drugs.

XIV:  *Reducing the harms of opioid analgesic use in health systems*  
Chairs: Amy Bohnert and Tae Woo Park

Reducing the harms of opioid medications used in the treatment of pain has become a major priority of health systems, public health agencies, and policymakers. Because opioid prescribing has been linked to overdose and misuse on a population and individual level, improving treatment practices is a major focus of efforts to address this problem. We will report emerging evidence related to efforts to reduce the harms of opioids in treatment settings. Patients in addictions treatment settings will represent a group of particular attention for several of the studies reported. One avenue of health system-based prevention is to use information readily in electronic medical records to identify those patients receiving opioids at greatest risk for harm. We will present on patient and treatment characteristics associated with opioid misuse in a military population as well as overdose specifically among addictions treatment clients. We will seek to further elucidate risk reduction strategies through qualitative interviews with health care providers. This will include examining the feasibility of a military prescription drug monitoring program. Additionally, a series of interviews with primary care providers and pharmacists will explore their decision-making processes when balancing the benefits and risks of prescribing and dispensing opioids for chronic non-cancer pain. We will also report on use of non-pharmacological pain management strategies among individuals with comorbid chronic pain and substance use disorders to explore avenues for reducing reliance on opioids for analgesia. The discussion will focus on the translation of these findings to patient-, provider-, and system-level interventions.
Thursday, June 16

XV:  *Risky business: Neurobiological mechanisms of risky decision making in drug abuse and addiction*

Chairs: Shelly Su and Carlos Blanco

Individuals with substance use disorders exhibit deficits in executive function, including the inability to think flexibly, to update and manipulate information, and to inhibit choices and actions that are irrelevant to the current goals. New and exciting findings indicate a relationship between drug abuse vulnerability and risk preference, or the preference for an uncertain delivery of a large reward over certain delivery of a small reward. The purpose of this symposium is to showcase this emerging area of research and highlight the neural circuitry subserving drug-induced risky decision making in basic animal and human-based laboratory research. The symposium will begin with data characterizing the neural systems that integrate information regarding cost/benefit analysis in a probabilistic discounting task in healthy, drug-naïve rodents. Building upon this neural circuitry, evidence will be presented for a bi-directional relationship between risky decision making and cocaine self-administration in rodents and the contributions of dopamine signaling to this association. Behavioral and neuroimaging data from healthy and methamphetamine-dependent participants engaging in the Balloon Analog Risk Task, which parallels the same cognitive deficits and neural networks observed in rodent models, will be presented. A translational perspective and data on altered risk perceptions and changes in neural patterns of activity in drug-dependent individuals will be discussed.
WORKSHOPS

Sunday, June 12

I. Navigating key stages of a career in addiction science: Graduate school, post-doc and early-career
   Chairs: Teresa Franklin and Denise Vidot

You are a budding addiction-focused Investigator with new ideas, new techniques and new approaches and— you are presenting a poster or a talk at CPDD— maybe this is your first, or your third, but it is an important moment in your career— Congratulations! In addition to presenting your work, the opportunities to learn and network at CPDD are monumental! For example, this workshop, which will focus on issues specific to 3 key stages in your early career, Pre-Doctoral, Post-Doctoral, and Early Career/Faculty, could be helpful to you. Three of your colleagues, who have 'Been There, Done That' want to share their experiences with you. Each presentation will outline steps that can be taken to maximize your career stage-specific experience and make you a competitive job applicant for the next stage of your career. Examples of topics that will be covered include how to choose your mentors; striking a balance between executing your mentor’s vision and growing as an independent scientist; how to narrow down an innovative and significant research question; publishing amidst other responsibilities; obtaining grant-writing experience; applying for awards; establishing your niche and conveying its importance to potential employers; collaborating and networking; deciding whether to teach; life-work balance; finding the NIH funding mechanisms that are most appropriate for you; how to begin writing your grant; and crucial to it all - time management strategies.

II. The landmark Adolescent Brain Cognitive Development Study (ABCD): A detailed discussion of the study goals, methodologies, and project start-up
   Chairs: Susan R.B. Weiss and Margaret M. Murray

Adolescence, a time of dramatic physical, emotional, and intellectual growth, is a developmental period that sets the foundation for an individual's life trajectory. While advances in brain imaging and cognitive neuroscience are providing insights into the developing brain, to date, few studies have been able to capture the factors that influence this development over time in large and diverse populations. Children and adolescents are exposed to myriad internal and external influences that interact with their changing biology and genetic and environmental vulnerabilities that affect their development. To gain better understanding of brain, cognitive, social, and emotional development trajectories from childhood through adolescence; the NIH launched the landmark ABCD in the fall of 2015. This unparalleled prospective, longitudinal, multi-site study will combine developmental psychology, neuroimaging, cognitive neuroscience, genetics, and epidemiology with advanced techniques in bioassays, bioinformatics, and mobile assessment to follow 10,000 9-10-year-olds recruited at 19 sites around the country. This workshop brings together representatives from the ABCD Research Consortium leadership to present the goals of the study, assessments and technologies being used to address these goals, and sampling methodology designed to recruit and retain subjects with multiple dimensions of diversity (i.e., race, ethnicity, education, urban and rural environments). Project start-up information will also be shared. Findings from ABCD are expected to increase the ability to distinguish environmental, sociocultural, and genetic factors relevant to substance use and brain development and to inform prevention, treatment, and public health strategies.
WORKSHOPS

Sunday, June 12

III. Emerging technology for human subjects research
Chairs: Jonathan JK Stoltman and Edward Nunes

The College on Problems of Drug Dependence Committee on Human Research presents a practical workshop that includes human researchers of both junior and senior status with diverse interests within the substance abuse field. The workshop is positioned to benefit both junior and senior investigators in the audience by exposure to new technology. In addition, roughly a third of the time will be a question-and-answer session with discussion regarding ethical and legal issues facilitated by an expert senior discussant. The workshop will provide all attendees with different perspectives and best practices at other universities, thereby enhancing translation from the workshop to real world implementation. The basic workshop design includes brief description of new technology, the opportunities they hold, and the challenges we might face implementing them. Summaries will be provided for popular and novel technologies for human subject research. The workshop is designed to cover technology throughout the research stages of reaching IRB approval; recruiting; and data collection. Specifically, two popular methods of online recruitment and data collection will be discussed (Amazon Mechanical Turk and Facebook), HIPAA, technology to deliver interventions, and technology monitoring in ecological environments. A variety of technology and substance-using populations will be covered.

IV. International emergence and abuse of new psychotropic substances (NPS), their toxicity and the current regulatory response
Chairs: Patrick Beardsley and Jane C. Maxwell

New psychotropic substances (NPS) of abuse continue to emerge and cause harm worldwide. Commonly associated NPS drug classes have been the synthetic cannabinoids and cathinones, but newly emerging benzodiazepines, dissociative anesthetics and opioid and opioid-mimicking drugs have recently added to this onslaught. Not only is their number and diversity a challenge, but also their transience, detection and geographical heterogeneity, which provide special issues to health practitioners and regulatory authorities relative to more established abused drugs. The fact that their availability and supply are often mediated through the diffuseness of the Internet compounds the problems of their control. The specific aims of this workshop are to illuminate the international diversity of the NPS problem, the harm they cause, and how regulatory authorities are responding to their challenge. Hopefully, this information will better alert and inform those practitioners confronting NPS health issues, and enkindle interest in their research by scientists. The workshop will address forensic challenges associated with NPSs and their toxicology, present an international canvas of the NPS problem, focusing on the NPS story in Australasia, Europe and the United States. It will conclude with a summary of the presented topics and a focus on the international regulatory response in its attempt to control the NPS problem.
V. Epidemiology and public health research methods
Chairs: James Anthony and Jan Copeland

This workshop will begin with an overview of high priority program announcements for the NIDA Division of Epidemiology, Service, and Prevention Research (DESPR), DESPR funding opportunities, and DESPR-initiated data archives for public and restricted use epidemiological datasets. Then, we turn to some innovations in statistical estimation and inference for prevention, health services, and treatment research when randomization is not possible (e.g., estimation of the effects of childhood-onset cannabis use in relation to brain imaging outcomes). The final segment of the workshop will be a chair-organized and chair-led but generally open discussion about the promise and pitfalls of using data from Google Trends, Facebook, Twitter, and other social media in NIDA, NIAAA, NCI, and FDA epidemiology and public health research on nicotine products, cannabis products, and related topics.

Monday, June 13

VI. 21st Annual Contingency Management Working Group
Chairs: Diann Gaalema and Kelly Dunn

The Contingency Management (CM) Working Group, held annually during the CPDD convention, is an opportunity for the dissemination and discussion of current research regarding the use of CM interventions to promote behavior change and reduce drug use. CM is a behavioral treatment strategy that has demonstrated consistent success in promoting abstinence from a wide-range of drugs and across many ars different treatment populations. It is also being used to promote change in behaviors impacting the course of other chronic diseases (e.g., obesity, diabetes). At the 21st Annual Meeting of the CM Working Group, junior and senior researchers will present preliminary data from ongoing studies involving CM. The goal for this working group is to provide an informal outlet for discussion of ongoing CM research, with an emphasis on developing or improving research strategies by seeking audience input, and providing opportunities for junior and senior researchers to interact.
WORKSHOPS

Monday, June 13

VII. **Introducing the National Drug Early Warning System (NDEWS)**
    Chairs: Eric D. Wish and Moira O’Brien

In 2014, the National Institute on Drug Abuse (NIDA) funded the Center for Substance Abuse Research (CESAR) at the University of Maryland, College Park, to serve as the Coordinating Center for its new National Drug Early Warning System (NDEWS). NDEWS builds on the infrastructure of a successful earlier NIDA project, the Community Epidemiology Workgroup (CEWG). NDEWS supports the cross-disciplinary collection and exchange of information on the availability of drugs, consumption of drugs, and consequences of drug use. NDEWS-coordinated activities include early detection and communication by the NDEWS virtual network, social media scans, and a partnership with the American Association of Poison Control Centers. NDEWS also monitors emerging local drug trends in 12 Sentinel Community Sites (SCS) and through targeted Hot Spot Studies. This workshop will present the methods and findings generated by NDEWS during its first two years. The presenters will 1) introduce NDEWS and review its components; 2) highlight NDEWS advancements; 3) discuss emerging drug use patterns and trends in the SCSs; 4) highlight emerging drug use trends and patterns in San Francisco (a SCS); 5) review the results of recent ethnographic interviews conducted as part of a Hot Spot study on the use of synthetic cannabinoids; and 6) describe new techniques for scanning and interpreting drug-related tweets.

VIII. **A gender lens to addressing adolescent substance use disorders and trauma with systems level approach / SASATE Business Meeting**
    Chairs: Michael Dennis and Sally Stevens

Adolescents who have experienced trauma report more substance use, criminal activity, homelessness, and mental and physical health challenges. These youth are in need of trauma-informed integrated services — including girls and lesbian, gay, bisexual, transgender (LGBT) youth. The effectiveness of treatment can be improved if services incorporate a systems-integration approach specifically tailored to these high-risk groups. The specific aims of the workshop are to (1) provide an overview of adolescent substance use disorders and trauma by sex and gender identity; and (2) present outcome data on the effectiveness of systems-integrated, trauma informed, gender- and LGBT-targeted interventions for substance-involved adolescents who present with histories of trauma. Reports will include information on substance use disorders and trauma symptoms in national data from adolescents entering substance abuse treatment by sex and sexual identity; substance use, trauma, sexual behaviors, and outcomes of a trauma-informed and systems-integrated intervention effective in reducing substance use, trauma symptoms, and risky sexual behaviors among adolescent girls; trauma-responsive system of care for LGBT youth and how this system of care improved outcomes with regard to substance use, mental health and homelessness for this population; a clustered randomized pilot trial that reached female adolescent dropouts who use drugs in a South African study and have been traumatized and live in violent poor townships, their response to a pilot study and the government response.

IX. Marijuana laws: the changing legal landscape and its consequences
   Chairs: Marsha Lopez Andrew Freedman

Marijuana is still illegal under federal law, but over half the states in the US have decriminalized or legalized it in some form. The effects of these changes are highly controversial. Public opinion about marijuana use is rapidly becoming more permissive, while proliferating marijuana dispensaries for medical or recreational use are providing ways to consume marijuana not previously seen at this scale, including marijuana-infused food and beverage products, electronic delivery devices, and emerging marijuana tourism in states with legalized recreational use. Many questions remain unanswered about the impact of these developments on the risk for marijuana use and related problems, questions that are the focus of intense public and scientific debate as the public considers and votes on medical and recreational marijuana laws, and as clinicians and policy-makers seek guidance from research findings. This workshop brings together important new findings from studies of these issues, including information on how adolescent attitudes and behaviors have been influenced by the law changes in Washington; how patterns of medical marijuana use in California correspond to health outcomes; how trends in hospital and poison center usage have been impacted by medical and recreational legalization policies in Colorado; and how social media is being used to track emerging cannabis trends.

X. Research and emerging strategies for parents of substance-involved adolescents and youth: Results from NIDA's Parents' Translational Research Center
   Chairs: Kimberly C. Kirby and Elena Bresani

Use of illicit drugs, binge drinking, and heavy alcohol are highest among adolescents and young adults (16-29 years old), and heroin use and overdose has increased over the past 5 years among young adults (21-29 years). As their children begin to deteriorate in the face of increasing drug use severity, parents are often desperate and unsure how to help. An abundance of advice is available, but much of it is conflicting and very little has a basis of empirical support. The goal of this workshop is to present the translational research that has been completed during the past 5 years by the first NIDA-funded center focused on the needs of parents of drug-involved adolescents and young adults. Speakers will present findings from research addressing parental responses to substance use at a broad continuum of severity, beginning with factors influencing parents' initial detection and response to substance use (N=1,102), through guidelines for selecting and evaluating treatment options (N=208) and changes in adolescent service provision (N=435), to methods for facilitating treatment entry of treatment resistant adolescents and young adults (N=59). Future research and the importance of providing parents with information and practical tools for addressing substance use of their adolescents and young adults will be discussed, highlighting parent needs and quality of services.

XI. Annual CPDD design and analysis workshop
Chairs: Sterling McPherson and Susan Mikulich-Gilbertson

Since the beginning of the HIV/AIDS epidemic, drug users have been at increased risk for HIV infection and transmission, both through risky injection drug practices and risky sexual behaviors. As the epidemic has evolved, drug users have faced increasing disparities related to HIV testing treatment, and retention in care— with correspondingly poorer clinical and psychosocial outcomes. Moreover, drug addiction can interfere with HIV treatment outcomes, both directly through biological processes and indirectly through difficulties with HIV disease management. With the goal of an AIDS-free generation, funding priorities now emphasize biomedical approaches. However, behavioral research remains critical to ensure that all individuals— no matter how difficult to reach— can derive the maximum benefits from new biomedical treatments to reduce the transmission of HIV and effectively manage HIV-associated comorbidities. This workshop highlights major advances from interdisciplinary research teams led by behavioral scientists. The presentations cover bio-behavioral approaches to identifying behavioral risks among high-risk groups, neurocognitive impacts on decision-making processes relevant to HIV risk, and multi-component interventions to reduce risk of HIV transmission and improve HIV-related outcomes. Our discussant will review the results of these studies in light of new NIH priorities for HIV/AIDS research among persons who use and abuse drugs.

XII. Education in drug abuse
Chairs: Michael Kuhar and Jack Stein

How do you respond when a student, fellow, collaborator, visitor or layman wants to know more about drug abuse? Often laymen, faculty and trainees are exposed to a narrow area of training, but then may seek more information or even a broader overview of the field. It is to everyone’s advantage to expand their knowledge about drug abuse, and the availability of educational resources is very important. Education is central to prevention, treatment and research. It facilitates collaborative efforts and communication among colleagues. This workshop will describe what educational resources are available, and how to access them. The recent expansion of Internet resources can be overwhelming, but this workshop will describe them as well. It will cover online (and other) degree programs; the body of available knowledge and teaching; various online programs such as MOOCs (massive open online courses that can be taken anywhere at the learners convenience); and discovering NIDA’s research portfolio.

XIII. Regulatory and methodological considerations in the evaluation of drug dependence in the preclinical and clinical setting
Chairs: Beatrice Setnik and Michael Klein

Evaluating drug withdrawal effects is an integral component of dependence potential, which informs the overall safety, appropriate dosing, and scheduling of a drug. The methodological approaches to assess dependence continue to evolve and require careful evaluation of both preclinical and clinical data. Physical dependence can manifest from various drug classes including classes of drugs that are and are not associated with substance use disorder (e.g. beta blockers, corticosteroids). Preliminary approaches often include animal models to evaluate psychological dependence and the physical manifestation of withdrawal type symptoms. Translation of animal pharmacokinetics to human can be challenging and needs to be carefully evaluated to determine the translatability of animal to human data. In the clinical setting, evaluation of withdrawal requires characterization of a drug's pharmacology to determine what type of symptoms may manifest upon abrupt discontinuation. Study populations must be carefully considered, particularly in patient populations that cannot be safely withdrawn from study drug. Clinical trials must determine what population, duration of maintenance and endpoints are relevant for a given drug. Commonly adverse events and drug-specific withdrawal scales are included to evaluate withdrawal symptoms, however other pharmacodynamics measures may also be considered. The administration of endpoints and safety monitoring requires also practical considerations in the context of larger patient trials, where confined stays may not be possible following abrupt discontinuation. This workshop will address the regulatory and methodological considerations that are rapidly evolving in this active area of research and will cover case examples of studies examining drug withdrawal and dependence.
Acknowledgements

The following organizations and individuals have financially supported the work of the CPDD organization during the past year:

Apt Foundation
George Bigelow, PhD,
Johns Hopkins Behavioral Pharmacology Research Unit

Alan Budney and Dartmouth College

Cerecore
Howard Chilcoat
Theodore Cicero
Sandra Comer

William Dewey
