

Call For Papers:
**Technology-Based Interventions to Address
Mental Health or Substance Use**
at the **Hawaii International
Conference on System Sciences
HICSS-60: January 5-8, 2027**
Hilton Waikoloa Village, Big Island

What is it?

HICSS is the longest standing scientific conference in the information systems and technology field. Since 1968, it has attracted high caliber scholars and professionals in academia, industry, and government agencies around the world. Approximately half of attendees are from outside the US.

Why submit work to HICSS?

With the growing importance of technology in the delivery of healthcare, “Information Technology and Healthcare” is quickly becoming one of the largest areas of interest among HICSS attendees. It’s important to have the voices of medicine, behavioral medicine and the social sciences represented along side technologists.

Technology to Address Mental Health or Substance Use

Our mini-track, “Testing and Implementing Technology-Based Interventions to Address Mental Health or Substance Use,” is seeking paper submissions on research that: (1) describes the development of novel digital interventions; (2) evaluates key patient and provider characteristics of intervention engagement; (3) assesses important patient outcomes as a result of using these strategies; and/or (4) addresses implementation factors that increase and/or inhibit generalization and scalability.

How do I submit my research?

Conference submissions are not abstracts - they are fully developed papers that are peer reviewed. Authors of accepted papers have the opportunity to respond to reviews and edit their papers before publication in the conference journal. The conference is highly competitive with < 50% of submitted papers being accepted.

Paper submission details:

Contact the mini-track chair Jordan Braciszewski (jbracis1@hfhs.org) for information about how to submit papers or check the HICSS [website](#). A more comprehensive description of our mini-track can be found [here](#).

The manuscript submission deadline June 15, 2026.
